### Peaches for Winter Use

Peaches which ripen in September and October are much superfor to the early variety for canning purposes.

The quickest method for removing the skins is to scald the fruit in boiling water, just the same as tomatoes. The result is a smoother surface than when peeled with a knife. Peaches which stand after peeling for any length of time become dark; if sprinkled with a few drops of eating corn to help use the suplemon juice it will prevent the dis- | ply the farmers have. It is put-

firm and uniform in size should tain the minerals and salts and be used in canning or pickling. The soft, broken ones for marmalade or peach butter. The method of canning may be either the cold pack or open kettle, whichever method is used, care must be taken to not over-sweeten or they lose their fresh fruit flavor.

Try the following receipts for preserved and for spiced peaches: · Preserved Peaches: elect ripe, but firm fruit. Pare, halve and remove the stones from the peachs. Allow five pounds of sugar to seven pounds of fruit. Add enough water to the sugar to prevent burning, and when boiling hout 10 minutes or until clear and tender. Remove the peaches with a skimmer and drain. Let one of many other ways? the sirup cook rapidly until near-ly done when it begins to thicken; then return the peaches to the sirup and cook about five minutes longer. Test as for jams or jellies. Pour immediately into sterilized jars and seal.

Spiced Peaches: Select large, firm peaches and dip quickly in | We need not suggesst corn on the hot water to remove the skins: Make a sirup by boiling together two pounds of brown sugar, one plat of vinegar and one ounce of leacy of corn custard and to the stick cinnamon for 10 minutes: simplicity of corn fritters and corn Stick two or three whole cloves in each peach, put a few at a time n teh sirup and cook until ten-

der. This sirup is sufficient for ling on one side and then the otha half a peck of fruit. Pack clos- | e.. ly in hot sterilized jars, adjust rubbers, and fill to overflowing. with the hot sirup. Adjust covers and seal immediately.

THE SPINE BY THE STEEL AS ALLEM SERVICE

Put Corn to Its Many Uses

There is just enough perversity in all of us to sympathize with the man who said he had never even tasted spinach, because everytime it was served someone said, "It's ting an awful burden on these Only those peaches which are delicious dishes to say they conother things we need in the diet. Instead of mentioning this perhapsit would be wiser just to serve them in new and appetizing guises and see how quickly the family will ask for more.

There are easily discerned characteristics of fresh vegetables that everyone should know. These are easily remembered, easily used and worth much to the one who does her own marketing. For instance in choosing corn select ears with bright fresh husks and full milky breaking the skin. Fill the chickkernels, which dent easily when

Have you tried besides corn on dd the fruit and cook slowly for the cob, cut off boiled, buttered and seasoned or scalloped in souffle as corn custard or even in

> Just at present one may not feel like making corn bread or corn mush, but one interesting summer resort in Canada, right Powder, on Lake Huron, serves corn meal mush every evening for supper and it is good too; either with plenty of ice cold milk or syrup. cob, because this is the favorite method of the majority. But I do call your attention to the delcroquettes.

CORN FRITTERS 2 cups green corn pulp.

2 eggs. 21/2 tablespoons flour. 14 level teaspoons Calumet Bak ing Powder.

1 level teaspoon salt.

Dash of pepper or paprika. 1 teaspoon melted shortening. The corn must be uncooked and freshly scraped, not cut. Beat the egg yolks into the corn, then fold in stiff whites. Add other ingredients. It may need more flour, but add as little as possible. Fry in a hot greased frying pan brown-

All silver and china must be conveniently placed so the guests may help themselves with little difficulty.

As to the dishes served, there is wide variety from which to choose. Hot scalloped or casserole dishes such as potatoes, corn, macaroni, cheese croquettes and creamed foods in patty sheas. Usually lighter foods are usedfish, oysters, sweetbreads, mushrooms or fried chicken, and the salad or dessert according to teh

individual taste of the hostess. Foods which are prepared some time in advance are more appropriate than those which require careful attention of the hostess, while her time should be given to

the entertainment of her guests. fancy shapes and either toasted or fried in deep fat offers many possibilities in serving creamed dishes, or if a cool day, they may be served with clear soup for the first course.

#### Scientist Advances New Theory for Finding Ore

MINNEAPOLIS .- A University of Minnesota scientist believes his theories of the way metal ores are deposited in the ground and the places where they may be found, will become accepted as law in geologic science. He is Dr. W. H. Emmons, head of the department of geology.

The theories which Dr. Emmons has worked out during 20 years of research, have attracted so much attention that he has been asked to explain them before the American Institute of Mining and Metallurgical Engineers and the Society of Economic Geology, both meeting in New York next winter.

Japanese Girls' Society No Longer Called Maidens

# Competent to judge

THERE is no better way for you to learn the true value of commodities in general use than to read the advertisements day by day-regardless of whether or not you have any immediate intention of buying.

Those young housekeepers whose first experiences in marketing began in war-time have a fixed idea of high prices. Those of an older generation have an equally strong conviction that prices should be lower.

With the shifting changes of a rapidly moving world both prices and values are bound to fluctuate. A financier studies these trends with scrupulous care in published financial reports compiled by experts.

An intelligent housewife may similarly make herself a competent judge of values by studying each day's advertisements of the things she needs - just as the broker studies his stock list.

Then as she comes to buy she may do so with full confidence in her knowledge.

To stand the test of advertising, mercandise must be good
