Turned Down for Insurance

If there's anything insurance com-panies are careful about, it's your blood pressure. High blood pressure indicates a dangerous state of health that may cut life short. It is a condition due to our abnormal living habits which put too great a strain upon the vital organs especially the liver. The liver becoming weak and sluggish fails to cleanse the blood of the poisons formed in the food waste. The whole system then becomes toxic, with stomach, kidneys, heart and blood vessels affected. The liver, espe-cially at middle life, needs a little help, and there's nothing better for this, as physicians today know, than a little ox gall. Ox gall is a great natural stimulant for the human liver, promoting its normal active functioning, so essential to health and vitality. Dioxol tablets are genuine ox gall in dainty and taste- once. less form, each tablet representing 10 than 2c each at good druggists, and one or two days' use will prove a revelation.
