

NORMAL WILL OPEN ON MONDAY SEPT. 26

Entrance Examination Given Preceding Saturday; Rooms Crowded

OREGON NORMAL SCHOOL, Monmouth, Sept. 17.—(Special)—Date of the opening of the fall term of the Oregon Normal School at Monmouth has been set at September 26, according to the fall schedule. Applications and credentials for admittance have been received from more than 400 students through the office of the registrar, and taking into consideration the large number of freshmen which usually bring their credentials on opening day the enrollment promised to reach the thousand mark as it did last fall. Entrance examinations will be given on Saturday the 24th, which will require students to arrive at the campus during the week-end preceding actual registration on Monday.

By order of the board of regents the faculty members living in the women's faculty house on the normal campus have been asked to find other quarters and the house has been slightly remodeled to accommodate the music department. Due to the crowded conditions and lack of classrooms in the administration building the music department has been housed in the training school in the past, but it became necessary to have the entire building free for the use of the grammar grades and the junior high school students. The enrollment of the training school has increased with the growth of the town and the building put up by the state in 1916 as a training center is now barely adequate for the number of children in the district.

Another measure was resorted to in order to accommodate the large classes in the physical education department and an arrangement has been entered into between President Landers and the official board of the Baptist church which allows the normal to rent the basement and other rooms in the community house.

Instructors engaged for the coming school year of 1927-28 are as follows:

Under the department known as The Arts the various classes in art will be handled by Alabama Brenton, Anne Bell, Pearl Heath and Katherine Peterson; music will be taught by Louise Woodruff, Sylvia Osborn, Grace Mitchell and Kathleen Wrenn; home economics by Jean McCloy and Kitty Walker; commerce by Mer-

tha Hall and J. P. Santee. The department of education will be in the hands of A. S. Jensen and Merl E. Bonney. The English department faculty roll consists of Edna Mingus, Edna Culver, Beulah Thornton and Florence Johnson.

President J. S. Landers, as head of the science department, will teach the fundamentals of science. Other instructors in this department include: A. C. Stranbrough, H. M. Stiles, T. L. Meador and Homer Dadds.

Social science instructors are O. C. Christensen, J. F. Santee and Dean J. B. V. Butler. Health education faculty members include Laura Taylor, Margaret Myline and Mildred Crain.

The training department will be handled by a corps of instructors in methods and critic teachers under the supervision of Thos. H. Gentle, director of training schools.

Collects And Sells Cactus
EL PASO, Texas.—During the latter part of the summer H. L. Potter, a florist here, makes trips into the highways and byways of west Texas to collect cactus, which he sells to collectors all over the country. There are 1,500 varieties of the cactus and Potter is an expert in distinguishing them

EQUIPMENT PUT IN

NEW TYPE MACHINE INSTALLED BY DR. M. F. LEWIS

"Nothing else in Physio-Therapy is producing such satisfactory results as is the Duplex Major Universal Deep Therapy Lamp" says Doctor M. F. Lewis, local Naturopath, who has installed over two thousand dollars worth of new and modern electrical equipment in his offices in the Bligh Building on the corner of State and South High Streets.

"The Infra-Red Rays, of this new and valuable light, yield 85 percent of the curative, vitalizing power of the sun. In this one lamp you have the advantages of both Infra-Red and Radiant Light. The Infra-Red Rays, produced in the richest quantities obtainable are absorbed 100% by the human skin and are very beneficial. The curative effects of light therapy are so basic and sure that it is effective in treating the widest range of cases," says Dr. Lewis.

"It offers what is probably the best known method of relieving pain and congestion. It is powerful in increasing the hemoglobin carrying power of the blood, in

stimulating the activity of both red and white cells and in aiding metabolism. Briefly stated, it sedates pain, stimulates the capillary system, sterilizes infections, regenerates, through effecting changes in the blood, eliminates, through activation of the lymphatics and exudates pus. These Infra-Red Rays penetrate flesh from 4 to 6 inches where they are converted into molecular, kinetic energy or heat. This ability to reach and affect deep tissues explains the curative results of these rays in early appendicitis, and other deep seated disorders.

