October 20, 1927 Give not that which is holy unto the dogs, neither cast ye your pearls before swine, lest they trample them under their feet, and turn again and rend you. Matthew 7:6.

ON THE UP GRADE AGAIN

Salem is on the up grade again, in her dairying industry. This industry has been on the up grade for a dozen years or more in the Salem district.

Though there was not much more than time marking for about two years, partly owing to the large demand from California and other sections for our cows.

But we do not get enough milk and cream. Not half enough. Not a tithe of the amount that ought to be coming to the factories here and that may be had here, when the supply shall be sufficient for their uses. There is a struggle now among the users we have, for the meager supply that is available.

We must get irrigation. Major developments. We will get them. They are in the offing. These will bring beet sugar factories.

And these will bring dairy cows. Ten where we have one now. And finally ten times ten.

And then we can have condensing factories here, and more creameries and larger ones, and many more cheese factories, and factories using the by-products, like dry milk factories, one of which has started business here already. And milk sugar factories, and milk chocolate factories.

And many kinds of specialty factories, using milk and cream.

Without question, we have potentially the greatest dairying district in the world; and it will be the greatest in good time.

WORLD'S GREATEST DAIRYING DISTRICT

It is not too much to say that the Salem district, and its extension to the whole Willamette valley, is potentially the greatest dairying country in the world.

For the greatest dairymen in the world.

And this has been proven over and over again, in the annual dairy Slogan numbers of The Statesman. Among the outstanding facts in proof of this statement one is all but conclusive, and that is the fact that a pound of butterfat can be produced in the Willamette valley for as much as (perhaps a good deal more than) seven cents a pound below the cost in the great dairying districts east of the Rockies.

Hammer that fact home in those districts, and there would be brought about here a boom in dairying. Forehanded dairymen would flock here. Especially so, when it is also true that our markets are on the average higher than those of the east for dairy products.

When we can add the beet sugar industry, as we must and will add it, all over this valley, we will have still better dairying conditions.

We will have the tops and the pulp and the molasses for dairy feed; the tops worth \$20 an acre when fed to good dairy cows, and the pulp made available the year through, by drying. The tops may be used in silos, too.

What we need, more than any other one thing, in our dairy development, is a great advertising campaign giving a true picture of what we have to offer to first class men in this industry.

And this will be a much easier campaign to put on and put over with the development of our coming beet sugar industry. It will check and consolidate our outstanding advantages for high class dairymen.

E. L. THOMPSON'S DAIRY

(Portland News)

At a time when the pure milk campaign was being carried on to protect the lives of babies in Portland, Edward L. Thompson, then a Portland banker, established one of the first certified dairies in Oregon.

The dairy was located at Deer Island. It furnished a model for the state. Its cleanliness, with resultant purity of milk, was an answer to the prevalent notion that dairies could not be spotless. The health of babies who were given pure milk referred for all time the statement made by an official of the hour that the dirtiest dregs in the milk can make the healthiest children and that milk from tuberculous cows would kill pigs but fatten babies.

The example helped establish for Portland the highest standard of milk supply in any city. It is a standard still maintained. In exact proportion Portland has become one of the safest places in the world for a baby to be born and the infant mortality is the lowest.

After an intense life, Mr. Thompson has passed on. But this good which he did when it was most needed will maintain the memory of his good citizenship.

It is a good idea to think of putting the proposed city incinerator with the sewer disposal and converting plant that Salem must have in the near future. That would mean some where down the river, in order to have a gravity flow for the sewage.

Our best bet is more irrigation, because this will bring in its train developments that will transform the whole valley into a green pasture and garden and orchard and fruitful beet sugar factories to work up the raw products.

Coolidge Accepts Statue Of Famed Union General

WASHINGTON, Oct. 19.—(AP)—A statue of Major General George Gordon Meade, commander of the Union forces at the battle of Gettysburg, was accepted from Pennsylvania today by President Coolidge, who braved a cold and rainy day to honor the civil war commander.

Although partly shielded from the elements by a canvas canopy, the president laid aside his hat and overcoat when he read his speech accepting the memorial in behalf of the nation and waited afterwards in the increasingly chilly weather until the lengthy program was over.

During the ceremonies, H. H. Spayd, past commander of the Pennsylvania G. A. R., became exhausted during the recital of his experiences with General Meade, and, although he seemed about to collapse in front of Mr. Coolidge, doggedly kept on.

