# MEYER GIVEN

Holder of World's Speed Record Placed Second In A. A. A. Rating

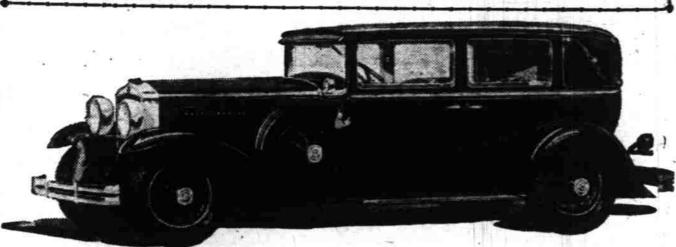

WASHINGTON, D. C., Nov. 10 -Louis Meyer, a virtually unknown racing driver until he won the Indianapolis classic in May, has jumped into national prominence by winning the American Automobile association speedway championship for 1928.

This statement was issued today by the contest board of the A. A. A., on the basis of total awards in the major events run under the sanction of the national motoring body, which supervises and regulates official racing in the United States.

At the same time, the A. A. A announced that Ray Keech, of Philadelphia, who captured the lis, was third.

1928 championship, Louis Meyer consistent performer all season, mobile association award was phy, 1925 Peter DePaolo, 1926 takes the speedway crown from He won the championship events made, were held over the famous Harry Hartz, 1927 Peter DePaolo.

New Senior Six Landau Sedan

RIGINALITY and proportion in body lines mark this landau sedan as the most impressive car in the Senior Six line recently announced by Dodge Brothers, with its long sweeping appearance, fabric rear quarters with landau top irons, and welled front fenders. Interior appointments give the impression of custom coach work. Standard equipment includes front and rear bumpers, trunk rack, two spare wheels with tires.

# Not One American Car...

The following statement is based on figures obtained from thoroughly reliable, disinterested sources. It gives the names and relative standing of the four longest-lived American cars. There is a difference between automobiles of various makes. One of the greatest differences is in lasting quality and in all that it means to the owner's purse.

We could hardly believe the figures when they were first brought to us.

It did not seem possible that the Reo, always a moderate priced car, could outlive even the costliest creations of American automobile manufacturers.

So we had the figures checked again. And again—and yet again.

After all the checks had been made the amazing facts remained unchanged.

#### The four longest-lived cars

Reo automobiles have a longer average life—a much longer average life—than any other American automobile.

Second to Reo in average length of life are the big Pierce-Arrows.

Third are the Cadillacs. Fourth are the Franklins.

These four makes of automobiles, and these four only, have a proved average life of more than eight years.

#### The cars whose records were compared

Rec. Pierce-Arrow, Cadillac, Franklin, Stearns, Locomobile, Stutz, Paige, Kissel, Marmon, Chandler, Velie, Buick, Case, Dodge, Packard, Hudson, Hupmobile, Davis, Willys-Knight, Jordan, Studebaker, Peerless, Auburn, Nash, Overland, Oldsmobile, Oakland, Chev-

A number of American built cars are missing. Some of these are cars whose production has been so small that registration figures are not obtainable. The others have not yet been tested by the years, or are no longer built.

#### The test

The only way to judge the life of the

## Lasts As Long As REO Not One

average car you or anyone else may get, is by the life of ALL the cars of each maker.

Take the total production of passenger cars for each make for the last eight years. Compare these figures with the number of cars of each make registered on December 31, 1925, as compiled by R. L. Polk & Company, automobile stat.

This method eliminates statements of opinion, protects buyers from making ance of a few cars out of hundreds of judgements on the basis of the performthousands-cars often driven by mechanics or dealers and repaired or rebuilt at any cost.

#### How they rank, in actual figures

On December 31, 1925, there were 24.9 percent more Reo passenger cars registered than have been built in the entire last eight years.

Or, in other words, Reo had 124.9% of its last eight years' output in reg-

The only other cars having more than 100% of their production registered were: Pierce-Arrow with 10.1% more, Cadillac with 8% more, and Franklin with 4.9% more.

Remember the respective costs of these cars and then again compare the rec-

Pierce-Arrow 110.1% Cadillac 108% Franklin 104.9%

Tested for nine years or seven years, Reo retains its eleadership. And it is significant that, in this long life league, Reo's constantly improved construction has greatly increased its lead over other cars in its price class,

#### YOU MAY TRY THE 1929 REO

There's a new Reo Flying Cloud of 1929 here for you to test. Try it out in every way you wish. Let it tell its story to you in its own

sweet-running way. Perhaps you're the right kind of owner for this car-if so, you'll know it the minute you try it out. The more miles you cover, the more sure you'll be that this Reo Flying Cloud of 1929 is your

Mr. Smith who has driven and demonstrated the leading makes of cars for years, says there are none like the Reo. "Why do I say this? Why do I compare this Reo Beauty with 4,000 cars? Because it's vibrant life justifies such a comparison. Because it has answered to my every request. Because it performs with and surpasses these others."

You are invited to drive and get acquainted with our Reo. The soft purring of the motor will tell you-"Keep me, mister, keep me. I'll perform after all other cars have quit. I'll go faster and ever faster and never stop. I'll beat them in traffic. I'll beat them on the straightaway. I'll be your pal, your friend, your slave. Take me! You need me and I need you.'

### Reo Sales and Service

339-347 N. High St., Between Center and Chemeketa

Salem, Oregon

Reo Motor Car Company, Lansing, Michigan

#### WHAT THIS MEANS IN DOLLARS TO YOU

- 1-It means that repair and maintenance costs are low or Reos could not be kept running so long.
- 2-That you ride carefree, economically and comfortably because the engineering which gives Reo long life must provide against wear, against breakdowns, for low operating costs, and for protection against jolts and jars of the roads or Reos would not
- 3-That Reos hold their appearance for so long that buyers keep them year after year . . no car whose frame will sag, whose upholstery and fittings deteriorate rapidly would be in service so long.
- 4-You can buy long life at a moderate price.
- 5-This long life means that Reo cars cost very little in depreciation because their cost is spread over so many years.
- 6-That re-sale prices of Reos are always higher than the average because there are so many thousands of unused miles left in them.

The New and Improved Reo offers you all the fine qualities that have been Reo's for so long, plus such outstanding developments as Split-Second Steering for the easy handling of balloontired Reos, Split-Second Braking with Standard Control and Standard Gear Shift, lengthened lines, more luxurious appointments, and many minor refinements. Come in and see this very good-looking moderate priced car which outlasts all the creations of all other American manufacturers.

The West Demanded

## -here it is -The Good New CTC

The good new CTC tire is here. After months of development and actual road testing, the good new CTC tire is offered the motoring public. It is built by hand for long wear and dependability.

The carcass is heavier; specially selected, heavy-weight cord ply; massive, tough side-wall construction; and only the finest compounding materials are used in its manufacture. A completely new, re-designed tread to insure a non-skid, long-wearing surface is also a feature of the good new CTC.

No time or expense has been spared in preparing the good new CTC tire for the market. It is manufactured to withstand the heavy demands of western travel. And it carries a warranty which gurantees it against defects in material and workmanship, for the life of the tire.

Examine the good new CTC at your first opportunity. Plan to equip your car all around, also using the new CTC tubes. For CTC means, now more than ever, ...
