## Salem Woman's Club Begins Its Work For 1929

THE Salem Woman's club met for the first time in 1929 in an important and highly interesting meeting at its club house on North Cottage street Saturday afternoon.

Two splendid lectures were given before a large assembly of women at 3 o'clock. Dr. Estella Ford Warner, director of the Marion County Health association, spoke on "How Much Health Can a Community Afford?" Although her talk was full of facts and statistics yet it was highly interesting and greatly appreciated. In discussing health in general Dr. Warner pointed out the fact that in the 26 year period between 1900 and 1926 there has been a lengthening of the span of life by 10 years. In 1900 the average span was 48 years now it is 58 years. Dr. Warner, with other health experts, attributes this to the control of the five most common communicable diseases, tuberculosis, typhoid fever, scarlet fever, diphtheria, and infant diarrhoea. That it is possible for such control to be exerted over the populace is due to scientific effort and health education.

Dr. Warner's address was punctuated at interesting intervals with incidents of local nature which illustrated the points she made. It was also pointed out in this lecture that with the decrease in death rate from communicable diseases there has been a decided increase in death caused from such functional diseases as is found affecting the heart, kidneys, and the blood stream. This condition makes the problem of health education two-fold, first of control of existing diseases, and second that of education for prevention of disease.

Mrs. Dendell Van Loan, director of the part time continuation school in Salem, spoke briefly explaining the house maids class conducted in connection with this school. Mrs. Van Loan said the class had so far been very successful. She also requested that an advisory committee be appointed from the Woman's club which would aid in mapping out the course of study to be used in this class.

Mrs. Sheldon Sackett was introduced by Mrs. Martin Ferry, and accompanied by Mrs. Monroe E. Ling, chairman of the public welfare committee, made a report on the Christmas seal sale work. Marion county's quota was \$2,500,000. To date the amount obtained is \$1,800 and there is still about half the county to hear from.

Dr. Fannie Brown Tibbitts, chairman of the school for the blind committee, reported on that committee's work during the holidays. Just at the present time they are busy getting some clothing together which is needed by some of the school's young students. Any one having clothing to contribute notify Dr. Brown.

Mrs. Roy Burton reported concerning the KOAC radio program which the state organization has been sponsoring and Mrs. J. M. Deavers announced the continuation of the study classes which have been conducted during the winter by Mr. Martin Ferry and Dr. Franklin of Willamette university. The next one of these meetings will be January 21 at which time Mr. Ferry will finish the review of "Heat Generation."

During the business session Mrs. L. C. Marshall was voted in as a new member of the club. Mrs. E. Ling, chairman of the public welfare committee, made a report on the Christmas seal sale work. Marion county's quota was \$2,500,000. To date the amount obtained is \$1,800 and there is still about half the county to hear from.

## Diet and Health

BABY'S BIRTH CERTIFICATE IS VERY IMPORTANT MATTER

Answers to Mothers

God could not be everywhere; therefore He made mothers.—Jewish Proverb.

The Importance of Registering Baby's Birth

MRS. M.—I suggest you write a registered letter, receipt required, to the doctor who is a negotiator of your baby's birth certificate, and tell him that if he does not respond you are going to report it to the Board of Health. You must have your baby's birth certificate.

There are many reasons why a child should have a birth certificate registered and have a certificate of it. It gives you the main ones:

1st—For the community: If births are not registered, it exaggerates the death rate, gives your community a reputation for unhealthfulness, and destroys the comparability between communities.

2nd—For the individual: Place of birth, under which can be proved the right of: 1. Citizenship 2. Passports 3. Residence 4. Legal settlement

Time of birth, which establishes legal evidence of: 1. School age 2. Work age 3. Age of consent 4. Liability to military service 5. Right to vote 6. Insurance rates 7. Establish citizenship 8. Pension 9. Inheritance of property 10. Insurance settlement

3. Establish citizenship As to your other question: If a child has a rupture, there is a bulging under the skin on the site of the rupture when the baby cries or exerts itself. The little history effect of the naval is not always a rupture. If you will take

Gentle massage of the breasts would not be injurious unless there happened to be a lump in them that had cancer possibilities. But I doubt if massage would have any effect upon keeping the breasts firm. Heavy massage of the breasts should never be practiced.

Flabby breasts are most often due to the weight of too much fat. The breasts should be supported by a properly fitting brassiere—not one that binds them down during pregnancy and nursing and, in fact, at all times.

If you need instructions on how to reduce your weight, ask for our pamphlet on the subject.

Editor's note: Dr. Peters cannot diagnose, nor give personal advice. Your questions, if of general interest, will be answered in the column, in turn. Requests for articles must be accompanied by a fully self-addressed, stamped envelope and 2 cents in coin for each article, to cover cost of printing and handling. For the pamphlet on reducing and gaining, 10 cents in coin, with fully self-addressed, stamped envelope, must be enclosed. Address Dr. Peters, in care of this paper.
