

VALUES OF HEALTH WORK TO BE SHOWN

Proper Appreciation Not Yet General, Says Dr. William De Kleine

Give me a child when it is born and let me, for it— Determine the eating habits and the amount, and type of food; Specify the sleeping conditions and the number of sleeping hours; Control all the outdoor activity; Superintend all personal habits—

And I will increase the span of that child's life fifteen years. He asserts Dr. William De Kleine, new director of the Marine county child health demonstration.

It is surprising how slow people have been to give health education its proper emphasis, says Dr. De Kleine. Money is spent freely for protection from fire; contributed generously for the maintenance of schools; given in plentiful quantities to provide other necessities of existence, but—expended sparingly to bring about improvement in personal habits of proper living.

Live absolutely in the right way, and you need never be ill, asserts the health director. Physicians, too much in the past, have thought in terms of sickness, not in terms of how sickness might be prevented.

The correct this general condition is the purpose of the demonstration on which the Commonwealth fund is spending much money. Correction cannot be begun with adult; it must start with the child.

Bad habits of entire families have been almost wholly changed by the work with children of the demonstration in Fargo, just closed by Dr. De Kleine.

One vegetable merchant reported to the demonstration that his sales of spinach had increased ten-fold. Children go home, tell their parents what they should eat to remain healthy, and soon these articles appear in the diet.

The four consecutive years, school children in Fargo were given health ratings. No reference was made at any time to the ratings given the previous years. At the end of the fourth year, "good" ratings had increased 15 per cent; and "bad" ratings had been reduced from seven per cent to a negligible number.

"When this demonstration is closed," says Dr. De Kleine, "it shall be my purpose to show the people of Salem and Marion county the advantages of spending a reasonable amount in the interests of public health.

"The organization suggested will not be unwieldy or unduly costly, but one which will serve the health interests of the community to the best advantage.

A LECTURE ON CHRISTIAN SCIENCE

(Continued from page 5.)

Materialistic human reasoning are passing away, the reliance on things material is proving to be indeed a broken reed, and as was foretold the Christ is appearing to the individual human consciousness through Christian Science, or the spirit of Truth. This is the promised Comforter that is destined to sweep away from human experience sin, disease, war, and even death. Are you content to withhold from this divine appearing your mental support? If you do, you but deprive yourself of the richest blessing mankind has ever known. Christian Science does not need your support but you do need the tender ministrations of Christian Science. Humanity needs them and will have them, for it is written that "the earth shall be full of the knowledge of the Lord, as the waters cover the sea."

PRAYER The spiritual understanding of God and of God's creation and the desire and effort practically to apply this understanding to every detail of mortal thought and experience, constitutes true prayer. Such prayer is irresistible because it is the appearing of God's own nature to men. When a Christian Scientist thinks spiritually and as the result of that spiritual thinking manifests some degree of true consciousness, true intelligence, and spiritual power, he is in some small measure manifesting God's nature. Moreover, it is his duty and his privilege to manifest the divine nature because man is in reality God's own likeness. As an individual constantly strives in his daily life to think spiritually and to get this thinking into practice, as then begins to pray the only answer that truly counts. Such prayer is constant and consistent, as Paul terms it, "without ceasing." The world cannot realize too soon that the Christian understanding of God, and of spiritual reality, and the practical application of this understanding in the daily Christian life constitutes true prayer. Such prayer is wholly scientific and is intelligible beyond mere words, for it rests on divine intelligence. The Christian Scientist knows that he does not remove the sinner or heal the sick merely through that momentary power which he practices called upon for help. It is the constant and persistent of his Christlike thinking and living which enables him to receive "di-

