TARGETS By Laird

A PICTURE without words? Almost—for this is the universal experience of young girlhood, the time when she must place herself against the target of Love to await the dart that determines her destiny.

She can allow herself to be struck by the first of the arrows from Cupid's quiver, or she can delay the event, enjoying the pleasure of the occasion. And it is she, not Cupid, who chooses the arrow that wounds. By her woman's intelligence she directs his aim against her.

Her proper attitude on this occasion is to face the marksman

gaily and with full confidence of her own ability to make a choice. Somewhere in the quiver lies the arrow with her life lover's name engraved upon it. She must be clever enough to know when it is drawn and when the bow is snapped.

She makes herself even more attractive for the test. Her girlish figure and laughing eyes make her a tempting morsel as she stands against the target, the wind breaking fresh on her parted lips.

But she must not tarry there long, for others await their turn.

Peter's Adventures

OH, FOR A ROAD LEADING SOMEWHERE!

"O F all the silly performances I have ever seen," muttered Peter. "These Turkeys look as if they had lost their wits—bobbing their heads and twisting their necks, and getting all ready to fly and then walking around in circles."

"Hopping up in the air, too, like a lot of grasshoppers!"

"I wish I had a gun!"

TO EAT WITHOUT BECOMING FAT

Avoid Too Much of Any Food—and Too Little Exercise, Say Authorities

Some people seem to think that all they need to do to reduce is to stop eating sugar. That isn't true. As a matter of fact, as a prominent medical authority says, "Every food that has any food value at all fattening if taken in large enough quantities." "Reducing weight," he goes on to say, "means to eat less, keeping the diet balanced and attractive."

Medical authorities are alarmed at the national "crave for reducing."

"The experience of centuries has shown," says a celebrated doctor, "that a poorly nourished body becomes much more quickly susceptible to such disorders as influenza, the common cold, or various types of infection, than does one properly upheld. . . . The crave for thinness is an attempt to modify the process of nature."

How much more wise and sane it is to eat moderately of all foods rather than omit the one ingredient that adds so much to the enjoyment of eating. Sweetness is nature's ideal flavor. And no other food is so pure or so cheap as sugar. Eat plenty of such healthful foods as cereals, apple sauce, grapefruit and fresh and canned fruits and vegetables of all kinds—sweetened to taste. Sweetening makes it easy to eat the healthful foods regularly and daily. Don't overeat, but remember it is dangerous to undereat. The sugar way is the happy way.

WOMEN SHOULD LEARN USES OF MAGNESIA

To women who suffer from nausea, or so-called "morning sickness," this simple measure is proving a blessing. Most nurses know it and it is advised by leading specialists.

Prepare a small quantity of finely cracked ice—about a wine-glassful. Pour over it a teaspoonful of Phillips Milk of Magnesia. Sip slowly until the mixture is gone or you are entirely relieved. It is seldom necessary to repeat the dose to end sick stomach or any inclination to vomit.

Its anti-acid properties enable Phillips Milk of Magnesia to give immediate relief in heartburn, sour stomach, gas, its mild, but effective laxative, action assures regular bowel movement. Used as a mouthwash it helps prevent acid erosion and tooth decay during expectancy.

With every bottle of Phillips Milk of Magnesia, come full directions for its many uses. All drug stores have the 25c and 50c sizes. Demand the genuine, endorsed by doctors for over 50 years.

"Milk of Magnesia" has been the U. S. Registered Trade Mark of the Chas. H. Phillips Chemical Co. and its predecessor, Chas. H. Phillips, since 1875.—adv.
