

PROSPECTS BRIGHT FOR APPROPRIATION

Army Engineers Looking More Favorably on Northwest, Says McNary

Engineers of the United States army, who have an important part in deciding what rivers and harbors shall be developed through federal appropriations, are coming to look more and more favorably on the commercial prospects of the Willamette valley, according to a statement given out by Senator Charles L. McNary following his return from Washington, D. C., to spend the summer at his home near Salem.

His statement follows:

"No one thing which the federal government has done for the northwest compares with the board of army engineers' decision that Portland should have a channel 35 feet deep and 500 feet wide from its port to the sea. This will give Portland a harbor equal to any port along the Atlantic, Gulf, or Pacific seaboard and will prove to be of immense advantage to that territory drained by the Columbia river and its tributaries.

"The board of engineers, after a rehearing of a former decision unanimously accepted the larger project and made to congress a favorable and excellent report, urging the expenditure by the federal government of practically a million and a half dollars for that purpose and an annual maintenance cost of several hundred thousands of dollars.

"The house committee on rivers and harbors adopted a report which is now on the house calendar ready for action at the next session of congress and unquestionably the report will be found acceptable by the senate commerce committee and the senate.

"In a statement addressed to me and in a report made to the congress the board of engineers stated that a large and important commerce has developed on the Columbia and lower Willamette rivers due in great measure to the efforts of Portland and the expenditure of that locality of some \$25,000,000 on channel improvements and the construction of terminal facilities. The extent of this cooperation demonstrates the belief of the people of Portland in the future of their port and indicates the energy and earnestness with which they may be expected to work in the future."

"The board of engineers are very sympathetic with the development of our ports and acted generously and splendidly in connection with the development of Coos Bay, Crescent City, Umpqua, Skipanon, and Coquille, and are making further studies at Yaquina bay, Tillamook bay, and along the Columbia and Willamette rivers.

"In view of the generous treatment offered the state by the board of engineers, I have taken the liberty of inviting the chief of engineers, General Jadwin, to visit the state and inspect the various harbors as a guest of the people. He expressed a desire to accept the invitation if the control work of the Mississippi river will permit of his absence.

"With respect to highway construction the senator said:

"Since the passage of the first federal aid road act in 1916, the mileage of surfaced roads in the United States has more than doubled and the improvement in types of construction has been remarkable.

"Federal aid has been used in building 70,000 miles of roads and has been an important factor in this tremendous development, though the automobile probably has been a larger factor. However there can be no doubt that federal aid has stimulated road construction in the states and that it has brought about improved practices in practically all of the states.

"This session of congress experienced the first effort to diminish government aid when the house, acting at the suggestion of the director of the budget, reduced the annual appropriation heretofore carried of seven and one-half million dollars to construct roads and trails in national forests, to six and one-half million dollars. But when the agricultural appropriation bill reached the senate the item was promptly restored, hence the same amount is now available as has obtained for the past six years.

"For the fiscal year of 1929 Oregon will receive about two and one-half million dollars from the federal government in the matter of the construction of highways.

"The wholesomeness of the practice of government cooperation in the construction of highways is so general recognized that it is doubtful if any further effort will be made to contract the present program. Indeed, at this session of congress attempt was made to enlarge the present program by the appropriation of three and one-half million dollars for the construction of roads over the publicly-owned and untaxable lands of the government.

"The bill passed the house and

58 HOMES TO GET ELECTRIC SERVICE

PEP Company Building More Than 10 Miles of Extension Lines in County

In less than two weeks some 58 Marion county residents who have not been able to enjoy electricity for the simple reason that it was not available, will be turning the button to illuminate their rooms, heat the iron, run the washing machine and so on up and down the line of the multitude of home appliances now "run" by electricity.

All of which is a veritable introduction to the fact that the Portland Electric Power company is now engaged in making a ten and fourth miles rural extension to its service.

The new line, when complete, will extend through Quinby and Hoptner, turning east at the latter place to Brooks and then to the ranch of Hayes brothers in the Lake Labish section, where the electricity will be a welcome assistance in the business of topping the onion harvest. The line begins at the Woodmen hall at Chemawa. It represents an outlay of approximately \$12,200.

In addition to the capital and labor which goes into its construction, the extension required 200 poles, 152,000 feet of wire and 275 cross arms. Instead of using the customary cedar poles for the construction, the power company has substituted fir poles for this job to ascertain if they will outlast the cedar poles in this district. The fir poles have been soaked in a solution of arsenic, blue ointment and salt for slightly more than the length placed underground.

