street.

Are You 'All There?'

Chemical analysis of the human body  
shows that it is composed of the follow-  
ing elements: Oxygen, Hydrogen,  
Carbon, Nitrogen, Calcium, Phosphorus,  
Potassium, Sulphur, Magnesium, Iron,  
Sodium, Zinc, Manganese.  
You supply your body with these  
chemical elements through the food you  
eat, the air you breathe, and the water  
you drink.  
Good health depends much upon the  
chemistry of the body, as thus supplied  
and maintained. Many refined foods in  
common use today are lacking in an  
essential element in these vital and health-  
promoting properties, and this deficiency  
is responsible for many chronic ailments.

**Pacific Health-Ore**  
is rich in the majority of these elements  
and has accomplished marvelous  
results in restoring health. Give Nature  
a chance—you'll be surprised at her re-  
sponse.
