GIRL IS KILLED BY DISCIPLINE

Shot of Twilight Sleep Fatal to Helen Haskew of Welfare Home

ALBUQUERQUE, N. M., Jan. 17.—(AP)—A coroner's jury Wednesday found that Helen Haskew, 18 year old inmate of the New Mexico girl's welfare home, died from "lack of water and an injection of twilight sleep administered by Dr. Evelyn F. Friesbe and Miss Bertha Lips, superintendent of the institution."

The girl was one of six who escaped from the home last week and were recaptured Friday.

Testimony at the inquest revealed that the girls were placed in cells, on a bread and water diet and on Saturday night all were given an injection of twilight sleep by Dr. Friesbe, after they had created a disturbance in their cells.

The Haskew girl whose home was at Portales, N. M., died Sunday afternoon and Miss Lips testified that Dr. Friesbe named heart disease as the cause of her death.

The report of the institution officials, following the girl's death, gave heart disease as the cause, but an inquest was held at the request of her father.

Others of the six girls testified that they had been given the injections, and one stated that she would "have refused to take it, only there were two deputy sheriffs there." They testified that they felt sick after the injections and that they had only bread and water to eat and drink.

FIGHT ON BOULDER DAM STIRS STORM

Arizona Colorado River Commission's Action Causes Much Discussion

SALT LAKE CITY, Jan. 17.—(AP)—The announcement in Phoenix, Ariz., that the Arizona Colorado River commission had voted to bring suit in the United States supreme court to prevent construction of Boulder canyon dam was the subject of much discussion at the state capitol Wednesday.

Governor George H. Dern who, in his biennial message to the legislature yesterday advised the lawmakers to defer action on ratification of the Swig-Johnson bill until Arizona's attitude was ascertained said he could make no statement until he had obtained complete information concerning the plan of the Arizona commission.

Although no legislation bearing on the dam project has been introduced, the Boulder bill was the center of interest in committee room discussion. Friends and foes of the project are marshaling their full strength for the expected battle here.

Those advocating favorable action by the Utah legislature declared the great economic advantages would accrue to this state from construction of the project because development in California would widen the market for Utah products.

Opponents of ratification expressed doubt that Utah's water rights are fully protected and explained that the question of federal encroachment of state's rights must be given full consideration on acting on the problem.

BOLIVIA TO SUBMIT DISPUTE TO HAGUE

GENEVA, Jan. 17.—(AP)—The league of nations was notified by Bolivia Wednesday that it proposes to submit to the permanent court of international justice at The Hague the substance of its entire dispute with Paraguay over the Grand Chaco region.

Sir Eric Drummond, secretary general of the league, has called the suggestion to Paraguay. Also at the request of Aristide Briand, acting president of the council of the league, he has sent the Bolivian communication to all member countries.

While the league has interpreted the Bolivian proposal as referring to the permanent court of international justice, it admits that the South American government may have had in mind the old Hague arbitral court of justice which meets only when a case is submitted to it.

It was said that if Paraguay accepts the idea the subject may be treated at a special session of the permanent court scheduled to be held at The Hague in May. Charles Evans Hughes probably will make his first appearance on the bench at that session. He therefore might have to consider both the Washington and The Hague ends of the dispute.

MAKERS OF PLANES FORM BIG MERGER

NEW YORK, Jan. 17.—(AP)—Seeing a broadening market for large planes, the Curtiss Aeroplane and Motor Co. has joined hands with Gianni Caproni, Italian builder of the planes largely used by American aviators during the war, as a short cut to getting into production of various types of giant land and sea planes.

C. M. Keyes, president of the Curtiss company, announced Wednesday that his company and Caproni who is president of the Societa Aeroplani Caproni of Milan, had organized a new manufacturing company to build planes here under the designs and rights of the Caproni company.

Where the factory will be, when production will begin and on what scale it will be, keys said had not yet been decided, but he estimated that Curtiss was saving about two years by joining forces with Caproni rather than blazing its own trail single handed.

SHAKEUP TAKES PLACE AFTER CUBAN'S DEATH

MEXICO CITY, Jan. 17.—(AP)—Valente Quintana, chief of the secret service, was removed from office Wednesday as an aftermath of the murder of Julio Mella Cuban agitator. The action was taken on instructions from President Portes Gil who has announced intention to clear up the murder.

CAMPAIGNER DIES

HUTCHINSON, KAN., Jan. 17.—(AP)—Lon Hunt, 80, who drove a supply train for General Custer in his Indian campaigns, died here Wednesday.
