

MOTOR TOURISTS ILL FED. CLAIM

Extended Licenses of Boarding Houses Demanded by Motor Group

WASHINGTON, D. C.—Following on the heels of many complaints received during the 1926 touring season in regard to the poor quality of food and accommodations given by many of the farm houses and boarding houses catering to motor tourist travel along the highways, the American Automobile Association issued a statement today declaring that the state health authorities must extend their licensing and supervision to such places in the interest of public health and safety.

The complaints which prompted the AAA investigation and today's statement came from every section of the country, it having been found that there is everywhere along the highways places offering tourist accommodations that are in no way equipped to give a standard of service that safeguards health requirements.

The AAA, said the statement, fully recognizes that the growth of motor-touring in recent years has created a demand for lodgings along the highways. It is equally clear, however, that many undesirable places have gone into this type of catering and to make the matter worse "spy" outfits encourage such places by selling them signs and picturing lots of easy money.

"In too many instances," said Thos. F. Henry, president of the AAA, "these boarding houses do not come up to the minimum requirements of the state health departments either as regards sanitation or food and water."

"At the moment there is no regulation or supervision whatever of these establishments. The number of complaints forthcoming indicate clearly that in a great many instances they are not equipped to take care adequately of the traveling public. In many instances the conditions do not come anywhere near modern sanitary requirements."

"In too many cases, the room and bath advertised simply mean one dilapidated bath in a house of ten rooms. Ninety-nine times out of a hundred the tourist who enters such places has no knowledge whatever of who is running them, what previous sickness the place may have harbored, or whether he can depend on getting pure food and untainted water. The situation is aggravated by 'spy' outfits which start many unqualified people in the business of catering to motorists by selling them signs that mislead the motorist as to the character of the place."

"No rule of health is better established than that which requires the supervision and licensing of hotels and restaurants doing business with the public. Surely, when there are so many millions traveling the highways and subjected to the danger that may lurk in unsupervised and unlicensed boarding houses, the day is at hand when the states must take cognizance of the situation."

"It will prove to the advantage of all concerned because it would increase public confidence in such boarding houses as pass muster with the state health authorities and put out of business those that do not reach the necessary health standards. There is no doubt whatever that out of every 10 people who fall victims to sickness while touring, nine of them can attribute it to bad food or tainted water received in roadside lodgings."

"Motorists by and large have learned to shy clear of untended roadside water because of the

campaign of education conducted by health officials and by motor clubs. Too often, however, they overlook the fact that water supplied by the poor type of boarding house may be more dangerous than the roadside spring on which there is no seal of safety sign."

CADILLAC'S ANNIVERSARY MARKED BY BIG DISPLAY

(Continued from page 1.)

was an exact duplicate of every other part of the same kind and fitted in any car assembly without hand preparation. Due to general performance, including the performance of its newly developed electric starting, lighting and ignition system, the car was again awarded the Dewar trophy in 1913. It was the first American car to receive such recognition abroad; and it is the only car in the world to have been so honored twice.

The forerunner and basis of the present Cadillac was put upon the market in 1914 with the production of the first V-type, 90-degree eight cylinder car in America. The V-62, presented in 1922, was a further improvement upon this same V-8 principle. The engine was inherently balanced, its compensated crankshaft eliminating vibration and solving a problem which for years had baffled automotive engineers.

A new 90-degree eight cylinder Cadillac was presented in August, 1925. During the next twelve months the company's sales showed an 87.5 per cent increase over the sales of the preceding year. Four months later, an epochal milestone in the company's history was passed by the production of the 200,000th V-type, 90 degree eight cylinder motor car. This number was equal to the combined production, for the same period, of all other cars in the Cadillac price range and above.

With the announcement of this fall of 50 distinctive body types and a choice of 500 color and upholstery combinations, added improvements and refinements, the company has prepared to meet the growing demand for individualized coachwork and has embarked upon a manufacturing program the extent of which has never before been attempted by any automobile manufacturer.

He May Be a Good Driver But He's a Poor Parker

Here's a horrible example of an automobile owner who doesn't know how to park his machine according to Hoyle. You'll note that the driver of the car in the front evidently was in too much of a hurry to observe and heed the white lines painted to show him the space allotted for his vehicle. If he tries to back out before the auto close to his own is moved, he'll probably bump the car behind. And, if the driver of the other machine happens to be around at the time there may be another crash. If he stays away long enough traffic probably will grow heavier and his own machine may be bruised by a passing machine. There are one or two drivers of big trucks in this town who delight in helping auto painters keep busy.

