

SISKIYOU TRIAL MAY CLOSE SOON

TESTIMONY WILL BE OUT IN
WEEK SAYS ROBERTS

Seventeen Witnesses Called in
First Week Which Closed
Yesterday

MEDFORD, June 11.—(AP)—The sixth day of the retrial of Hugh DeAutremont, charged with the murder of Charles O. (Coyle) Johnson, Southern Pacific brakeman, during the Siskiyou tunnel holdup of October 11, 1923, closed with the prediction of Special Prosecutor George M. Roberts that the hearing of testimony would take another week and that the fate of the man, the United States government sought the world over for nearly four years, would be in the hands of the jury by Wednesday, June 22.

Whether DeAutremont will take the stand in his own behalf is still unknown, except to the defense attorneys, who are silent on the subject.

The day's proceedings brought one bright ray for the defense in the testimony of J. W. Martin of Dunsmuir, Cal., surveyor's rod man. Martin testified that he had seen two men lurking in the railroad yards at Siskiyou, Ore., a few moments before the holdup and presumed they boarded the train just before it entered the tunnel. He described them as being about five feet ten inches in height, weighing about 150 pounds and dressed in brown material.

The defendant is a slight built man of about 6 feet.

Martin also testified to finding a shotgun shell, a pistol cartridge and a piece of gun wadding near the spot where the engine stood during the robbery, and identified them as exhibits.

Ray Finneran of Dunsmuir, Cal., also a rod man, testified that on the day of the holdup, while walking towards Martin on the right of way he had seen the same two men, that they were of slight build, and wore black caps. He testified they were trying to keep out of sight.

Under cross examination by the defense, Finneran was asked if he had not a few hours after the holdup in conversation with a "Mr. Hartley and a Mr. Inlow, described the two men as being big men, weighing about 160 pounds?" in response, Finneran said: "I don't remember," but would not deny he had said it.

Finneran was the final witness of the day.

D. G. Williams, a constructing engineer of Portland, Ore., employed by the Jacques-Winters Construction company, identified a detonating machine found near the crime spot, as one stolen from construction work in Oregon City, in September 1923. A coil of wire and detonating caps were also identified by Williams as stolen from the work of the construction company. The witness, a powder and explosive expert, went into detail upon the use of dynamite, detonating caps and detonating machines.

Dr. W. W. P. Holt of Medford, former county physician, testified to an autopsy he held over the body of Coyle Johnson, April 21, this year when the body was exhumed. He testified he found a bullet wound in the shoulder, the missile coursing downward and flattening against a rib. The missile with buckshot taken from the body were turned over by him to Detective Craddock of Portland, fire arm expert, who will be called as a witness for the state.

The other witness at the afternoon session was Leon Forncrook, former deputy sheriff of Jackson county, who identified exhibits, including the blue bibbed overalls, in the pencil pocket of which the state will attempt to show a money order receipt issued by Eugene, Ore., post office to Ray DeAutremont.

Forncrook, under questioning by the defense, testified that "I ran my finger in the pencil pocket and found nothing."

The wadded paper was found by

The court adjourned at 4 o'clock until Monday morning, with 17 witnesses called to the stand during the first week.

The jury under guard will be kept out in the open tomorrow and allowed to enjoy any amusement they may choose in a body.

RAILROADS END FEUD ON KLAMATH PROJECT

(Continued from page 1.)

and the Great Northern unless one or the other does not care to participate, in which event the other may proceed on its responsibility. Authoritative sources pointed out today that the harmonious arrangement effected between the two rival railways precludes the possibility of a disastrous competitive stampede to throw the rich timber resources of the Klamath basin on the lumber market.

The agreement of the two railroad systems ends a controversy of more than two years duration. The interstate commerce commission originally gave the Oregon Trunk permission to extend to Klamath Falls provided that an agreement was reached to avoid duplicate railway construction. These negotiations failed and the interstate commerce commission gave the Oregon Trunk permission to build independently into the Klamath basin. The Northern Pacific withdrew from the enterprise and the Great Northern assumed the project on its own responsibility.

