JOSEF HOFMANN WRITES OF HIS STEINWAY

"I consider the Steinway piano absolutely unique in that it combines the production of sound, from the softest pianissimo to the greatest fortissimo, with an extraordinary perfection of action."

Five years and eleven months

To those who wish to know the reason for the supremacy of the Steinway, the bare recital of the truth is absorbingly interesting. All the modern major improvements marking the progress of the piano were originated, and were brought to perfection, in the Steinway workshops. Five years and eleven months of painstaking preparation and workmanship are required to build a Steinway.

Literally scores of the most famous pianists in the musical world not only use the Steinway on the concert stage, but in their homes; subjecting them, day after day and year after year, to the most strenuous practice. Practice so trying that the hardest usage of children and amateurs seems insignificant by comparison.

The piano is the only article of furniture in any living- or drawing-room upon which a manufacturer's name is visible. When the name on the piano is Steinway, what a matter of pride to the owner!

Any new Steinway may be purchased with a small cash deposit, and the balance will be extended over a period of two years. Prices: \$950 and up. Used pianos accepted in partial exchange.