rectly the divine power" (Science and Health, p. 192). Let me give you a simple but convincing instance of prayer. A small child, who is a Christian Scientist, was asked to help her mother who had been suffering a great deal. The child at once commenced to pray, and in a short while her mother was very much improved. When the mother was feeling better she said to the child, "When you prayed what did you think?" The child replied, "Well, Mummy, I said to God, 'Is there anything wrong with Mummy?' and God said 'No,' so of course I knew there could be nothing wrong with you." This child's pure faith had refused to accept the testimony of human thinking, but had risen to the exalted consciousness of the perfect God and His perfect man as she had been taught to do in Christian Science. In fact, that child had, in a Christian and divinely scientific manner, utilized the eternal facts of God and man. The result was her mother's deliverance from false material sense, and from the pain which was the outcome of that false thinking. This simple process of true prayer is humanity's only way of salvation from evil of every kind. To any one who doubts this process I would say "try it." When you return to your homes, if there is sin there, or sorrow, or pain, or trouble of any kind, and you are asked to alleviate them, then begin to pray in this manner. Put aside your mortal thinking about God and man, and begin to think divinely. Also realize that spiritual thinking manifests God's own nature, power, and presence. Become conscious of ever present Life, Truth, and Love, the one and only divine Mind, the Principle of all being and of man in His likeness. Realize that such thinking does destroy sin, disease, and in harmony of every kind for it is Emmanuel, or God with us. I do not say that you will always get your answer at once, but if you do not, continue to think rightly about God and about man as God's likeness, spiritual and perfect. Above all do not forget to bring this newly found understanding into your daily life. Eventually, if you are faithful, you will get your result. Then you will have started on your journey as a practical Christian who only needs God and His Christ for his healing, his salvation from all evil, and eventually for his triumph over death. The process which takes place in an individual's thought is the same process that will eventually take possession of the universal thought, and so deliver all men everywhere from all that is unlike God.

CHRIST JESUS Let me say to you that no body of people on earth hold a higher estimate of Christ Jesus than the Christian Scientists. We know that his way is the only way. It is true that we do not believe that the human Jesus is God. We know that, as he himself declared, he is the Son of God. The Christian Scientist's love for Christ Jesus is beyond any words, for is it not the life and work of Jesus which led to the discovery of this Science and which has enabled him to come out of bondage to sin and disease and to see those he loves dearly freed from these ills? It might truly be said of the honest Christian Scientist that his chief aim and endeavor in life is to know more of Jesus and of his teaching, which is revealing God's presence and power. Thus he learns that "Christianity is the basis of true healing" (Science and Health, p. 192).

Mrs. Eddy has stated that "Jesus demonstrated Christ" (Science and Health, p. 332). Christian Scientists recognize that this is the supreme value of Jesus' mission. He demonstrated Christ. He proved the spiritual man, God's idea, to be the only man, and he demonstrated this in every phase of his human experience. Because of his spiritual understanding of God and of the true man, Jesus was enabled to disprove and to cast out of human thought every suggestion of mortality, of sin, disease, or death as being real. Moreover, he specifically taught that all men should, through the correct understanding of God and of the spiritual man, perform the same works. His mission was, in fact, not only to reveal Christ, but it was also to demonstrate Christ in every detail of human existence. This he did to perfection. No one who understands and appreciates Jesus' mission and his fulfillment

"My skin was a sight" I couldn't look people in the face. I was so ashamed of my skin! It was always blotched with pimples and blackheads and at times itched terribly. I had tried everything and was so discouraged that I couldn't bring myself to take hope in anything. You can imagine my surprise therefore when one application of Mentho Sulphur almost completely cleared my skin. I could have danced with joy! In a short time you wouldn't know my skin—it was so clear, so soft and white. Thousands of people are discovering that there is a remedy for skin trouble—even fiery, itching eczema! It's the magical combination of sulphur and menthol—sulphur for clearing the skin, menthol for healing the broken and irritated tissue. All druggists have Mentho Sulphur in jars ready to use, at a few pennies' cost.

Free Trial

of that mission can ever be satisfied to be a merely nominal follower of Jesus. Christian Scientists recognize clearly that the promise of Jesus, "He that believeth on me, the works that I do shall he do also," is not merely a promise but is also an unmistakable demand on his followers. They realize that slowly but surely by the world is beginning to see and to appreciate that the spiritual understanding of God and of His Christ is the only way of deliverance from evil of any kind. As this demonstration of Christ is made manifest there will be a truer appreciation of Christ Jesus and of his overwhelming sacrifice for salvation of men. Until the works are performed in some degree, by healing the sick, reforming the sinner, and raising the dead, Christianity has not fully grasped the deep significance of Jesus' mission. His life and work were a complete proof that "what ever holds human thought in line with unselfed love, receives directly the divine power" (Science and Health, p. 192).

