November 19, 1927

For the Son of man is come to save that which was lost. How think ye? If a man have an hundred sheep, and one of them be gone astray, doth he not leave the ninety and nine, and goeth into the mountains, and seeketh that which is gone astray? And if so be that he find it, verily I say unto you, he rejoiceth more of that sheep, than of the ninety and nine which went not astray. Matthew 18:11, 12, 13.

WHAT SALEM MUST DO

The cities of Pasadena, South Pasadena and Alhambra, Cal., are disposing of their sewage in a way that brings valuable returns.

About 20 years ago Pasadena bought 500 acres of land, on the Valley boulevard, eight miles east of Los Angeles, preparatory to modern sewage disposal. It raised a roar. There were objections; all sorts of delays.

Now, there is being grown on that land a large tonnage each year of navel oranges, walnuts, alfalfa, vegetables, and potatoes, lima beans, and other field crops. The sewage disposal plant takes up 40 acres. There are lawns and flowers and beautiful boulevards. It is a place of beauty. Under modern methods, there is no odor.

Some of the fertilizer is sacked and sold. Sales are increasing—

It is expected in time to make the plant self supporting; and the indirect benefits will be large.

The Statesman will revert to this subject in more detail, soon.

That is what Salem will have to do, eventually; ought to do soon. The plant there cost \$1,000,000.

And, right now, in Salem we should look to the time when we will have a sewage disposal plant in locating the proposed incinerator.

HIGHEST HONOR FOR OLD WILLAMETTE

News was yesterday received of the fact that Willamette university has been accepted on the approved list of the Association of American Universities.

This is the highest honor that could come in the matter of scholarship. There are almost 800 degree granting institutions in the United States, and only about 200 are in this list—

And only three privately endowed schools in the Pacific northwest.

The three are Willamette, Reed and Whitman.

This means that a student of Willamette may carry his or her certificate to other schools and this will be accepted on face value—

And welcome—

With no questions asked. It is like "old wheat in the bin." It is as good as pure gold.

Congratulations to old Willamette! And to her faculty and student body. And to the beautiful city that institution started; around whose hallowed shades that city has grown. And to the friends and alumni around the wide earth.

WILL BE LIKE THAT HERE

The biggest pay day since the sugar industry was established in the Rocky mountain region, in Colorado, Nebraska, Montana and Wyoming was on last Tuesday, the 15th, when last deliveries from the farms were paid for—

To the tune of \$28,000,000. Some money.

And the total thus paid out in that territory this year will be more than \$40,000,000. In addition to this money, which goes direct to the farmers, millions, many millions more go

into circulation in the form of wages to thousands of factory and other employees, and payments for transportation, supplies, and services, etc.

A wonderful thing for that region, in many direct and indirect ways—

And it will be the same in the Willamette valley.

This will come when we get irrigation on a major scale, and perhaps it will start before—

And it will be the biggest single thing that will ever happen to this valley.

The acceptance of Willamette on the approved list of the Association of American Universities will have many happy results. One of them will be the acceptance in full standing of the local branch of the American Association of University Women. So that controversy that has raged will settle itself.

Crowded Statesman this morning, even with 32 large pages. Much good matter crowded out. Salem is certainly growing.

Bits For Breakfast

Willamette feels proud—

And has a right to, with a standing as high as the best, and a history greater than most.

The Salem Y free employment office had in the past week 179 applicants for work, and got jobs for only 58. That tells a story that must give us pause.

But in the five weeks from August 29 to October 1, the Salem office, with only one man in charge, got jobs for 2761 people, and the Portland office with five people got jobs for 3190. A splendid comparative showing, in favor of the Salem office.

The greatest living tenor, Edward Johnson, will be at the Elmsmore next Friday evening. If you wait, you may have to stand. The seats may be all taken in advance.

Oregon is to have a rayon factory. No particulars, for the present. But later. There will be others. The great bulk of the pulp and paper making business of the United States is coming fast to this section, where the timber is.

"I am one of those who believe in the sub-stratum of inherent honesty and in the fine vein of service and kindness in our citizenship," quotes the Portland Telegram from a statement of Herbert Hoover. That belief will make him an ideal president, if our Salem boy reaches that high place. And he may.