The county home owners who will receive the service are:

Mrs. J. L. Massey, Buena Vista school, W. Buchanan, Jake Grasen, W. Landers, Edward Martin, W. F. Klamps, D. R. Degross, O. G. McCloughy, Harry Boehm, F. G. Hornsbuch, Clyde L. Leedy, Minnie M. Shelley, E. A. and J. O. Hayes, William V. Harris, Frank Weinman, P. J. Rasm, C. C. Jefferson, W. G. Welton, W. A. Stackser, Robert A. Beer, Glen Mahler, Oscar Mahler, Horace M. Bibby, W. W. Weinart, V. C. Bishop, W. R. Daugherty and school district No. 143, (Labish Center school). J. P. Ziellinski, Ida Girod, Annie L. Beaty, Homer Goulet, Bruce A. Jones, S. O. Kim, Joe Y. Fukuda, Julian DeJardin, R. L. Beckner, C. L. Beckner, Mary A. Osborn, Joe E. Bartruff, G. G. Bickner, C. W. Becroft, R. B. McDay, J. C. McFarlane, Idan Morse, Harry Heth, W. G. Browning, Adolph Barnick, Mrs. Bena Ector, Peter Stevens, A. McAnderson, J. H. Hargraffen, Sam Weiss, Ed Roggers, Henry Girod, Herman Hahn, Albert Girod.

McAdoo Becomes Editor of Gervais Newspaper

I. V. McAdoo, who entered the Salem job printing field the first of April, has secured another interest in the business of topping the onion harvest. The line begins at the Woodmen hall at Chemawa. It represents an outlay of approximately \$12,200.

Mr. McAdoo has placed Fred Miltenberger, a Salem man, in charge of the Gervais plant and he and Mrs. McAdoo are attending to Salem news and ad soliciting for the newspaper, as well as spending as much time as their office here will allow in that field.

P. P. Hassler, former editor of the paper, is now in Berkeley, California. Mr. McAdoo came here from Seio, Linn county, where he conducted a weekly newspaper for several years.

J. K. Gill of Portland Talks to Normal Students

OREGON NORMAL SCHOOL, Monmouth, June 26.—(Special).—"Books" was the topic of a very interesting address given by J. K. Gill of Portland before the student body of the Monmouth Normal Monday morning.

Mr. Gill's address showed that he had made a very intensive research covering many years into the subject. His talk included a running account of the origin and composition of words.

MOVIES ENTERTAIN KIWANIS MEMBERS

Local and Long Distant Scenes Recorded by Dr. David Hill Shown Group

The special feature of entertainment at the Kiwanis luncheon yesterday was the showing of movies made by Dr. David B. Hill. Dr. Hill's camera is an Eastman electrically-driven Cine-Kodak, weighing only four and one-half pounds and having a capacity of 100 feet of 16mm. film. This film is much smaller than the standard movie film, and 100 feet of it has approximately the capacity of 300 feet of standard film.

Dr. Hill's first reel showed the members of the Presbyterian church moving from their old building to their new edifice on Chemeketa and Winter streets. Interest was especially keen when

Kiwanians saw fellow members marching in the procession. This reel was followed by one of the Armistice day parade last year. The pictures showed up remarkably clear in spite of the fact that they were taken on very dark days. Other reels of interest exhibited by Dr. Hill included scenes of the Mt. Hood Loop highway, Lindbergh's flight, Niagara Falls and Catalina Island.

Many news reels and other movies may be rented or bought for private exhibition. Dr. Hill explained. The films are indestructible and the making of movies is quite simple with the type of machine Dr. Hill uses.

Reels well-taken by amateurs may be sold to film booking agencies, or may be used by organizations and service clubs for advertising purposes.

Members present voted this meeting one of exceptional interest and are looking forward to further exhibitions.

NORMAL STUDENTS SECURE POSITIONS

OREGON NORMAL SCHOOL, Monmouth, June 26.—(Special).—During the past two weeks 22 definite appointments have been made for graduates and students at the Monmouth Normal school through the services of the placement bureau, according to Bess Sherrow, secretary. A much larger number of appointments will be announced by the various school boards by the first of July when the majority of districts will have elected their teaching corps for next fall.

Normal students elected to city positions are: Leota Brantner, Astoria; Mrs. Isabel Duncan, Haufelt; Herbert Evans, principal at La Grande; Francis Gill, Newberg; Christine Graham, Redmond; Margaret McDevitt, Hermiston; Esther Palmrose, Moro; Zoe Sanders, Sandlake; Edward Sturbols, Rex; Reta Thomas, Weston; Geneva Woods, Beulah; and Curtis Hottell, Jennings Lodge.

Mrs. Ruth Lawrence of Portland has been elected to teach in the government territorial school for the deaf and blind at Honolulu.

Other elections have been made in the following counties: S. A. Calrnes, Marion; Ad. Berg, Columbia; Velma P. Linn; Hazel Farwell, Washington; Francis Goin, Lincoln; Mabel Syder, Washington; Louise Schmittle, Columbia; Alma Staffer, Marion; and Roxanne Hottell, Clackamas.

STAR'S WIFE SUED

LOS ANGELES, June 26.—(AP).—Mrs. Irene Barrymore, wife of Lionel Barrymore, motion picture actor, was made defendant in a suit for \$3,641,452.25 filed in federal court here today as a continuation of a mortgage foreclosure action started against her in New York in 1923.

NOTICE OF CHANGE OF NAME

Notice is hereby given that by virtue of an order of the County Court of Marion County, Oregon, made and entered on the 26th day of June, 1928, the name of the undersigned has been changed to Charles Alfred Anderson.
