#### SLOGAN CAMPAIGN IN NEW STYLE

The Slogan campaigns of The Statesman, now in their pinth consecutive year, will be continued indefinitely—

But they will have a new form hereafter. They will appear in the Farm and Industrial Magazine Section of the Sunday Statesman, in tabloid or large page magazine form. This will give larger space and an improved lem, treasurer. form for the development news of The Statesman-

For the campaigns for building up our industries on the land and in the cities and towns of this district. At will be better and it will be more convenient. The

magazine section will be in form for forwarding to distant HIGHER RATES FOR AGRICUL-Also, the Slogan work will be extended. It will be im-

proved. It will be made more distinctive. It will be largely by itself, in the new form. This also will be the last issue of the Weekly Oregon day was directed again toward for the product, so the fertilizer takes Bob into his home and of-

Statesman. The list will be transferred to the Sunday list,

ampaigns still more useful to this city and section. This work is something unique. It could not be carried on in many cities, for there are not many cities located in such a land of diversity. The help of every one who can assist house ways and means committee in making the Slogan campaigns more useful is solicited. It is a work in which every person in this section ought to be view to readjusting them "more makes 20,000 plants, almost vitally interested.

#### OUR CELERY INDUSTRY STABILIZED

Starting with a few rows making about 3000 plants, or been introduced. about a seventh of an acre, eighteen years ago this spring, the celery industry of the Salem district has grown steadily day by the executive committee of and away above 60,000 yards anand become stabilized-

With 500 cars shipped to distant markets last year, and ducers' federation. In a resoluthe first quality bunches and red 550 cars in prospect this year, and an annual increase in agricultural tariff bill, this group prospect, as large as the market conditions will justify.

Thus a dream has become a reality. In 1924 our Oregon celery took all three prizes-first, second and third at the national vegetable fair, and similar victories have been products produced on American nia's celery. That tells the tale scored in other years at these fairs-

So we out-Kalamazoo Kalamazoo. We grow here the best celery in the world. Our celery has sold some years at \$1 crate above California's best, or \$160 to \$180 a car higher than received by growers of the state to the south of us. In 1926, our celery went \$2 a crate above California's.

This means that we can market our celery on quality in competition with the best grown any where. The Southern Pacific dining car service recognizes this, in using our Labish Meadows celery and freely advertising this product. This all means a steady growth of the Labish celery industry. It will go to 1000 cars, and that will mean a half million dollar crop on less than 500 acres of land. It will go to 2000 cars, and that will mean a million dollar crop on less than 1000 acres of land. Perhaps on 900 acres. And it will go to two or three thousand acres, in the Labish district. It will go to that acreage as fast as there is a reliable market

The Labish celery growers have also developed the head lettuce industry, with about 50 cars a year shipped to outside markets. And they grow many oars of onions that sell as high as 75 cents a hundred pounds above the market in Chicago. They are experimenting on other major crops. Big things in some new lines here are promised. Their dreams will come true, just as their celery dream has been m

Then there is the Santiam irrigated district. For two years, fine celery grown in an experimental way has done wonderfully well there. The possibilities in that and a number of other lines, in that section, are great. Big things are in prospect up that way.

Roy K. Fukuda, who started the celery industry as we see it now in this district, and who has been the leader during all these eighteen years, looks forward to an early time when his personal attention will not be needed in this now third district court of appeals in

str bilized industry-And, wishing to be useful to his adopted country and state and district and city, where people have been good to him and his family, he is looking forward to activities in other lines, that will develop great industries. He has been ex-

perimenting for years. This was the case with head lettuce. Salem will become as famous a vegetable center as it has

grown to be as a fruit center. Salem has a Burns cult. The annual Burns banquets in

this city are brilliant affairs, as was the one last evening. The brief address on Robert Burns, the poet laureate of humanity, by Dr. W. C. Kantner has not been surpassed the Wright act, in the house, formanywhere or at any time, in the allotted space he occupied ed the basis of one of the bitterest on the program. The favorite songs of Burns were rendered as one might hear them in old Scotia's most cultured circles. All this is very fine and creditable to Salem as a city of standing in the high things of the heart and the choice sentiments of the spirit.
