

OLDSMOBILE "TRAVELING SCHOOL"

OLDSMOBILE DEMONSTRATION CHASSIS

SCHOOL ON WHEEL IS OLDS FEATURE

Fifty "Institutions" Are Now Touring Country on Demonstrations

Fifty "automobile schools on wheels" are touring the country, each in charge of a competent instructor, under a program engaged in by Oldsmobile branches, distributors and dealers.

By means of these "itinerant schools" Oldsmobile officials plan to show and explain to automobile owners the vital parts of a motor car rarely, if ever seen by the av-

erage driver. In this way it is believed that owners will better understand their cars and will obtain even better motoring satisfaction in the future.

The "schools" consist of a stripped Oldsmobile chassis so equipped as to allow the attending demonstrator to explain the mechanical features in detail. That part of the automobile which is "under the floor" is exposed to plain view showing the method by which the power is transmitted from engine to rear wheels.

A box carried in the rear of the chassis opens into a parts display where the important parts of the inner mechanism of the car are shown. These include the crankshaft with harmonic balancer, camshaft with the latest type quiet curve cam design, silent chain drive, disc clutch assembly, cut-away section of the cylinder block, piston, axle shaft, connecting rod, spiral bevel drive gear, main bearings, valve lifter assembly and self-aligning and self-lubricating clutch release bearing.

With the aid of the stripped chassis and these parts, the demonstrator is enabled to clearly explain the entire workings of the car—why certain things happen under specific conditions and how each part is designed to do its share in giving smooth and consistent motor performance.

The lectures by the demonstrators cover several fields of science. Explanations are given of the electrical system, the latest methods devised to keep harmful foreign substances, either solids, liquids or greases, from the engine by means of dual air cleaners, oil filter and crankcase ventilation, thermostatic principles of two-way cooling, the devices which insure perfect lubrication at all times and other features of leading motor car design.

The Oldsmobile chassis is equipped with a seat for two so that the instructor can take interested parties on rides during which hill climbing, acceleration and deceleration demonstrations of actual performance can be made.

Sandy—New Hickman two-story brick building to cost \$8000.

TEST FOR DRIVERS ASKED FOR SAFETY

Uniform Motor Operator's and Chauffeurs' Legislation Favored

Ten salient reasons why every state in the union should enact and enforce the uniform motor vehicle operators' and chauffeurs' act recommended by the Hoover conference are presented by the National Safety Council, which points out:

1. The large number of automobile accidents that take such a huge toll of lives, limbs and property, should be reduced, fol-

lowing passage of the model law urged by the second national conference on street and highway safety.

2. There should be a marked decrease in the number of drunken drivers as motorists who persist in mixing gas and booze will have their licenses revoked, which is not possible in many states which do not issue such permits.

3. Speeders will slow up when going through residential districts, where children play in the streets, if they know their licenses are in danger of being cancelled.

4. Habitual careless operators of motor vehicles, who are constantly involved in crashes, will be more cautious and courteous once they face the prospect of losing their licenses.

5. Permits to drive will not be granted to applicants who are physically unfit, by reason of being subject to fits, fainting spells,

defective vision or hearing, etc.

6. Licenses will not be granted to persons who are mentally deficient. Today it is possible in some states for the insane to operate cars.

7. Foreigners who cannot read or speak English will have to learn the meaning of the rules of the road, read traffic signs, understand traffic signals, etc.

8. Boys and girls under 16 years of age will not be able to get a license. Minors will not be allowed to operate taxicabs, jitneys, buses, etc.

9. Tourists who desire to spend more than a month in some other

state will not have to take out an additional license, as there are liberal non-resident privileges in the proposed law.

10. The new act should result in motorists being afraid to speed away after being in an accident, because they will realize that, if apprehended they will lose their licenses and face the possibility of both a fine and a jail sentence.

Queen Mary Considered Criterion of Good Taste

Queen Mary is considered a criterion of good taste which is best

exemplified by her conservatism in jewelry. She never, for instance wears the famous Koh-i-noor diamond at the same time as the Great Star of Africa, believing that these two immense gems would be overpowering and even inartistic when seen in conjunction.

She still continues to wear white gloves, white shoes and white hose when she wears dress of white. It has been commented that her style seems more accurate than that of the fashion leaders who combine mushroom hose and snakeskin shoes with white dresses.

