Uniform Speech Is Predicted in U. S. in 25 Years

CHICAGO, Jan. 1.—(AP)—Prediction that America's speech will be uniform throughout the land in 25 years if talking pictures kept on developing was made today by Professor John Hom Mayskens of the University of Michigan, addressing the National association of teachers of speech meeting here.

The southern drawl, the nasal twang of the easterner, the broad "A" of Boston, the Provincialism of the westerner, all were heard this morning when representatives of these sections gave readings to show differences in speech.

Professor Mayskens urged uniformity in speech as an asset to national progress.
