**How do you buy?**

When you enter a store to buy anything, how do you ask for it? Do you call for the articles by name, or do you generalize — a can of tomato soup; a bag of flour; an aluminum kettle; so many square yards of linoleum; a meat grinder?

It is much better and far more satisfactory to specify the articles you want by name, for merchandise that is good enough to be sold by name is almost always better in quality, and usually no higher in price, than goods of uncertain lineage and less certain quality.

The advertising columns of this newspaper carry advertised names that are familiar to millions of people. Soap, flour, sugar, cereals, kitchen ware, rugs, linoleum, automobiles, etc. They represent those articles that stand for the best in their respective classes of merchandise—quality all through.

Advertising keeps these names before you constantly. Advertising is a constant reminder that the articles you want are the same articles that you see advertised day after day — that justify their being by the service they render. And advertising brings you news—of inventions, discoveries, improvements that keep you up to date.

Tell the sales-clerk what you want by its advertised name. You'll get it—and your money will purchase full value. It pays to read advertising and remember advertised names.

With the number of college graduates that are being turned out each year you wouldn't think there would be so many public questions remaining unsolved.