SIMPLE RULE AIDS NEW AUTO BUYERS

(Continued from page 1.)

demands a straight line drive, the propeller shaft running almost without drop to the transmission to the rear axle. Straight line drive means delivery of the full power of the motor to the rear axle.

Mechanical four-wheel brakes offer simplicity and constant adjustment without the necessity for attention on the part of the car user.

These are the essential features by which to judge a motor car. They are the features which will determine the value of the used car a year or two from now. They are the features to which the larger manufacturers are turning at the present time. In Willys-Knight and Overland products they have been standard since the present models have been developed.

UNION OIL OPENS ALASKAN STATIONS

(Continued from page 1.)

These are located at Alert Bay, Rutedale, Bruce Landing, Claxton, Inverness, Nass River, Nootka Quathlaski Cove, Rivers Inlet, Tchuklest and Ulnellit. At Prince Rupert, terminal of the Canadian National Railways, and one of the leading fishing ports in northern British Columbia, construction of a sales station is nearing completion.

These stations have been established to meet the requirements of the fishing fleets which operate on the coast and rivers of British Columbia.

The oil stocks for the British Columbian group of stations will be supplied, according to report, by the Canadian company's refinery located near Vancouver, B. C.

C. W. Day, tires, tubes and accessories. Has the Goodyear tires, the standard of the world. Mr. Day can give you more mileage. Corner Com'l. and Chemeketa. (*)

Express Train Dependability

Hupmobile Six Built to same High Standards as Costliest Cars

Hupmobile Six a Leader, Also, In Complete, Modern Equipment

What goes into a motor car is vastly more important than what goes on it. You will not buy, of course, on mere externals and non-essentials, but on proven performance, dependability, long life, and low cost of maintenance. To superiority in these fundamentals, however, the Hupmobile Six also joins the latest and most complete equipment to be found on any car in its price class.

Oil filter. Gasoline filter—low gasoline consumption. Thermostatic heat control. Snubbers. Vision-ventilating windshield. Dash gasoline gauge. Clear vision bodies. Color options—Molair upholstery in latest mode. Walnut grained panels on instrument board and window ledges. 4-wheel brakes. Special vibration damper. Headlights with taking beam lenses and double filament bulbs.

Certainly no car at its price—or within five hundred dollars of its price—compares with the Hupmobile Six in brilliant, delightful performance.

its ability to perform and to out-perform, however, is not the most remarkable feature of this great car. Underlying the public's admiration for this big, beautiful, full-size Hupmobile Six, is the deep seated respect of the average American for Hupmobile's traditional dependability.

Hupmobile pays millions of dollars more each year to make its Six one of the most dependable of all six-cylinder cars.

Owners, however, reap the benefit. The Hupmobile Six owner will tell you that his cost of maintenance is so low as to be almost negligible.

He will tell you that he can set out on a tour of a hundred, or a thousand or ten thousand miles, with the complete assurance that his journey will be unmarred by mechanical trouble or annoyance.

For you can drive this Hupmobile Six at express train speed, from sunrise to sunset, in the comforting knowledge that it is engineered and constructed to give such service easily, smoothly, and without straining.

Try to follow a Pontiac Six for a day

The Pontiac Six is designed to travel rough roads without pitching, gallop or sidesway. It is built to withstand the pounding of sustained high speeds. It will maintain the punishing pace of better than 50 miles an hour, for as long as you like—and easily, too!

And simply because, with that stamina are combined comfort, grace and beauty, as in no other low-priced six, the Pontiac Six continues its triumphant march toward the unchallenged sales leadership of its field.

Pontiac Six Landau Sedan, \$895. Oakland Six, companion to Pontiac Six, \$1025 to \$1295. All prices at factory. Easy to pay on the liberal General Motors Time Payment Plan.

What "dependable" really means

Ponder the basic elements underlying Dodge Brothers remarkable success and one simple fact stands boldly out:

The public not only believe in the goodness of Dodge Brothers Motor Car, they believe in the men who build it and the men who sell it.

That is why the word DEPENDABLE is associated the world over with Dodge Brothers name. It goes beyond the product and embraces every department in Dodge Brothers great organization.
