Farmers Smile; Hoover Elected And Rain Begins

SILVERTON, Ore., Nov. 8.—(Special)—Silvertown was a particularly busy city all day Thursday. Seemingly all the farmers from the surrounding communities were in town and practically all of them were wearing exceptionally broad smiles. Whether this was caused by the outcome of the election or by the rain which began early Thursday morning was not made known. It was safe to conjecture that it was a combination of the two, as the Silvertown precincts carried so strong for Hoover and farmers have been unable to get their fall work done because of the dryness of the season.

Your Lawn Needs Attention

THE pride of having a good lawn naturally goes with the pride of having a home, for there is nothing that helps make a home more attractive than a lovely green lawn in front of it. But it takes a certain amount of time to have a lawn that attracts all eyes. Grass is a very heavy feeder and it is absolutely essential to fertilize it in order to keep it in perfect condition. Rather than make one large application per year, it is far better to apply three or four smaller applications and so obtain an even growth. One of the best times of the year is right now, for fertilizer applied this month enables the grass to enter into the dormant winter months in a fine healthy condition, in addition to giving it a good color which it will retain. In the spring it will be in a much better condition to make an early start and so get ahead of the weeds. By results in the majority of good lawns and golf greens in the Northwest, Lawn Morcrop has proven itself to be the best lawn fertilizer obtainable, and its cost is most reasonable compared with the results it gives and the satisfaction to its users.

With every 50-lb. package of Lawn Morcrop we will give you FREE a 15c package of Morcrop Tablets for use on your house-plants and bulbs.