CHRISTIAN SCIENCE SERMON GIVEN HERE

(Continued from page 4.)

and now let us devote every purpose. Jesus, our great Way-shower, taught his disciples one prayer known as the Lord's Prayer. This prayer is loved and revered by all Christian people, and will, when rightly understood and applied, meet, in the most practical way, every human need.

THE BIBLE

All Christian Scientists are taught to love and study the Bible. The teachings of Christian Science, as given in "Science and Health with Key to the Scriptures" by Mary Baker Eddy, will unlock to all earnest seekers, when rightly understood, the treasures of the Bible and make their rich promises usable to all here and now. On page 497 of Science and Health the first religious tenet of this great teaching is found. It reads, "As adherents of Truth, we are the inspired Word of the Bible as our sufficient guide to eternal Life." The teaching of Christian Science in its entirety is founded on the Bible. Mrs. Eddy tells us in her writings that the Bible was her only textbook, her only teacher, her sole authority, that she had no other guide in her search for

spiritual light. In the Christian Science Sunday School the children are taught the Scriptures, the truth about God and man. They are taught to understand the life purpose of our Way-shower, Christ Jesus. They become familiar with the life and works of the early prophets and the apostles. They become familiar with the glorious promises of the Bible and how the wonderful healings were accomplished through the right understanding of God and man. The children in the Sunday School are early taught the Commandments and Beautitudes and how to make them usable in their lives. Often the very first sentence formed by their baby lips is "God is Love."

It is not uncommon in a Christian Science home for each member of the family to own a copy of the Bible and to study daily and discuss with others its great truths. Surely no one present will ever let any one say to you again that Christian Scientists do not revere and study the Bible. It is indeed their daily companion, for through its sacred pages the great spiritual light, the Christ, is made known.

CHRIST

Christian Science teaches that Christ is the complete expression of God's nature, the light of spir-

itual understanding that reveals God, and destroys the darkness of materiality. Christ is the great spiritual light of truth that touched the lives of the early Christians, of Abraham, Jacob, and the prophets. Christ is the light that revealed to Moses the Ten Commandments, the light that guided the children of Israel through the Red Sea, that saved the Hebrew lads in the fiery furnace, that protected Daniel in the lions' den. Christ is the great light that has touched and purified the lives of the Christian men and women throughout all time, giving them rest and peace. This light of truth and spiritual understanding was expressed in fullest measure by the great Christian, Jesus the Christ.

Once when teaching a class of boys in a Christian Science Sunday School the question was asked, "What is Christ?" Small boy ten years of age gave this answer, "Christ is light." Then he explained it in his simple way, "Before we know about God it is as if we were in a perfectly dark room, sick, unhappy, and afraid. A tiny light is then turned on by some one explaining about God. Then to have more and more light, one must go on learning about God, and to have all the light turned on, this must know all about God." This child's explanation of Christ has always been helpful to me. Surely we all agree that the way to destroy the darkness in a room is to turn on the light. Does it matter how long the darkness has existed? The immediate and unfailing remedy is light.

Christian Science teaches that God is All-in-all, and that this correct understanding of God reveals the spiritual light that is destroying the darkness of materiality.

This provable understanding of God, this great redemptive power of Christ, is available to all mankind, and is to-day healing all manner of sickness and sin. It is wiping all tears from the eyes, binding up the broken-hearted, giving rest and strength to the weary and heavy-laden, thus enabling each one of us to face the problems of life with courage and joy.

In the words of a favorite hymn (Christian Science Hymnal, p. 251):

"Faint not nor fear, His arms are near,
He changeth not, and thou art dear;
Rely on Him, and thou shalt see,
That Christ is all in all to thee."

JESUS

The light thrown upon the Scriptures through the revelation and study of Christian Science makes clear to one the life mission of our Way-shower, Christ Jesus, whose virgin birth enabled him to be the mediator between Spirit and flesh, to discern between the false and the true. This

spiritual conception and origin of Jesus enabled him to see his oneness with the Father. Being born of a human mother, he was able to know the needs of humanity. He knew the remedy for all ills of the flesh. He knew how to rend the veil of matter and behold the perfect man, He came teaching mortals the way of full salvation.