Colonel Blanton Winship, aide to the president, finally induced him to sit down and Major James F. Coupal, the White House physician, went to his aid. He soon revived.

Accepting the memorial of General Meade the president paid the Union commander a high tribute, describing him as a "responsible and reliable commander, whom none surpassed in courage."

SELECT STANFORD SQUAD FOR GAME

STANFORD UNIVERSITY, Oct. 19.—(AP)—Coach Pop Warner today announced that 30 members of his squad will make the trip to Portland where Stanford meets the Oregon Aggies on Saturday.

The squad follows: Captains Hal McCreery, Louis Vincent, Johnny Preston, Ronald Sellman, Seraphim Fost, Lloyd Macabee, Don Robinsky, Chris Freeman, Hodze Davidson, Spud Lewis, Frank Whiton, Don Hill, Cliff Hoffman, Lyle Everett, Casey Kazanjian, Alex Cook, Vivian Morley, John Gifford, Mush Miller, Mike Murphy, Dick Hyland, Bob Sims, Herb Flisbacker, Ted Klatsen, Hencke, Billy Smelling, Dick Worsden, Sherman Gray, Lad Frentrup, and Ernie Patchett.

Bits For Breakfast

Great is the cow. The wet nurse of the human race. The giver of the food that makes bones and brains and muscles and vitality; the most perfect of all foods; the food that makes a balanced ration of any other combination. The milk of the cow is used in making hundreds of commercial articles. Dried milk alone goes into 100 or more. Let us build up great and small dairies on every farm, and there will be developed in Salem the world's greatest dairying center, factories enough to keep the population busy of a city much larger than Salem is now. If we could get fully across to the dairymen of the east the advantages of dairying in the Willamette valley, there would be a boom in the industry here that would beat any mining or oil boom; because it would never pinch out or be exhausted. It would renew itself every year, and every month in the year, from our soil and sunshine and showers, as long as grass grows and water runs. Read the article about the sugar beet returns for one Colorado county. This could be duplicated in the Willamette valley, and then quadrupled, in any county between the Cascades and the Coast Range.

SUICIDE AT BRIDGE 21ST

Unidentified Individual Jumps To Death at Pasadena

PASADENA, Cal., Oct. 19.—(AP)—An unidentified man leaped to his death from the tower of the Colorado street bridge today, making the twenty-first person to seek suicide at the bottom of Arroyo Seco. He was about 50 years of age, well dressed and apparently had been in ill health.

PASSENGER CARS CRASH

Train Hits Washout in Pennsylvania and Leaves Track

TOWANDA, Pa., Oct. 19.—(AP)—Lackawanna passenger train No. 23 struck a washout about 3 miles east of Elstead tonight, and the engine and four cars crashed down a bank.

Engineer Esterbrook of Scranton and his fireman, whose name was not learned, were killed and the mail clerk and baggage clerk were seriously injured.

Chicago Wrestler Throws

Casey O'Dale at Portland

PORTLAND, Oct. 19.—(AP)—Mike Romano, Chicago grappler, took two out of three falls from Casey O'Dale of Cedar Rapids, Iowa, in the main event of the first wrestling match of the season here tonight. They are 200 pounds.

O'Dale won the first fall in 10 minutes; 48 seconds. Romano took the second in 16 minutes, 56 seconds, when he raised O'Dale from the mat and pitched him down on his head. O'Dale was fazed and Romano took the third fall in fifty seconds.

MEDFORD CASE PUT IN PORTLAND COURT

Trial for Manslaughter Will Be Held Before Federal Authorities

PORTLAND, Oct. 19.—(AP)—George Neuner, United States district attorney, today received authorization from United States Attorney General Sargent to petition the federal court here for an order transferring the manslaughter case against Terry Talent, federal prohibition agent, to this court from Jackson county.

Talent is under indictment in Jackson county for manslaughter in connection with the death of Manfred Zimmerman, reputed Jackson county moonshiner, who was shot during an attempt at arrest on September 28. According to the report on the case an "undercover" agent negotiated with Zimmerman to purchase two gallons of moonshine whiskey from him.

With Talent, two state prohibition officers and a deputy sheriff, the undercover agent went to Zimmerman's place 20 miles east of Medford and as Zimmerman delivered the liquor to the automobile in which Talent was stationed, the federal officer informed him he was under arrest and drew his revolver.