MARY BAKER EDDY One word more. It is sometimes misrepresented that we Christian Scientists make too much of the Discoverer and Founder of Christian Science, Mary Baker Eddy. Let me say to you that it would be impossible for us to make too much of Mrs. Eddy. The salvation of every member of the human race depends on the honest recognition of the truth taught by Mrs. Eddy as God's messenger. She never demanded of her followers any human praise. Her mental status was too high to be influenced by such praise. She knew, however, that if men were to be redeemed by Christian Science they would, in common justice, have to recognize through whom Christian Science had been brought to them. Those who knew Mrs. Eddy well, found that she was pure and tender, wonderfully unselfish, always thinking and laboring on behalf of mankind. Strength and poise she had in abundance, but, above all, her outstanding characteristic was her wonderful faith in God. Mrs. Eddy not only discovered Christian Science but she established it in human consciousness as a practical working system which has delivered numberless men and women from every phase of evil. The sinner, the drunkard, the drug fiend, the licentious man, the sick, the consumptive, the cancer victim, and even the leper have looked up to God and called her "blessed." There may be those who would seek to rob her of her work and thus rob humanity of its salvation. Their effort, however, is doomed to failure. Day by day there is an irresistible impulse impelling us to enter the ranks of Christian Science and there find a practical religion, revealing to them the true God and His Christ. It is also impelling them to love each other, to be tender and true, to be pure and strong, to live for mankind and to let the peace of God dwell in them richly. This mighty army of men and women is marching forth to the support

of Mrs. Eddy's life-work and they are marching forward "with signs following." What Mrs. Eddy really demanded of Christian Scientists is made clear in her own statement (Miscellaneous Writings, p. 206): "Beloved students, you have entered the path. Press patiently on; God is good, and good is the reward of all who diligently seek God. Your growth will be rapid, if you love God supremely, and understand and obey the Way-shower, who, going before you, has scaled the steep ascent of Christian Science, stands upon the mount of holiness, the dwelling-place of our God, and bathes in the baptismal font of eternal Love and women to enter the ranks of Christian Science and there find a practical religion, revealing to them the true God and His Christ. It is also impelling them to love each other, to be tender and true, to be pure and strong, to live for mankind and to let the peace of God dwell in them richly. This mighty army of men and women is marching forth to the support

FIVE SISTERS, ALL SCHOOLMA'AMS

The five daughters of Mr. and Mrs. James Redmond of Kansas City, Mo., are teachers in the Kansas City schools. They are Mrs. Katherine Redmond Roberts and Rose, Margaret, Josephine and Mary Redmond. Two of the sisters, Rose and Mary, recently were admitted to the bar. Josephine and Margaret are members of the Kansas City Civic Opera company.

NEW INCORPORATIONS The Port Oxford Harbor and Development company, with capital stock of \$2,000,000 and headquarters at Port Oxford, Curry county, Tuesday filed articles of incorporation in the state corporation department. The incorporators are A. B. Dodd, C. R. Wade and George W. Soranson. Other articles filed follow: Wood Utilities corporation, Portland, \$50,000; Max Smith, J. B. Baumgartner and Bruno Froeschke. Rogue River Valley Traffic association, Medford, \$507; C. C. Lemmon, E. S. Coe and H. T. Hubbard. Manufacturers Clearance company, Portland, \$75,000; Milton Gevurtz, Harry Gevurtz and Edgar Freed. Frank Chevrolet company, Portland, \$50,000; Herbert L. Frank, Arthur A. Goldsmith and M. Olds.

CONGRESS SETTLES DOWN TO BUSINESS

Expected Smith-Vare Fight Develops In Upper House On Tuesday

WASHINGTON, Dec. 6.—(AP)—Congress moved into high gear today after listening to the reading of the annual message of President Coolidge but without waiting to complete the formalities of actual organization, a problem still worrying the republican majority in the senate because of factional strife.

The senate launched eagerly into the long awaited contest over the right of Frank L. Smith of Illinois, and William S. Vare, of Pennsylvania, both republicans, to occupy seats to which they were elected, while the house received the \$236,800,000 tax reduction bill prepared by its ways and means committee along with another mass of new measures, including the \$198,000,000 deficiency appropriation bill.

Senate Critical First attention was given in both chambers to the reading of the president's message which was received by the senate in silence, followed by some caustic comment from southern senators and with frequent bursts of applause by the more demonstrative house.

Following his custom of the last few years, Mr. Coolidge preferred to have the message outlining his hopes for legislation, including moderate tax reduction and touching on farm relief, flood control and a score of other problems, read rather than be presented by him in person at a joint meeting of the two houses.

