Are You 'All There?'

Chemical analysis of the human body shows that it is composed of the following elements: Oxygen, Carbon, Hydrogen, Nitrogen, Calcium, Phosphorus, Potassium, Sulphur, Sodium Chloride, Magnesium, Iron, Iodine, Fluorine, Silicon, Zinc, Manganese.

You supply your body with these chemical elements through the food you eat, the air you breathe and the water you drink.

Good health depends much upon the chemistry of the body as thus supplied and maintained. Many refined foods in common use today are lacking to an alarming extent in these vital and health promoting properties, and this deficiency is responsible for many chronic ailments.

Pacific Health-Ore,

is rich in the majority of these elements and its use has accomplished marvelous results in restoring health. Give Nature a chance—you'll be surprised at her response.

CHICAGO GRAIN

CHICAGO, Dec. 20.—(AP).—Corn plunged wildly downward 3¾c a bushel today, but later recovered poise to a notable extent. The government crop report making an unexpected sensational increase of the 1927 corn production a estimate was responsible for the break in values. On the other hand, much commission house buying was done on an assumed basis that the government had over-estimated the corn yield.

Closing quotations for corn were unsettled, 1¼ to 2c net lower, with wheat 3-8 to 7-8c off and oats at ⅛@⅜ declines to ¼@¾c advance.