Mr. Budd met Mr. Sproule in New York the first of the week to renew negotiations.

CHILD, AGED 4, HURT

Sarah Jane Millet Injured When
Struck By Ice Truck

Sarah Jane Millet, age 4, of 24 S. 16th street, received serious injuries yesterday at noon when she was struck by a City Ice company truck driven by Roy Burgess, of 542 Water street. At a late hour last night she was reported as resting well, at the Willamette Sanitarium where she was taken following the accident. No bones were broken, according to hospital officials, but the extent of other injuries had not yet been determined.

According to the report made to the police by Burgess, the child ran out into the street in front of her home, coming from behind a truck, and he did not see her until she was directly in front of him.

CLOUDBURST HITS RENO

Many Thousands of Dollars Dam-
age Done by Hurling Water

RENO, Nev., June 11.—(AP)—A cloudburst tonight sent a hurtling wall of water sweeping through Steamboat canyon, south of here, and caused thousands of dollars in property damage. Many head of cattle were reported drowned.

RUPTURE EXPERTS

For Men, Women
And Children

COMING TO
SALEM

Representing
Wm. S. Rice, Inc.
of ADAMS, N. Y.

The Rice Rupture Method Experts, personal representatives of William S. Rice, Adams, N. Y., will be at the Marion Hotel, Salem, Ore., Wednesday and Thursday, June 15 and 16. Every ruptured man, woman and child should take advantage of this great opportunity.

The Rice Method for Rupture is known the world over. You can now see this Method demonstrated and have a Rice Appliance fitted to you. Absolutely no charge unless you are satisfied to keep the Outfit after having the Appliance adjusted and you see how perfectly and comfortably it holds. No harsh, deep-pressing springs; nothing to gouge the flesh and make you sore. Can be worn night and day with positive comfort. Soft, rubber-like composition pad, any degree of pressure required.

Don't wear a truss all your life when thousands have reported cures through using the Rice Method. Why suffer the burden of rupture if there is a chance to be free from truss-wearing forever? Anyway, it will cost you nothing to come in and learn all about the Rice Method and the wonderful opportunity for help and cure it offers in your case. Remember these Experts will be here only two days, then your opportunity will be gone. Just ask at the hotel desk for the Rice Experts and they will do the rest. Call any time from 9 to 12 a. m., 2 to 5 p. m., or 7 to 9 evenings. Women and young children receive personal attention of Lady Expert in separate apartments.

Don't miss this great opportunity to see these Experts on HERNIA. If for any reason you cannot call write for FREE TRIAL to Wm. S. Rice, Inc., Box 178, Adams, N. Y.

3100 GUARDSMEN READY TO TRAIN

TROOPS WILL START FOR
CAMP CLATSOP TUESDAY

All Preparations Completed, Re-
ports Brigadier General
George White

Thirty-one hundred National Guardsmen from 20 Oregon counties are ready to take the field early in the week for 15 days of intensive training and maneuvers at Camp Clatsop, the new federal training camp on the Pacific coast, and Fort Stevens at the mouth of the Columbia river.

Final details for the movement and training activities were completed today by Brigadier General George A. White, who in his capacity as commander of the 82nd brigade, will command all the troops at the federal camps. The troops will begin moving Tuesday night when companies from distant points will start for Portland. The entire force will converge on Portland early Wednesday morning and proceed to the coast in eight special passenger trains.

Tabulated reports of preparation and attendance at General White's headquarters here show that the total attendance will exceed the 3000 mark, the whole strength being ready for camp. All members of the Guard who found business and other interference with camp attendance, were transferred to the inactive list during May and no further excuses are being granted. Provost Guards will round up any stragglers that develop when the movement begins and escort them to camp. The attendance will exceed all previous camp training records by several hundred men, it was estimated.

