Rice porridge cooked in this manner may be new to some of you. The recipe was given by a Jamaican cook. It will make a pleasant variation from the usual cereals.

Today's Recipes
Rice Porridge (Quantity for two)—Two tablespoons rice, two cups water, salt to taste. Mix, put in oven (very slow fire) and cook three or four hours, stirring occasionally and adding water if necessary. It is nice to add milk when the rice begins to lose its shape rather than more water. The finished product, smooth as porridge, should be served with honey.

Chocolate Cake—One-half cup grated chocolate, one-half cup boiling water and one and one-half cups granulated sugar (sifted), one-half cup butter, one cup buttermilk, two eggs, one tablespoon vanilla, two cups flour, one teaspoon soda, one-half teaspoon salt. Dissolve chocolate in boiling water. Cream sugar and butter, add chocolate, buttermilk, eggs and vanilla, and flour and, lastly, soda, dissolved in a little boiling water. This makes two large tins or three small ones.

A heavy grade of unleached muslin, when properly dyed to match the china, may be used in place of expensive linen. If it is properly laundered, Press the muslin on the wrong side, over turkish toweling, and the effect on the table will be very satisfactory.

Suggestions
Planked Dishes
Planked steak or fish are favorite dishes with many. When a new plank is to be initiated, rub it well with a clear meat fat, and heat it slowly until almost smoking hot. With repeated use the fat seems to penetrate the wood and give a sort of aged appearance. After each time it is used the plank can be washed in hot soapy water and rubbed dry. It goes without saying that it should never be soaked. If particles of food seem to adhere to it, steel wool can be used for loosening them. True planked meats are those which have been cooked on the plank during the entire cooking period. This means that, as soon as the plank is heated and greased, the meat is quickly placed upon it and then put in the center of a hot oven (450 degrees Fahrenheit) or, preferably, low in the broiling oven. When the meat has been broiled on one side it should be turned and the other side allowed to cook. The length of time required for broiling will depend upon the thickness of the meat or fish and also the distance placed from the flame. Fish need not be turned. The plank can be brought directly to the table for serving. Additional garnishes, lemon juice and other seasonings may be added at this time.