Zimmerman is alleged to have grappled for the gun after flashing a light in Talent's face. Unable to obtain possession of the gun, he broke and ran and Talent fired three shots at him. At a crossroad, where Claude L. Hicks, state prohibition agent, was stationed, several shots were fired at the fleeing man by this agent.

The wounded man swam the Rogue river and made good his getaway, but was picked up the next morning. He died two days after the shooting and Talent was indicted for involuntary manslaughter on October 8.

The authorization for defense of Talent by the federal attorney and request for transfer to the federal court was contingent upon decision of Mr. Neuner that Talent was acting in his official capacity as a government agent when the shooting took place. Neuner declared there was no question at this point and declared that he will be considered as Talent would be given a fair and impartial trial in Jackson county, public sentiment there was such that it would be more equitable to all concerned to have the case taken over by the federal court.

HEAVY LOADS TABOO SAYS HIGHWAY BODY

State Commission Acts To Cut Down Weight Permitted Over Roads

PORTLAND, Oct. 19.—(AP)—Maximum loads on macadam highways west of the Cascades were reduced here today at a meeting of the state highway commission. The order is immediately effective and will hold until April 15, 1928. The order limits loads to 16,500 pounds, on solid rubber tires with a tire width not less than 30 inches.

Among the highways affected by the order are: Columbia highway, between Multnomah county line and west city limits of Hood River.

Coos Bay-Roosevelt highway, between Coquille and Pacific highway junction.

Corvallis-Newport highway, between Corvallis and Toledo.

McKenzie highway, between Springfield and Blue River.

McMinnville-Tillamook highway between Hebo and junction with west side highway, excluding portions within corporate limits of Willamina and Sheridan.

Coast highway, between Seaside and Newport, excluding corporate limits of Wheeler, Bay City and Tillamook.

Santiam highway, between Albany and Lebanon.

Coast highway, between Coquille and California line.

A request to the commission to keep the McKenzie Pass open by using rotary plows was placed on file. Engineer Klein contended that human life is a matter to consider and suggested that shelter stations should be placed every two or three miles, on the 25-mile stretch which is exposed. Tourists using the route, and wearing insufficient clothing, are likely to perish because of sudden storms unless some such shelter is provided, argued the engineer.

Commissioner Sawyer contended that breaking up the snow in April on the McKenzie will be less expensive than waiting until June, for in April there will be merely snow, while in June the snow will have turned to ice, more difficult to remove.

SALEMITE SELECTED

HERBERT SOCLOFSKY ON U. OF O. 'CHEST' GROUP

UNIVERSITY OF OREGON, Eugene, Oct. 19.—(Special)—Herbert Soclofsky, of Salem, has been put on the committee assisting Roland Davis, of Portland, who will head the "community chest" plan for raising funds for all University of Oregon organizations participating in the annual drive. It is announced by Don Beatty, student body president.

Others assisting Davis will be Marion Barnes, Tacoma; Marion Leach, Caldwell; and Art Anderson, of Portland. The Red Cross, Y. W. C. A., Y. M. C. A., and other organizations will participate in the drive.

ALBANY FARMER KILLED

Crash With S. P. Train Fatal to W. H. Austin, Aged 43

ALBANY, Ore., Oct. 19.—(AP)—W. H. Austin, 43, a farmer residing near here, was fatally injured late today when his automobile was struck by a Southern Pacific train at North Albany station. The automobile was completely demolished. Austin died a few hours after the accident. Authorities were tonight trying to locate relatives at Williston, North Dakota. Austin had no known relatives here.

ALTER RADIO DATE

SALEM GIRL TO SING OVER KEX FRIDAY EVENING

The weekly farm radio program of station KEX will hereafter be broadcast on Friday evenings instead of Thursday, and from 7 to 8. Herman Lafky, director of agriculture in the Canby Union High school, and former Salem resident, is the director of these farm programs.

Radio Waves Pointed Like Beam of Light--Marconi

WASHINGTON, Oct. 19.—(AP)—The beam system of radio transmission is the basis for all future wireless improvements in the opinion of William Marconi, here as one of Italy's representatives at the international radio conference.

Upon its perfection, he believes, will depend to a large extent the development of such widely different applications as photograph transmission and radio telephony.

Marconi explained today how he had succeeded in restricting radio emanation to a beam diverging from the sending stations at an angle of not more than two or three degrees. The effect of this, which under ordinary circumstances would have been spread in all directions, was concentrated along the beam.

