YOUNG WOMAN POISONED

Murder Charge to Be Filed Against Mary Atkinson, Nurse

ENID, Okla., Sept. 14—(AP)—Finding of poison in the viscera of Mary Jane Bailey, 18-year-old daughter of the Rev. Charles Bailey, Episcopal rector, who died under mysterious circumstances a week ago, was reported tonight by Dr. W. H. Bailey, Oklahoma City pathologist.

Mary Atkinson, a nurse who attended Mary Jane and four other members of the family when they became ill several weeks ago, is in jail here. She was alleged to have professed her love for the pastor.

On his way to Portland from Seattle he flew east after leaving Centralia and went as far as Cascade Locks on the Columbia, coming down the gorge, He made this detour because he had some extra time before his scheduled arrival at Portland.

MID-WEST HIT BY HEAT WAVE DOZEN KILLED

Seven Fatalities Reported in Chicago With Temperature of 95

SOME RECORDS BROKEN

Hottest Day of Year at Kankakee, Illinois With Mercury Rising to 95 Degrees; Crops Benefited

CHICAGO, Sept. 14—(AP)—A heavy blanket of torrid air continued to envelope the midwest today, driving the mercury to record heights and resulting in suffering, prostrations and deaths.

Chicago, with a temperature of 95 degrees, led the list with seven heat fatalities. St. Louis reported four. The total deaths throughout the country was estimated at more than a dozen. Kankakee, Ill., reported 95 degrees, the hottest day of the year there.

Record Approached

The high mark here equaled that of yesterday and was within one degree of the record for the summer, being the highest ever set in September. While city dwellers suffered, farmers were elated over the opportunity for crops to mature.

The schools in Cincinnati were closed when the thermometer registered 95 degrees and in Chicago

afternoon classes in portable school buildings were discontinued. Decatur, Ill., announced schools would close at noon each day until the heat spell was broken.

Western Canada experienced a wave of freak weather, southern Manitoba sweltering with heat while snow fell lightly in northern Alberta. Saskatchewan had a taste of both extremes. The western prairies were drenched with rain. At Edmonton the mercury sank to 34 while at Winnipeg it was 89, and at Emerson, Man., 92.

Above 90 Degrees

Temperatures continued in the 90's in Kansas, Missouri, Oklahoma and parts of Texas, one prostration being reported at Kansas City, in addition to two deaths yesterday.

At least one more day of the belated heat wave, which settled over the country in mid-summer fashion, yesterday was promised.

The greater part of the country to the Atlantic is in the path of the torrid wave, the exceptions being certain lake regions and New York and New Jersey.

Iowa reported the most rapid progress ever made by corn during September in that state as a result of the ninety degree heat.

New Pharmacy Opened On South Commercial

Clifford O. Daus has opened a new pharmacy at 1069 South Commercial street, which will be equipped with a soda fountain and other accessories in addition to a complete line of drugs. The establishment will be called the South Salem Pharmacy. Mr. Daus grew up in this city, and his parents still live here. He graduated five years ago from Oregon Agricultural college, and since that time has been located at Marshfield.

HAWLEY PREDICTS MORE JUST TAXES

Lifting of Unequal and Unjust Burdens Will Improve Business

Congressman W. C. Hawley talked to the Salem Rotarians at their noonday luncheon yesterday. In about 30 minutes, he outlined the financial condition of the United States government and the probable changes in revenue measures as no other man living could do in that length of time. This is true, because Mr. Hawley is ranking member of the ways and means committee, the "committee of committees," the greatest of all committees of congress, because it has in hand the fiscal policies of the country, and every bill making an appropriation or raising revenues must originate with that committee, or pass muster before it. The ranking member is the working member.

Some Predictions

Mr. Hawley predicted that congress will this winter lop off about \$400,000,000 of government revenues, as not needed. He said the reductions will probably include taxes on automobile manufacturers, real-estate transfers, and may be inheritance taxes. The latter, by right, he said, come within the province of the states, and are proper there. He said one of the great committees of congress is working on a general revision of the revenue raising laws of the government, with the hope that this may be carried down through the states, in order to raise the burdens of real property, which now bear an

unjust proportion; which in half of their whole tax burdens must pay from capital. That is, they must pay from other income sources, or from sales, or from borrowings.

He also predicted a relief on corporation taxes, in which there are unequal and unjust burdens, hampering the business of the country. He said that every tax reduction so far made has resulted in larger revenues, coming from larger profits from increased business resulting from the lifting of the burdens.

COURT DEFINES RIGHTS OF ILLEGITIMATE CHILD

(Continued from page 1)

means of a marriage ceremony either before or after the birth of the plaintiff? The jury found that Mrs. Wadsworth was the daughter of Mr. Brigham, but that Mr. Brigham and the girl's mother had not been legally married. Judge Maxwell set aside the findings of the jury and entered an order that Mr. Brigham, at the time of his death and prior thereto, was unmarried, and that he and Mrs. Liddy had not lived together for a period of one year. The court also found that Mrs. Wadsworth was not the issue of any such relation.

Mrs. Wadsworth then appealed the case to the state supreme court for final determination. Testimony was offered by the plaintiff to show that she had attended school under the name of Mercedes Brigham, and never went by any other name until her marriage. "The general conduct of the deceased towards the plaintiff," read the supreme court opinion, "indicates all the usual affection of a father for his daughter. He called himself 'papa,' made her presents and conducted himself during her tender years as a father would toward a beloved child. We attach great weight to the

verdict of the jury in this case. It is true it is in its nature perhaps only advisory and not conclusive, but it is also treated with great consideration by the courts.

"We do not question the learned judge's capacity to pass upon the law, or the capacity of any judge to pass upon the law, but usually in cases of this kind the average intelligent citizen is as capable of passing upon the facts as the average intelligent judge. Ten jury men called upon to determine the pure question of fact have found such facts as entitled plaintiff in this case to a decree in her favor.

"Taking the whole testimony into consideration and further taking into consideration the fact that ten good citizens have found the facts in favor of plaintiff, we are of the opinion that this case should be reversed and plaintiff granted the relief prayed for in her petition."

STEINBOCK PROPERTY DESTROYED, LOSS HEAVY

(Continued from page 1)

while after the flames broke out. He declared that it probably will not be known how the fire started. "It was fortunate that there was no wind," said Mr. Dancy. "If there had been, it would have been difficult to prevent the blaze from spreading throughout the entire section." Large numbers of people in more or less scanty attire were attracted to the fire. Desperate fighting on the part of the city firemen and volunteers saved several adjoining buildings, in almost miraculous fashion. Volunteers carried all of the House hold goods from the rooming house conducted by Mrs. A. B. Seely, across the alley to the

east from the doomed building; but this house was little more than scorched.

The house of Roy Watson, north of the bargain house, was badly scorched, the roof catching fire at one time. Telephone poles were burned on two sides of the building, and the wires were broken.

About two carloads of rubber were said to have been stored at the rear of the building. The flames raised an odor which could be detected for blocks around.

Picture Day for Football Players at State College

CORVALLIS, Sept. 14—(AP)—Football uniforms were issued today to all returned aspirants for the Oregon Agricultural squad which begins practice tomorrow. Outfits two and two tenths of a pound lighter than those used last year were given the men who donned them at once and paraded before cameras. This was design-