Federal funds covering the entire cost of the camps have been received at headquarters from the war department, the government footing the bill which will exceed \$250,000, when the cost of railroad transportation, camp construction and the pay and rations of the men, ammunition and equipment are added in. In return for this outlay, the Guard training schedules have been worked out to give the government value received in training, it was pointed out. Field training will be taken up at 6 o'clock every morning and will continue through the day. Recreation will be confined to evenings and week ends.

Troops that will participate in the training include the 162nd infantry and 186th infantry regiments which make up the 82nd infantry brigade, and brigade attached units consisting of Battery A, 218th Field Artillery, Company A, 116th Engineers and Hospital Company 167. These units, with

a strength of 2750 men go to Camp Clatsop. The force at Fort Stevens will be the 249th coast artillery with a strength of 275 men. Machine gun and rifle companies from the Seventh Infantry will be at the new Clatsop camp. Advance detachments will begin moving tomorrow night when 100 men will go ahead to prepare the two camps for the main command. They will arrive at Fort Stevens and Camp Clatsop early Monday morning.

The train schedules have been worked out so that the entire force will be in camp by noon Wednesday. The afternoon will be devoted to organization, the only training being formal guard mount at Clatsop and Fort Stevens. Active training will begin Thursday morning.

There is much enthusiasm among the citizen soldiers at the coast camp, it was said at headquarters. It will be the first large camp ever held on the Oregon coast, which may develop into a permanent training area for Oregon troops if all training conditions turn out to be favorable. The basic camp development was completed during the past week with this in view, 37 company kitchens and other buildings having been constructed at a cost to the government of \$47,000. If the camp becomes permanent an additional \$100,000 will be spent on buildings to make a model camp.

Oregon cities that will send companies are: Baker, La Grande, Union, Pendleton, The Dalles, Gresham, Portland, St. Helens, Astoria, Tillamook, Marshfield, Ashland, Medford, Grants Pass, Roseburg, Cottage Grove, Eugene, Springfield, Albany, Lebanon, Silverton, Salem, Woodburn, Corvallis, Dallas, McMinnville, Forest Grove and Oregon City.

Spanish Queen Adopts Modest Church Dresses

PARIS.—(AP)—Church dresses which Worth, famous Paris dressmaker, has designed for the Queen of Spain and the ladies of her court, and which will be worn soon in Spain, fulfill all of the Pope's demands for modesty.

They reach to the ankles, have long sleeves and the collars are not lower than the base of the neck. Gray, beige and black are the colors usually chosen for them.

The Queen of Spain was the first one to order a church dress and other models have been made along the general lines of Her Majesty's.

Worth has been couturier to the Queen of Spain for many years. He was dressmaker to the Empress Eugenie, during her lifetime, and it is said that the Queen of Spain accorded him her patronage by the request of the Empress.

CHANGES MADE IN LAW SCHOOL ORGANIZATION

(Continued from page 1.)

honor courses, and the success of the senior oral examination plan after a year's trial were noted in the reports.

The improvement of the campus was left in the hands of the executive committee of the university. Further work on the lawns, and building repairs were recommended.

Service Continued

The present appropriation for the library was increased, and Margaret Johnson was elected to full time work as assistant librarian. Miss Johnson has been assisting part-time in the library for the past two years.

Dr. C. A. Downs, head of the university health service for the past two years, since it was inaugurated, will continue in that position and will establish regular office hours on the campus for the service of the students.

Trustees Elected

Re-election of 24 trustees whose terms expired this year followed the reception of reports. No new members were elected at this time. Those re-elected were E. T. Barnes, Salem, J. H. Booth, Roseburg; Roy Booth, Eugene; E.

NO "COLD" VACCINE

MANCHESTER, England.—(AP)—A cold in the head is still a cold in the head at the Manchester University, where for

seven months experiments have been going on to determine the value of vaccination. Two hundred and eighty-six persons took part in the test.

The conclusion that vaccination against colds has no preventive value was suggested by the results of an experiment carried on by Dr. A. F. C. Davey, Dr. F. R. Ferguson and Dr. W. W. C. Topley.
