

SPECHT TESTIFIES AGAINST PARTNERS

PORTLAND, Ore., Dec. 5.—(AP)—Giving "the liquor business" as his occupation, E. K. Specht, government witness, testified Tuesday in the trial of Roy A. Moore, accused of large scale liquor manufacturing operations in Washington and Oregon. Co-defendants are Mrs. Elizabeth Moore, wife of the principal defendant, Elwood Roy, John Andrews, Veril Hillyard, Clarence Cornell, C. S. Kerr and Har. H. Hurst. The government charges the group with operation of three stills and the sale of moonshine liquor from the stills.

Specht today testified in the federal court hearing that he did

not trust Moore and that he was firmly convinced that Moore had double-crossed him in their liquor operations. Specht said he was Moore's partner in the operation of stills at Cape Horn in Skamania county, Wash., in Tillamook county, Ore., and near Barton, Ore.

Robert Anderson, now of Albany, Ore., testified today that he acted as "day operator" of the still in Skamania and in Tillamook. He said he received \$10 a day for his service, with the promise that he would be "taken care of" if arrested. He eventually did receive a jail sentence, he testified, and received \$5 a day while serving the sentence.

Old Hardhead—I saved a lot of money today.

His Wife—That's fine. How did you do it?

Old Hardhead—Instead of suing a man for what he owed me, I let him have it.

TELEVISION SETS WILL BE MADE SOON

NEW YORK, Dec. 5.—(AP)—Formation of a \$10,000,000 corporation to manufacture and sell home movie television sets was announced today. The company to be known as the Jenkins television corporation will have as officials James W. Garside, president of Deforest Radio Corporation, as president, and A. J. Drexel Biddle, Jr., chairman of Deforest board of directors and trustee of the Duke endowment, as chairman of the board.

C. Francis Jenkins, known as the father of the motion picture industry and inventor of a motion picture television device, will be

vice-president in charge of research and a director. Mr. Jenkins' device is a transmitter which works from an especially made film permitting reception of television, signals from any broadcasting or short wave transmitter. This device is coupled with a receiver which is claimed will project animated pictures into the home. The corporation will acquire the capital stock of the Jenkins laboratories, Inc., which for seven years has been developing radio and wire equipment with other apparatus for the transmission of motion pictures and photographs. For seven months Mr. Jenkins has been broadcasting television programs from his station W3KX in Washington on a short wave channel.

Capitalization of the new company will consist of 1,000,000 shares of no par value common stock.
