Ye, that love the Lord, hate evil: He preserveth the souls of His saints; He delivereth them out of the hand of the wicked. Psalm

#### WATER FOR STILL WATER

There is plenty of water for still water in the Willamette, as has during the low water period been shown the past

For the Salem Navigation company has been able to keep its steamer, the Northwestern, making trips the whole season, drawing a barge, and it is the first time this has been accomplished in many years.

The last trip of the boat and barge up the river, arriving Sunday, more than two hundred tons of freight were carried from Portland to Salem.

All that is needed is the straightening of the channel. and the confining of the water in one channel at all of the points where such work is essential.

And the making of this work permanent. Not merely might call negative meanness. He Hermoine marries and leaves us." I'm sorry I asked you to have ber of the city hall of Salem, Orethe dredging out of the channel in the summer, which has been the practice up to this year, but the building of permanent wing dams, and, if found necessary, the construc- faithfulness and promises to won't have Orestes." tion of dams and locks, to give permanent still water. which, the writer understands, is to be the practice and policy of the United States engineers.

#### NOT TARIFF ENOUGH

The Portland Journal of last evening devotes a leading editorial to a condemnation of the present tariff law-

Especially on account of the high cost of ship building in this country; claiming that it costs 40 per cent more spared this early cruelty." to build a merchant ship in America than it does in Germany. England, the Scandinavian dountries or Italy; child can be born without involv- Clytemnestra; I'm sure Hermione claiming that the tariff rates of this country make "every- ing us," said Menelaos, "After- will tell us some day they're althing that goes into the ship cost more than abroad."

This is not true; not as to "everything that goes into the ship." As to salaries and wages, the principal items of cost, yes. This is true because of higher standards of not necessary. This is really the living in this country than those of the countries mentioned, or other countries where many ships are built.

What the United States needs in order to secure more ship building in this country, and to build up an adequate merchant marine, is not a lowering of our tariff rates and such events in a supposedly well- old talk. People like your neigha consequent lowering of American wages and standards of living, but preferential duties in favor of American bottoms.

This was the thing that built up the great American marine during the 61 years up to 1850-

It was the policy of the fathers of our Republic; it was encouragement to vice, no possible Adraste. It's a point of honor.

in the first tariff law passed by them.

no ripple over its attacks upon our tariff rates. The spondent mood, to avoid love al- cable enemy. My family have a members of the party of that paper (the Democratic party) together, and to distrust all gift for hate—though until now in most if not all sections of the country, including the south, are clamoring for the retention of the protective duties, or higher rates, or the inclusion of articles now on the free list-

And the fact is that the protective tariff is the established American policy-

And it is the established policy of Great Britain and Germany and all the other commercial countries of the world

Attacks on the tariff in this country are mostly made with the idea of stirring up blind partizan zeal; a sop to a sentiment that is about as dead now as Julius Caesar, excepting in the breasts of silurians who have not kept up with the trend of events-

Either this, or in the interests of a few international bankers and a coterie of importers of foreign goods who think lower rates or more articles on the free list might help their business.

These latter are no friends of Amrica. They are friends

of no one but their own selfish selves-

· And Americans who are hired or duped by them are little if any better or higher in the scale of manhood.

### TRAVELER'S AND TOURIST'S DOLLAR

A well informed man remarked yesterday upon the new bus lines of the Southern Pacific being established-

Perhaps more than seven round trips in and out of Salem. He said this will mean a number of new families in Salem; the families of the drivers who will be obliged to or will prefer to live in the capital city.

But this is not all by any means. The new buses will make more travel. More people will come into and go out of Salem, and make long or short stops here. This will increase the number of dollars of the traveler and tourist left here-

Nimble dollars: dollars that will pass through many hands and stimulate trade in all times.

The man being quoted predicted that the Southern Pacific buses will make more travel on all other bus lines in and out of Salem-

Will standardize that kind of travel, and popularize it,

People will come to Salem to attend our splendid theaters, to see our first skyscraper, to visit our state institutions. Thus Salem is becoming a transportation center. That

means a constant increase of the nimble dollar of the traveler and tourist. It means a greater and greater Salem.

# OF HELEN OF TROY

can't have him at present."

"I'll do that" asid Menelaos. never wanted him and it's not too late if the messenger hurries. There's another thing, Helen. I hear that one of your girls in domestics. I wish Achilles could the house has been misbehaving." "None of them, so far as I

know," said Helen. "Yes, what's her name-Adraste—is in trouble."

'If you call it misbehaving," have to put her out!" said Helen. Trouble is the more accurate word. A very respectable young man in the neighborhood has been making love to her."

"Damastor isn't it? You told while ago.
