Of Course, An "IRON FIREMAN"

Whenever the important question of heating in any important Salem Building, during the past few years has been decided upon, and time has been taken to make an unbiased investigation into the various forms of fuels and burners invariably the decision was an "IRON FIREMAN."

So again history repeated itself in the finest hotel Salem has. Only the best was used in its construction. So nothing but the best science could offer for the heating system would do.

We are proud to have had a part in the construction of the beautiful

and Surrounding Territory?

IS IT NEEDED? IS IT WANTED?

Three Pertinent Questions

What's the Answer?

Much thought and considerable discussion have been deis equally true that much more remains to be done.

Not only that, but there is grave danger that our local dairying industry, one of the most important in the Willamette valley, may vanish almost completely. There are fewer milk cows on our farms today than there were a year ago. California and Washington have been taking considerable dairy stock away from us in wholesale lots, and heifer calves have been slaughtered at birth and up to six months. Thus have we been burning our candles at both ends.

Warning notes along this line have recently been sounded in addresses, by men who know, before granges, chambers

Practically every newspaper in the Willamette valley has evade the question. "As far as he that said Court has fixed Monday, such executrix; all persons hav- given generously of its space in reporting these talks, and the 6th day of February, 1928, at ing claims against the estate-of emphasizing the gravity of the situation in their editorial

Occasional mention is made of the possibility of turning hitherto discarded by-products of the dairy industry into have given him money which he hearing said final account and all Oregon, within six months from profitable commercial commodities. Everybody agrees that it should be done; but nobody is doing it.

> In order to transform a possibility into a dividend-paying. employment-giving, business stimulating reality, it is now proposed to effect the immediate installation, in Salem, or the first unit of a chain of factories that will convert what is now considered of little or no value into Molken, a highly profitable, commercial product.

Possible By-Products

Molken is a century-old family "stand-by" of the Swiss people, than whom there is not a healthier or more vigorous people anywhere on earth. They begin its use in infancy and simply do not get sick. They continue its use in old age, and stay well. Molken is a by-product resulting from the manufacture of Swiss cheese which, in itself, is a profitable industry. The production of Molken provides an additional and hitherto utterly neglected source of revenue Therefore, it forms the basis of an entirely new industry Its production here will prove of inestimable value to the entire Salem district, and the whole state of Oregon as well. For one thing, it will encourage the raising of larger dairy herds. By focussing attention on the Willamette valley it will constitute a decidedly valuable advertising asset. It is not at all extravagant to predict that in twelve months Molken, in bottles and cans, with a Salem, Oregon, label attached, will be a welcome visitor to every state in the union.

Ready To Go

Arrangements for the installation of a complete, up-todate factory are now under way. Formulas and processes for the scientific, profitable production of Molken have been secured. A trained expert from Switzerland, with diplomas and prizes awarded for exceptional skill and efficiency, is on the ground ready to assume the direction of the plant.

Provision has been made with nearby dairy farmers for an ample and dependable milk supply. The demand for the various types of fancy cheeses, produced in the making of Molken, far exceeds the supply, and is steadily growing It will not be necessary to create a market. It is here. All that remains to be done is to go ahead and produce.

Every Salemite owes it to himself to know more about Molken and the splendid possibilities it holds for the revival and healthy development of our dairying industry. Just mail a postal card with your name and address to The Molken Company, P. O. Box 246, Salem, Oregon. A copy of the fascinating story of Molken will be sent to you free.
