LOOM STARTS SATURDAY AT SECOND LINEN MILL

There are yarns enough on hand now to start 20 looms; partly Irish yarns coming with the machinery. Operators will have to be broken in gradually, which is now starting. Two expert Irish girl weavers will be on hand, and a card cutter and designer and loom fixer.

So there will very soon be some articles turned out ready for the markets, though, of course, it will take 60 to 90 days to be ready to deliver anything like the full volume that will come with the lumbering up of the machinery and the getting of trained men and women.

The hackling and carding machines are in the shipment arriving in Portland yesterday, and these are heavy pieces and will require time for assembling. So outside sources will have to be depended upon for yarns for a

The Elsinore: "Zane Grey's 'Jordan River,'" with Jack Holt, Raymond Halton, Tom Santehi, Arlette Marchal.

Oregon: "Up in Mabel's Room" with Marie Prevost Harrison Ford, Phyllis Haver, Harry Myers, Sylvia Bremer.

Grand: Buck Jones and Silver Buck in "The Flying Horseman."

Fortunately, the Miles linen mill, which is now operating fully, has some suitable extra yarns available.

There is a possibility of getting some extra orders that will enable the mill to get right down to business very quickly, while operatives are in training for the regular lines that will be taken up when full operation is reached.

Britain's new air route from Cairo to Karachi, about 3,000 miles, will finally have five airships.

CLUB TO CONSIDER GAME BAG LIMITING OF STATE

(Continued from page 1)

This question is rather hard to solve as a game problem in Oregon as the birds are plentiful in one or two localities and are scarce in others. The club will in all probability base their answers to the game commission on the basis of what they think would be desirable for Salem and the immediate locality.

The matter of the election of officers for the coming year will also be taken up for final action by the club members.

day calling attention to needy people. Kiddies should send their letters to Santa Claus care of The Statesman and everyone will be treated in strict confidence.

A letter was received from a father the other day saying he had two children—was able to work and would work if he could find employment. His two little kiddies face a bleak Christmas unless some help is forthcoming. Picture their bright faces on Christmas morn as they arise and hurry to their stockings only to find them empty—no they must not be empty. You folks, who are working with Santa, must see that they have some things for Christmas.

There are many such cases, where the essentials of life are needed as well as the little things, which bring happiness. Only a very few days remain in which to join in this work of making the Yule season real for needy people and poor kiddies. Help Santa by leaving clothing

and food at the Salvation Army headquarters and money contributions with the Christmas Cheer editor of The Statesman. Every article and every cent of money is being used to bring happiness to some worthy person. Do your bit now.

Exquisite

REALISTIC reproduction—free from interference and distortion, unmarred by whistles, clicks and hissing—that's what you and every other purchaser of a radio are after.

You get it in a Kellogg because the Kellogg Company has the engineering experience—the knowledge of voice transmission—to build it into Kellogg sets!

The Inductive System of tuning used in these receivers is exclusive with Kellogg. It gives even sensitivity at all wave lengths and permits control of four circuits with one knob. Thorough shielding around and between the coils prevents distortion and undesirable pick-up of nearby stations.

Kellogg receivers are licensed under application for letters patent of Radio Frequency Laboratories, Inc. (R. F. L.)

The flawless performance of this superior receiver will amaze you. Consistently long range that you can boast of—and prove—to your friends. Selectivity that not only separates nearby stations cleanly and clearly, but enables you to go on through and get programs from those far away. Powerful reproduction that is faithful and realistic while it carries to every room in your home.

Drop in anytime, day or evening, for a demonstration of this greatest of six-tube receivers. The table model, illustrated above, in a walnut cabinet with full piano finish, is \$215. The console with ample space for all batteries or power supply units, is \$345.