Mortal man is prone to rely upon his own efforts, his own belief of ability in seeking safety, protection, and preservation. In Christian Science he learns to rely upon God for his protection and help; and this reliance on God makes his own efforts for salvation effective.

Through the study of Christian Science one may understand how to make the most practical use of the teachings of Jesus. Countless numbers are ready to testify that through this understanding they have been healed. They have been able to drop their burdens of human woe, and have found peace, health, happiness, and rest beside the "still waters" of spiritual understanding.

Jesus rebuked sin of every name and nature as well as sickness, yet with the greatest love and compassion. Perhaps no more touching example of his tender compassion could be given than when he said to the adulterous woman, "Go, and sin no more."

He healed all manner of disease, fed the multitudes, walked on the waves, raised the dead, and finally made his own demonstration over death and the grave. All this he did because of his great unselfish love for humanity, that we might know how to work out our own life problems aright, that we might experience freedom and salvation from all materiality and prove our oneness with the Father.

DISCOVERER AND FOUNDER

In the gospel of John, Jesus promised that God would send another Comforter, which would bring into remembrance all his sayings, that this Comforter would remain with us forever and teach us all things. This Comforter or truth of being was again revealed to the world in 1866, by Mary Baker Eddy, the Discoverer

and Founder of Christian Science. Mrs. Eddy was a New England gentlewoman, whose Scotch-English ancestry crossed the ocean to America seeking religious freedom. Although Mrs. Eddy was a delicate child, she received the most careful and thorough education. From early childhood she was deeply religious, ever seeking to know God, earnestly praying for divine guidance. At the age of twelve she united with the Congregational church and remained a member of that religious body until she founded the Christian Science church in 1879.

It is difficult to express, in words, one's appreciation of the great Leader of the Christian Science movement, whose thought was always reaching out and up to God. Through years of seeking, years of sorrow and suffering, her thought was forced higher and higher. At last in an hour of great extremity, after suffering three days from an injury caused by an accident, an injury from which her physician said she could not recover, she asked to be left

alone with the Bible and received the revelation which healed her immediately. The physician and her family, not being able to understand what had taken place, felt a miracle had been wrought. With this healing came the great desire to share this discovery with others.

On page 109 of Science and Health Mrs. Eddy writes: "For three years after my discovery, I sought the solution of this problem of Mindhealing, searched the Scriptures and read little else, kept aloof from society, and devoted time an energies to discovering a positive rule." As a result of Mrs. Eddy's prayer and searching, the Christian Science textbook, "Science and Health with Key to the Scriptures," was published in 1875. Mrs. Eddy revised this textbook from time to time as her thought and manner of presentation grew. The last general revision, which contains a complete exposition of the teachings of Christian Science, was

PLEDGE TO THE PUBLIC ON USED CAR SALES

1. All used cars offered to public shall be honestly represented.
2. All Studebaker automobiles which are sold as Certified Cars have been properly reconditions and carry a 30-day guarantee for replacement of defective parts and free service on adjustments.
3. Every used car is conspicuously marked with its price in plain figures, and that price, just as the price of our new cars, is rigidly maintained.
4. Every purchaser of a used car may drive it for five days, and then, if not satisfied for any reason, turn it back and apply the money paid as a credit on the purchase of any other car in stock — new or used.

Pontiac Six Sedan or Coupe, \$825

Why Pay More Than \$825 and Get Less Than This?

1. A spacious Duco-finished closed body by Fisher, with all the beauty of line and contour which distinguishes Fisher craftsmanship.
2. The largest six-cylinder engine used in any car costing less than \$1000.
3. The ability to maintain over 50 miles an hour, for as long as you like—without taxing the car or its passengers.
4. Rugged construction and quality design, as typified by a 46 lb. crankshaft, interchangeable bronze-backed bearings and adjustable pressure force-feed lubrication.
5. Equipment which includes VV one-piece windshield, automatic cleaner, milled radiator with Indian head cap, dome light, roller shade, and high pressure chassis lubrication.
6. A reputation for ruggedness and approved design that grows with every new owner added.

Why pay more and get less than the Pontiac Six offers at \$825—a closed car value which has won twice as many buyers in nine months as any other new make of car during its first full year?

Pontiac Six Sedan, \$895. Oakland Six, comparison to Pontiac Six, \$1025 to \$1295. All prices at factory. Easy to pay on the liberal General Motors Time Payment Plan.