Marconi said the latter had only the advantage of secrecy, but that with the beam system, secrecy is practically absolute in radio since words are transmitted at as high a rate as 500 per minute, requiring complicated and expensive receiving sets. In addition, such messages are subject to reception only at stations in the direct path of the beam.

Since the success of radio, telephony and photography are dependent upon the strength of the incoming signals, Marconi declared he considered his experiments with beam transmission as basic for the improvement of the art.

Asked whether wireless would ever completely replace the cable, Marconi said the latter had only the advantage of secrecy, but that with the beam system, secrecy is practically absolute in radio since words are transmitted at as high a rate as 500 per minute, requiring complicated and expensive receiving sets. In addition, such messages are subject to reception only at stations in the direct path of the beam.

AUNT HET

"Amy tries to be somebody in society, but I don't never see her children that their noses don't need wipin'."

flowed its banks and the inhabitants moved to higher points. The wind and rain also damaged property at Bayama.

Mother Has No Right To Spank Grown Girl

WHITING, Ind., Oct. 19.—(AP)—The legal right of a mother to spank her daughter when she has reached her majority was denied by Judge Sullivan in police court today. Angered over a spanking which her mother, Mrs. Catherine Latzko, gave her, 19-year-old Emma Latzko swore out a warrant and caused her arrest.

Her mother insisted that she still had the legal right to spank her daughter but Judge Sullivan ruled against her, imposing a fine of one dollar and costs on a charge of assault and battery.

Pro basketball team—But he doesn't expect the money to come in dribbles.

Acid Stomach

"Phillips Milk of Magnesia" Better than Soda

Hereafter, instead of soda take a little "Phillips Milk of Magnesia" in water any time for indigestion or sour, acid, gassy stomach, and relief will come instantly.

For fifty years genuine "Phillips Milk of Magnesia" has been prescribed by physicians because it overcomes three times as much acid in the stomach as a saturated solution of bicarbonate of soda, leaving the stomach sweet and free from all gases. It neutralizes acid fermentations in the bowels and gently urges the soothing waste from the system without purging. Besides, it is more pleasant to take than soda. Insist upon "Phillips." Twenty-five cent and fifty-cent bottles, any drug store. "Milk of Magnesia" has been the U. S. Registered Trade Mark of The Charles H. Phillips Chemical Co. and its predecessor Charles H. Phillips since 1875.

American Amendment Meets With No Favor

GENEVA, Oct. 19.—(AP)—The American amendment to the proposed treaty for the removal of restrictions on exports and imports, introduced by Hugh R. Wilson, minister of Switzerland, at an international conference on this subject today found no favor with the meeting of the sub-committee to which it was referred and indications tonight were that American delegates must be content with compromise.

after the latter had tumbled into the roadway at the corner of the Rue Racine and the Boulevard Saint-Michel, where he was slain May 25, 1926.

Fierce Gale Sweeps Thru Section Near Swan Island

HAVANA, Oct. 19.—(AP)—Torrential rains and heavy winds in Oriente and Camaguey provinces were the evidences in Cuba of the cyclonic disturbances off Swan Island. The same conditions prevailed in the north of the island of Jamaica. Floods occurred at various points, the towns of Niquero, Bayama and Santiago suffering severely.

At Niquero 14 families had narrow escapes when their homes were flooded. The low lying districts of Santiago de Cuba were inundated. At the Cuba agricultural farm much damage to crops. The river Sensenerico over-

Torres' demonstration was to show that the bullets fired while the general was down would have taken courses different than those revealed by the autopsy.

The extra force of gendarmes that guarded the courtroom yesterday while Schwartzbard told his dramatic story, again patrolled the corridors to prevent demonstration of racial feelings. Witnesses and lawyers consumed most of the day in flights of oratory and histrionic exhibitions.

Reginald Smith, an English teacher and reputed eye witness of the assassination, acted out what he saw and resorted to Shakespeare to describe the expression on Schwartzbard's face as General Petlura fell.

"He wore an expression of 'exaltation mixed with anguish,'" Smith related.

Another witness lectured for half an hour on psychology.

Torres and his various opponents succeeded each other in long orations. That of the chief counsel on the "program of February, 1919," was a passionate denunciation. He declared that not a single person had been punished for this wholesale murder. Petlura's tolerance, if not his actual participation, was shown by this failure to punish, Torres averred.