"Text-O-Meter" Great

Advance in Hair Work

The Text-O-Meter, long heralded as the greatest advance ever made in modern hair science, is going to the public. Mrs. Emma Kalke Haley care Miller Beauty Shop, 189 N. Liberty street, Salem, Ore., has acquired the distinction of being among the first beauty

shops in the country to have its own Text-O-Meter.

This machine, the invention of Mr. Charles Nessler, originator of the permanent wave, has been widely acclaimed both by the hair waving profession and by the scientific press of this country.

The machine establishes the natural absorbing qualities and elasticity of human hair which is invaluable information to a permanent wave operator. The degree of absorption depends on the porosity of the hair which is so greatly varying that only a scientific device such as the Text-O-Meter can give a correct indication; in other words, the Text-O-Meter determines how much liquid

shades in the country to have its own Text-O-Meter.

Old Folks Say Doctor Caldwell was Right

The basis of treating sickness has not changed since Dr. Caldwell left Medical College in 1875, nor since he placed on the market the laxative prescription he had used in his practice, known to druggists and the public since 1892, as Dr. Caldwell's Syrup Pepsin.

Then, the treatment of constipation, biliousness, headaches, mental depression, indigestion, sour stomach and other indispositions that result from constipation was entirely by means of simple vegetable laxatives, herbs and roots. These are still the basis of Dr. Caldwell's Syrup Pepsin, which is a combination of senna and other mild laxative herbs, with pepsin.

The simpler the remedy for constipation, the safer for the child and for you, and the better for the general health of all. And as you can get results in a mild and safe way by using Dr. Caldwell's Syrup Pepsin, why take chances with strong drugs?

A bottle of Dr. Caldwell's Syrup Pepsin will last a family several months, and all can use it. It is good for the baby because pleasant to the taste, gentle in action, and free from narcotics. In the proper dose, given in the

directions, it is equally effective at all ages. Elderly people will find it especially ideal. All druggists have the generous bottles.

We would be glad to have you prove at our expense how much Dr. Caldwell's Syrup Pepsin can mean to you and yours. Just write "Syrup Pepsin," Mr. Nicolle, Illiac, and we will send you prepaid a FREE SAMPLE BOTTLE.

MAKING THE CITY MORE BEAUTIFUL

The Ben Lomand park at the end of High street, has recently undergone a thorough landscaping. The managers, Fred Lamport and Chas. Cone, have spared no expense to make this park a very attractive one.

Besides many shrubs and evergreens, there have been planted many beautiful trees including our famous Oregon fir, mountain ash, American elm, Linden, honey locust, scarlet maple, sweet gum, weeping willows, and the native yew.

This park is near the McKinley school, and is the happy resting place of school children at the noon hour.

This beautifying of that already beautiful section of Salem adds beautiful still more so, and furnishes an example for other sections.

GIESE-ROWERS

The New Ball Bearing Hamilton-Beach Vacuum Cleaner

New Reduced Price

\$41.00

(Formerly \$62.50)

The Greatest Value in Sweeperdom

This new model has many improvements and refinements. It is lighter in weight and easier to handle. It has a ball-bearing motor that eliminates oiling for all time. The NEW HAMILTON BEACH TRIPLE ACTION VACUUM SWEEPER cleans thoroughly because it combines

Powerful Suction plus Motor-Driven Sweeping Brush with Beating Action

Powerful suction lifts the rug to the nozzle and carries all surface dirt into the dust-proof bag. Any good Vacuum Cleaner will do this.

The motor-driven sweeping brush loosens clinging litter, paper, thread, lint, hair, etc., and the powerful suction whisks it into the bag. Some other cleaners will do this.

The NEW HAMILTON BEACH VACUUM SWEEPER does all this and goes a step further. Having beating brush action it removes deeply imbedded grit and dirt, the principal causes of rug wear.

This New Vacuum Sweeper is light and easy to handle. Because of its design it cleans easily under furniture.

We know of no cleaner that will give all-round satisfaction that this cleaner will give.

The H-B has always stood at the head of the line of good cleaners and now the new machine with the improvements excels its former self. Phone for a demonstration in your home.
