#### PUT CREAM IN NOSE AND STOP CATARRH

Tells How To Open Clogged Nostrils and End Head-Colds.

You feel fine in a few moments. Your cold in head or catarrh will be gone. Your clogged nostrils will open. The air passages of your head will clear and you can breathe freely. No more duliness, headache; no hawking, anuffling, mucous discharges or dryness; no struggling for breath at night.

Tell your druggist you want a small bottle of Ely's Cream Balm. Apply a little of this fragrant, antiseptic cream in your nostrils, let it penetrate through every air passage of the head; soothe and heal the swollen, inflamed mucous membrane, and relief comes instantly.

It is just what every cold and extarrh sufferer needs. Don't stay stuffed-up and miserable.

# Economies of Operation

OR fifty years Swift & Company has been handling perishable meat products. During that time an efficient money-saving sys-tem of marketing has been developed.

Science has been utilized to find new uses for many products that once e were waste and better uses for old products. Multiplied uses have increased volume. Increased volume has resulted in decreased manufacturing and marketing expense. Experience, science and skill have reduced waste to a minimum.

Swift's marketing system means only one profit—and that is low. For the entire operation of converting live animals into Premium Ham and Bacon, Brookfield Sausage and other finished meat products and distributing them to the retailer, Swift & Company receives a profit from all sources averaging only a fraction of a cent per pound.

The National Distribution Conference in 1925 found the wholesale expenses of the packers' branch houses to be the lowest of the seventeen trades studied.

These economies of operation make possible full market value for live stock and lowest possible prices for meat. Swift & Company serves both producer and consumer efficiently and well.