Appointments Sent In While the clerks in the senate and house were reading his lengthy message, the president sent to the senate for approval most of the great number of recess appointments he had made during the congressional recess. The batch of nominations included those of numerous federal circuit and district judges, the new ambassadors to Mexico, Cuba and Turkey, Dwight Morrow, Noble B. Judah and Joseph Grew, respectively; the new assistant secretaries named in the state, treasury and commerce departments, along with many other positions.

Stop Getting Up Nights IF YOU get up many times at night by a person of Bladder Trouble, have pains in back, weakness or dizziness, general debility, painful, smarting and difficult urination, lack of control of urine, or symptoms of prostate trouble, try PALMO GLOBULES. This remarkable treatment has been used successfully by thousands. So confident that it will succeed, we will send a trial treatment ABSOLUTELY FREE to any sufferer who has never used it. No obligation or cost. Write today.

THE PALMO COMPANY Dept. R-284 Battle Creek, Mich.

Chairman Green of the ways and means committee gave notice the tax bill—one of the majority pieces to be taken up by the seventy-ninth congress—would be carried up for consideration Friday, virtually insuring house action on it before the Christmas recess.

Norris Leads Off In the senate, Senator Norris, republican, Nebraska, opened the Smith-Vare debate before a crowded chamber. Both Smith and Vare were present. Mr. Norris demanded approval of his resolutions to deny the oath to both men without further hearing. Senator Deneen, republican, of Illinois, spokesman for Smith, followed and the debate was then carried over until tomorrow.

Senator Curtis, the republican leader, today put before a conference of senate republicans the proposals of the independents for assurances from the party for early votes on a farm bill similar to the vetoed McNary-Haugen measure on a proposal to limit jurisdiction of the courts in issuing injunctions and on a resolution for an inquiry into the administration's policy in Latin-America.

After some pointed remarks by some of the old guard about these

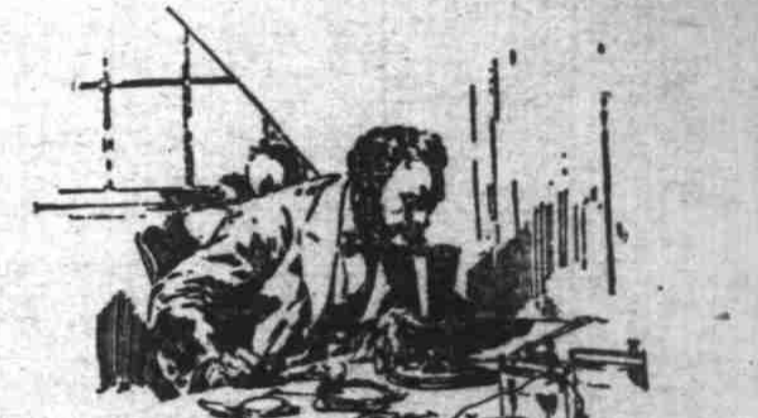

demand the conference instructed Curtis to confer with the group which includes Senators Nye and Frazier of North Dakota; La Follette and Blaine of Wisconsin, republicans, and Shipstead, farmer-neighbor of Minnesota.

Meanwhile, the row over the Smith-Vare case promises to hold the attention of the senate for many days and the house is ready to plunge along on the heavy course marked out by its leaders calling for immediate action on tax reduction and appropriation bills.

SALEMITE FLYING PORTLAND, Ore., Dec. 6.—(Special)—Earl Frum, 1435 North Winter street, Salem, Oregon, has enrolled with the largest group of flying students in the northwest at the Rankin Flying school here.

ANOTHER CASE FATAL PORTLAND, Dec. 6.—(A.P.)—Infantile paralysis has caused another death in Portland, the city health office was notified today. Wesley Gordier, 13, died Monday from the disease.

GROWTH

IN half a century the telephone in America has grown from a crude instrument and a length of wire to more than 18,000,000 telephones, interconnected by 61,000,000 miles of wire. It has grown from uncertain transmission between two rooms to easy and dependable service from village to village throughout our big cities and across the continent and between this continent and Great Britain. As an investment the telephone industry has grown from a subject of jest, when first introduced, to a \$3,000,000,000 business, the property of 800,000 men and women who are confident in its stability and earning power. It has grown from two men, the inventor and his assistant to an army of 350,000 engaged in meeting the problems of construction, maintenance and operation. It has grown from a single sentence, barely intelligible, to a daily traffic of 73,000,000 calls, each a message of value to someone. This growth is the measure of the people's need for personal communication and of the activity, in only half a century, in meeting that need.
