Three Rooms and Comfort at Low Cost

The cottage type dwelling adapts itself readily to artistic design, and with proper attention to floor plans the maximum of cozy comfort may be worked out in three well arranged rooms of modern size. For one or two people the design shown here has a proved ideal and with slight modification, may be made to suit families of three or four members.

The siding exterior with its simple lines, well placed window space and hooded entrance is quaintly attractive and has an appeal for the home lover not found in many larger houses. Ornamental shutters, flower boxes and bits of shrubbery

give pleasing dashes of color. Interior of the house is well arranged for comfort and convenience. The vestibule leading from the entrance with coat closet attached preserves the privacy of the living room and offers a place for disposition of hats and coats. The French doors afford ample light and will suggest a variety of furnishing schemes to the house-

The living room is light and airy, and the closet for wall bed adds another room when desired. The well lighted dining nook between the living room and kitchen is a delightful arrangement and the kitchen itself is just large enough to operate without wasted steps. A chimney may be added for furnace connectins and cellar steps also if a basement is desired.

NOVEL GARAGE OPENS

Pure Oil Building One of

Striking Structures Seen

in Chicago

· Solving the parking problem

for the drivers of 572 motor cars,

a novel garage is being operated

in "waste space" in the Pure Oil

modern office building. But it

houses more than mere offices. At

the very core of the building, in the location sometimes left as a

court or light-well, fireproof par-

titions have been built, and a garage installed, up to the 21st story.

Autos enter the building from

by an elevator, and rolled to its proper stall by tilting floors.

The Pure Oil building itself, with its striking terra cotta walls

rising high above its neighbors, is

one of the outstanding structures

seal the power plant against com-

pression leaks and does not have

the cam shaft carries the cams,

these strike against the valve lift-

er rods which again strike against

the valve stems to lift the valves

from their seats in order to let

the fresh gases in and the dead

"This entire striking process is against a spring tension and the

force necessary to lift the valve against its inertia is often close to 100 pounds per square inch, per

"Carbon flakes, geiting under the valve head and on the valve

seat, cause leaks and the hot gas-es rushing by through these leaks

burn and pit the valve head and

the valve seat. This is the rea-

son why the valves must be fre-quently adjusted and the cylin-

Appdentices Represent **Five Building Trades**

Diplomas, signifying their completion of the required period of indentureship and the practical course of study in their particular trade, were given to 155 apprentices at the third annual commencement of the Cleveland Trade School on the evening of January ing trades: bricklayers, carpenters, electricians, painters and decorators and plumbers. Under the Cleveland plan apprentices are indentured to contractors for a hree-year period, if a painter, or four years otherwise, and during this period must attend school four hours per week. He is paid regular wages for school time and the rest of the time works on the

Building Prospects Good in Many of Large Cities

Reports from all of the larger cities indicate a much better construction outlook than had been anticipated a few months back Most of the cities are growing and growth necessarily means more building. In a number of cities plans are under way for widening important thoroughfares which means in most instances the tearings. Everywhere residence construction seems to be holding out

Home Builders

More than mere builders of houses and structures we are Home-builders in Salem because we construct primarily on plans of the people who live in the houses and to suit their desires and finances. We are ready to assist you.