PRUNE SEASON ON

ROSEDALE, Sept. 17.—(Special)—The prune season has started here, but early indications are that the crop will be one of the lightest in years.

Mrs. D. T. Trick, who has been ill for several months, has returned to her home.

The Rosedale public school is scheduled to open for regular fall classroom work on Monday.

That vacation of Iowa farm women will be successful until one of them begins to wonder if her husband emptied the pan under the ice chest.—Indianapolis News.

HIGHWAY DEDICATED

ROAD BEASIDE TO NEWPORT OFFICIALLY OPENED

NEWPORT, Ore., Sept. 17.—(AP)—Roosevelt highway, from Seaside to Newport, was officially opened with a ceremony today dedicating the Ben F. Johns memorial bridge across Rocky Creek, eleven miles north of Newport.

Judge C. W. James presided and addresses were made by Dr. W. C. Belt, General U. G. McAlexander, "Rock of the Marne," Senator Charles Hall, of Coos county, Congressman W. C. Hawley, Chairman Vanduzer, of the state highway commission, and Senator Norblad, of Astoria.

Edgar Piper, editor of the Portland Oregonian, official representative of Governor I. L. Patterson, dedicated the bridge officially, and declared the highway open. Julia Jones, little granddaughter of the late Ben F. Jones, cut the ribbon opening the bridge.

More than a thousand persons, representatives of civic clubs of various cities along the new highway, delegations from chambers of commerce, public officials and tourists attracted by the gathering, assembled to hear the dedicatory speeches and to listen to the eulogies to the memory of the late Ben F. Jones, in whose honor the Rocky Creek bridge was named.

While, theoretically, the road had not until now been opened, the highway has been in use since early summer. The stretch from the new draw bridge over the St. Letz river to Otter Crest had not been rocked last winter and during wet months was impassible. With the coming of summer, highway forces were put to work with scrapers, and the badly rutted dirt grade was put into shape.

METHODISM HERE SHOWS PROGRESS, SAYS REPORT

(Continued from page 1.)
of the church. One Ladies' Aid society in a church with a membership of 450 raised an average of

\$120 per month for the past twelve months.

All the pastors in the district have given loyal and efficient service, according to the superintendent, and a request is made in the report for the return of all of them to the district when the appointments are made at the coming conference.

Seven Feet Six
CHESTER, S. C.—A copy of the Chester Reporter of June 7, 1877,

describes one Miles Darden, native North Carolinian, who was seven feet, six inches high and weighed 1,000 pounds at the time of his death. When he was 31 years old, the paper says, his coat could be buttoned around three men, each weighing 200 pounds.

Henry Ford, world's foremost man, says he is eager to get back to work. Come to think of it, work seems to be a habit with most men who have won unusual success.—Boston Transcript.

Dr. Dougherty

Dr. Dougherty had so many applications to examine the eyes of children during the last week that she could not take care of them all, and for this reason, we have decided to extend the time in which Dr. Dougherty will examine the eyes of any child without cost or obligation for at least another week. Please call 239 and make appointment to have your child's eyes examined.

Dr. Dougherty, as we said before, has had six years training in the care of the eyes and two years of special training on the eyes of children under the best instructors on the coast.

We take pleasure in introducing and recommending her.

SOLD ONLY AT GIESE-POWERS

Look On The Inside of the Bridge-Beach Superior Circulator

It is built like a furnace—a stove within a stove
Will heat three or four adjoining rooms

The cold air enters at the bottom, is heated and humidified between the fire-pot and the outer casing—and passes out through the top, CIRCULATING the warm, moist, healthful air to the most distant corners of the adjoining rooms. Has wonderful heating capacity—will heat three or four rooms comfortably in the coldest weather—takes the place of several stoves and requires no more fuel than an ordinary heater. The price is less than you would expect for a heating stove of such outstanding superiority. Shown in various finishes—the mahogany enameled finish is especially popular.

\$5.00 Down Delivers Your Circulator. Balance Small Weekly or Monthly Payments.
