

HAMILTON SEEKING CAVEL AT SESSION

Bend Representative Has 27 Votes for Speakership, Claimed Here

State Representative Ralph S. Hamilton of Bend will continue in the race for speaker of the house at the next session, despite the fact that Frank Lonegran of Portland has received the endorsement of the Multnomah county delegates. This was announced here Saturday by Representative Hamilton while visiting in Salem.

Mr. Hamilton said he has 27 votes pledged, with assurances of five additional votes. Theodore P. Cramer of Grants Pass, who recently was elected secretary of the State Bankers association, had promised to vote for Mr. Hamilton, but has withdrawn from the legislative contest. This has reduced Mr. Hamilton's number of votes by one.

During his stay in Salem Mr. Hamilton conferred with several Willamette valley members of the legislature.

The fight for the speakership apparently has simmered down to two candidates, Hamilton and Lonegran. It was said that Mr. Lonegran has written to a number of Marion county members of the house, but as yet they have not signed on the dotted line.

Mr. Hamilton said that the three big problems to be considered at the next session of the legislature are tax relief, automobile legislation and governmental readjustment. He indicated that any drastic changes in the present tax system probably would depend to some extent upon the report filed by the tax relief committee created at the last legislative session.

Two possibilities are ripe in connection with automobile legislation, he said. One is a small reduction in the motor vehicle license fee with a corresponding increase in the gasoline tax and the other a license fee based on the age of the car rather than weight.

Mr. Hamilton said it was his opinion that the McPherson consolidation bill would receive serious consideration by the voters at the November election. A similar issue was before the 1927 legislature, but it received scant attention.

THOUSANDS CROSS UNEXPLODED MINE

LILLE, France—(AP)—Thousands of thousands of passengers who have travelled by rail between Lille and Paris during the past 10 years have, without knowing it, been literally riding over a powder mine.

Workmen repairing the grade crossing at Libercourt unearthed a formidable collection of German shells varying in caliber from 3 to 10 inches connected with electric detonators, skillfully buried under the track. This mine had apparently been laid by the Germans during the retreat in 1918, but the wires leading to the detonators must have been cut, preventing the explosion.
