Salem Lion's Club Completes Improvements at Y. W. C. A. Summer Camp

The Y. W. C. A. summer camp "Santally," near Mebama, boasts a number of improvements within the past two weeks. Members of the Salem Lions club, who have sponsored the camp, have built partitions, screened windows and doors, and cleared and gravelled the entrance drive, as well as constructed front and back porches.

Mr. C. F. Giese has contributed supplies for the well, and Mrs. S. Hamilton has donated an oil burner range for camp kitchen. Frank E. Neer of the Salem Brick and Tile company donated all the brick for the fireplace, construction of which will be begun shortly. Other materials for the fireplace have been bought with money raised by means of two cooked food sales given under the efficient direction of Mrs. E. T. Barnes. Mrs. Barnes has been assisted by Miss Elizabeth Baker, local secretary of the Y. W. C. A.; Mrs. J. H. Baker, Mrs. J. H. Lau-tan, Mrs. W. E. Kirk, Mrs. Harry Hawkins, Mrs. L. H. McMahon, Mrs. W. Connell Dyer, Mrs. D. R. Ross, Mrs. Frank Erickson, Mrs. B. E. Carrier, and Mrs. Paul H. Hauser.

The camp is particularly in need of a Coleman lamp and chairs for the living room, as well as breakable dishes and other kitchen equipment. The rooms are furnished with rough tables and benches.

It is also hoped that the two acres of ground which were donated for the camp by Joseph H. Albert can be fenced before the opening of the camp, July 9.

SUMMER BULBS OCCUPY A PLACE OF GROWING IMPORTANCE IN THE GARDEN

Gladioli Fill an Important Place in Modern Color Scheme Gardens.

Summer bulbs occupy a place of growing importance in the garden particularly the gladioli, one of the most magnificent summer flowers and even more valuable for cutting than garden decoration. The first planting of gladioli should be put in the ground now, planting six inches deep in order to avoid the necessity of staking. This deep planting also will avoid any danger from vernal frosts as the plant will not be above ground for some days after planting.

The variety of gladioli is so great that the selection becomes merely one of individual taste, a list and selecting such colors as are desired. For garden purposes the prinulinius hybrids are the best and this African species, which came into garden use only a few years ago, has become one of the most important influences in the whole race of gladioli.

The primas, as they are usually called, are of more graceful stem than the older types and soft yellows, oranges, salmons and scarlets are the prevailing tones.

They are characterized by hooded flowers that is, the upper segments curve inward, shielding the center of the bloom while in the older types, for the most part, the divisions of the flower flare widely.

For cut flowers gladioli may be grown in rows in the vegetable plot like onions and the same soil in which onions flourish is ideal for the gladioli.

One of the most picturesque uses of the bulb is in small groups of a single color spotted about the hardy border, the annual border or in beds. They are used with fine effect to decorate rose gardens after the June burst of bloom has faded.

Scores of new varieties are being introduced each year and naturally they are of high price. However, there are so many of the older kind of moderate price and equally fine for garden effect that the cost of novelties need not deter any gardener from a fine display. Gladioli should be planted at intervals of ten days up till June 1 to insure a succession of bloom in the garden.

TYPING PUPILS USE 79 REAMS OF PAPER

Exactly 46,560 sheets of typing paper were used by the students in the typewriting classes at the Salem high school the past year. With approximately 225 students in the typing classes during the year, the average sheets used by the pupil totaled about 207.

Such is part of the story "between the lines" in the annual report of Miss Elizabeth Hogg, of the typing classes. Miss Hogg's report shows the young typists used: 19 reams of 8 1/2 x 13 and 28 reams 8 1/2 x 11 mimeograph paper; 11 reams of the smaller and 20 of the larger typing paper; and 19 reams of punched mimeograph paper.

The classes also used nine boxes of stencils, three cans of mimeograph ink and six dozen typewriter ribbons.

Miss Hogg asks minor repairs in the typing rooms and stresses the handicap under which the department is working with the beginning students divided into two rooms. At present there is no room large enough to accommodate the entire class and the report suggests a room large enough to hold at least 30 students, so the class might be more evenly divided.

Millions of Families Depend on Dr. Caldwell's Prescription

When Dr. Caldwell started to practice medicine, back in 1875, the needs for a laxative were not as great as they are today. People lived normal, quiet lives, at plain, wholesome food, and got plenty of fresh air and sunshine. But even that early there were drastic physics and purges for the relief of constipation which Dr. Caldwell did not believe were good for human beings to put into their system. So he wrote a prescription for a laxative to be used by his patients.

The prescription for constipation that he used early in his practice, and which he put in drug stores in 1892 under the name of Dr. Caldwell's Syrup Pepsin, is a liquid vegetable remedy, intended for women, children and elderly people, and they need just such a mild, safe, gentle bowel stimulant as Syrup Pepsin.

Under successful management this prescription has proven its worth and is now the largest selling liquid laxative in the world. The fact that millions of bottles are used a year proves that it has won the confidence of people who needed it to get relief from headaches, biliousness, flatulence, indigestion, loss of appetite and sleep, bad breath, dyspepsia, colds and fevers.

Millions of families are now never without Dr. Caldwell's Syrup Pepsin, and if you will once start using it you will also always

J. B. Caldwell M.D. AT AGE 83

Have a bottle handy for emergencies.

It is particularly pleasing to know that most of it is bought by mothers for themselves and the children, though Syrup Pepsin is just as valuable for elderly people. All drug stores have the generous bottles.

We would be glad to have you prove at our expense how much Dr. Caldwell's Syrup Pepsin can mean to you and yours. Just right "Syrup Pepsin." Monticello, Illinois, and we will send you prepaid a FREE SAMPLE BOTTLE.

"Linoleum Floors Are Such a Comfort"

—is what thousands of women are saying nowadays because they have found that there is no floor-covering that possesses such all-round advantages. And this is particularly true where care has been taken to use

BLABON'S Linoleum

First of all, with this Linoleum you can brighten up and add to the beauty of most any room because Blabon designs and color harmonies are so charming and varied that they will fit in with all kinds of decorative treatments.

But what is probably most satisfying of all is the fact that it is

Waterproof—Easy to Clean—Mothproof and Needs No Beating, Taking Up or Scrubbing

Just think what that means in terms of labor-saving alone. And a Blabon floor is always economical because it wears for years when given the proper care—an occasional waxing, if of Inlaid Linoleum, or a coat of floor varnish once or twice a year, if of Printed Linoleum.

Let us show you the new Blabon patterns in our stock and estimate for you just how much it will cost to lay a Blabon floor in any or all of your rooms.
