"FLU" Starts as a COLD!

Every case of flu is first a cold! Therefore, the way to prevent flu is to stop a cold *in time!* Any cold can, and should be stopped in 24 hours. Letting it go beyond that time is inviting danger!

Stopping a cold in one day requires four things:

1. Check the Cold Germs
2. Allay the fever
3. Open the bowels
4. Tone the System

There's one thing that does all four at once. That's Hill's Cascara-Bromide-Quinine. Each Hill's tablet combines the four necessary helps. Thus Hill's is a complete remedy for a cold. Thus it ends a cold in one day. That's why Hill's should be your first thought at the sign of a cold.
