

INTERIOR CHIEF CANSE'S FRIEND

Kimball President Congratulates Fellow Alumnus On Campus Condition

Roy O. West, recently appointed by President Coolidge as secretary of the Interior succeeding Dr. Hubert Work, who resigned to give his attention to the republican campaign, is a man fitted by training and natural ability for the position, according to Dr. J. M. Canse, president of Kimball School of Theology, who knew Mr. West as a fellow alumnus of De Pauw university, although they attended at different times.

In a letter sent to the newly appointed secretary of the interior this week, Dr. Canse stated: "Naturally I would expect an alumnus of De Pauw university to be very good timber for such a position. But with your extensive knowledge of our great country and your particular acquaintance with the working problems in city and country throughout the great central west, especially your interest in general education and your contacts with big business in an honest, wholesome fashion, I wish hereby to speak my commendation of President Coolidge in his selection of yourself for this position.

"We in the far west, here in the Pacific northwest, have unique conditions and situations which seldom arise in the Mississippi valley. But I am sure that your good sense will direct you in all matters regarding this great western country. May your great work appear to you in the light of an ever expanding westward opportunity.

"We are hoping that your statesmanship will be projected through many years and that the department of the interior shall now find itself beginning an epoch of exceptional accomplishments."

CHICAGO GRAIN (AP)—Unsettled, corn took the lead in the grain markets today, and jumped up 5c a bushel, on top of sensational gains the day before. Relative gentleness of immediate supplies, together with high premiums being paid for corn ready to be delivered at once, were incentives to urgent purchasing today on the part of previous speculative sellers, especially traders who have been active in selling corn to be delivered during September.

On the other hand, all deliveries of wheat dropped today to a new low price record for the season. Closing quotations on corn were unsettled, 1c to 3c net higher, with wheat 1 1/8c to 1 5/8c down and oats varying from a shade decline to 1/4c advance.
