## HEALTH FOUND IN FRUIT COCKTAIL

Simply made with these four fruits—and sugar to taste

This simple fruit cocktail will bring enjoyment and health to your table: Sections of grapefruit, of orange, of pineapple and bananas—with the addition of granulated or powdered sugar to taste. The dissolving of the sugar blends the flavors of the various fruits and adds to them sweetness—nature's perfect flavor.

One of the main purposes of cookery—one often lost sight of in these days of extreme diets—is to add to the zest and enjoyment of foods. And there is no other ingredient so useful in making other healthful foods gracious to the palate as sugar. The good cook, by the judicious use of sugar, makes all kinds of fresh fruits, vegetables and meats tasteful and delicious.

We spoke above of extreme diets. More than that, they are dangerous to health. Eminent medical authorities are alarmed at the semi-starvation reducing diets. Extreme reducing removes the protecting fat that nature intends everybody should have. It tends to destroy the protection against disease. It very often causes permanent injuries to the most delicate organs and tissues.

One of the first laws of health is to eat enough. Diet sensibly. You can't neglect eating and keep well.
