

REBEL FORCES MELTING AWAY

Reinforcements for Insurrectionists at Torreon Fail to Arrive

(Continued From Page 1.) Augustino Olachea. These had been part of the forces of the rebel General Francisco Manzo.

GENERAL MANZO LEAVES TO INVESTIGATE FORCES

Rebel Leader Determines to Find Out Whether He Has Army With Which to Fight

NOGALES, Ariz., Mar. 12.—(AP)—General Francisco Manzo, Mexican rebel army commander in Sonora, secretly left his Nogaless headquarters late today by automobile for Naco, 60 miles east, where a large body of his rebel troops turned against him early today. When part way to the border town General Manzo and his staff officers turned back to Nogales, announcing upon arrival that they saw nothing dangerous at present in the Naco situation.

In leaving Nogales to make the survey for himself General Manzo for the first time tacitly admitted that he put credence in reports of the defection of his troops under General Augustino Olachea. The reports, which came from Bisbee, Ariz., across the border from Naco, as well as directly here from Naco, stated that General Olachea had taken Naco in the name of the Mexican federal government.

Forces Were Intended To Help Hold Torreon
The multitudinous forces, reported as numbering about 1200 Yaqui and Mayo Indians, had been despatched from here by General Manzo, who was sending them eastward in Chihuahua to reinforce the rebel army above. Both Olachea and his troops, however, halted at Naco, attacked the rebel garrison and seized the town in the name of President Portes Gil.

Announcement of an intended attack upon Nogales subsequently was made by General Olachea, who declared the federal forces of General Belardo Rodriguez, governor of Baja California, who aided him with an aerial attack on the rebel stronghold.

Unaffected Troops Are Ordered Back
Services received at rebel headquarters here indicated that part of the troops Manzo was sending into Chihuahua had left Naco and proceeded eastward of Agua Prieta, before General Olachea and his men professed mutiny. General Francisco Borquez, Sonora rebel leader, was at Agua Prieta today where he was reported to have turned back the unaffected troops. Two other battalions were halted at Del Rio, on the railroad between Nogales and Naco. Both groups of rebel soldiers were declared being held in readiness to combat any attempt of General Olachea to lead his professed federals in an attack upon Nogales.

After placing the Agua Prieta troops in position to keep Olachea bottled up in Naco, General Borquez was reported by his headquarters here to have left Agua Prieta by motor, en route to Nogales to confer with General Manzo.

Defection Upsets Plan of Rebels
Mexican rebels have been taken in the rear by the sudden, dramatic defection of General Augustino Olachea and his 1500 Yaqui and Mayo Indian troops at Naco, Sonora, South of Bisbee, Arizona. General Olachea, who had been considered as a rebel, announced Tuesday that he would march against the rebel stronghold of Nogales, Sonora, after having dispatched 400 of his men to take Agua Prieta, 30 miles farther east. Five hundred rebels were said to be advancing against Olachea's expedition to Agua Prieta.

Callies Continue March Northward
This unexpected blow to the rebel cause outweighed in dramatic effect the northward march of the main federal army under General Callies which was ahead of schedule in its advance against the rebel headquarters in central Mexico. General Olachea's description of his moves might be interpreted as forming part of carefully laid federal plans, by which he was to pretend sympathy with the rebels and to come out under his true federal colors only when a crucial moment in the campaign had come.

Naco is in the heart of rebel territory. It was said that Olachea's coup had been carefully planned. The general himself explained that although he had professed sympathy for the rebels he always had been loyal to the government.

Rebel Morale Is Hit Hard Blow
Chief significance of his defection is psychological rather than military. It strikes the revolutionary morale a solid blow in the back. From a military point of view, Olachea's position is somewhat precarious. The general said he relied on aid from federal airplanes if a fight began at Agua Prieta. His action can be useful only in an advance on Nogales, which he was reported to be planning. Olachea hoped for support from General Armenta, operating south Nogales and hitherto considered a rebel.

Rebel troops were concentrating more and more heavily at their Torreon headquarters, said dispatches from a correspondent of the Associated Press who accompanied rebel troop trains south to Torreon from Juarez.

CRASH FATAL
PORTLAND, Ore., Mar. 12.—(AP)—Hugh Haynes, 25, died in a hospital today from injuries suffered when his automobile crashed into an Oregon Electric trolley Monday. Police said they found liquor in the automobile and in Haynes' pockets.

FUNNIEST ACT OF ALL COMING

Jean and Fritz do Their Stuff in Fanchon and Marco Act Today

A brother and sister act which has repeatedly won the statement from critics that it is one of the funniest acts on the American stage today, are Jean and Fritz Hubert who are being starred in Fanchon and Marco's "Hotter'n Hot" which opens at the Elsinore today.

They are known for their original drunk act which has caused more than one prohibition agent in the past two or three years to rush back stage in theatres to investigate the ways and whereabouts of perfect impersonation of two inebriates only to find that they drink orange juice and occasionally tea.

Orange Juice Potent
To their preliminary rounds of orange juice and tea they now admit, after careful questioning, that small blacks are now among the drinks they indulge in—and buttermilk—to add variety, but only in the afternoons.

The decision to vary their liquid refreshments came recently when they were asked by an enterprising statistician to estimate how many gallons of orange juice they had consumed in the last two years. On compiling this record it was found the number of gallons got up around the thousand mark and they quit counting and began figuring.

Other Stars Seen
In addition to the Huberts many other well known artists are included in the bill. Irving Rose, contortionist well known for his "Crazy Elbows" dance. Erik Bye, noted concert baritone, returns to the Pacific coast for the first time in two years. He will be remembered by music lovers from previous concerts on the Pacific coast.

Others are Franklin and Warner, Jacques Ray, Marguerite Miller and the famous Hotsy Totsy Beauties. On the screen Charles (Buddy) Rogers will hold forth in his latest Paramount picture "Some One to Love." Talking and musical acts will also be included in the program. Today's matinee will be at popular prices.

INDIAN BUREAU CHANGE NEEDED

Comprehensive List of Suggested Improvements is Made Public

(Continued From Page 1.) trachoma and tuberculosis experts and 50 more physicians provided with automobiles.

Construct several sanatorium schools to provide for tubercular Indian children now out of school.

Employ Indian girl graduates of nurses' training schools on Indian reservations.

Provide an appropriation to purchase dairy stock, barns, and feed to furnish at least one quart of milk per day for all Indian school children.

Provide, reimbursable appropriation for construction of new homes for Indians and improvement of old ones.

Enact legislation to wind up the affairs of the five civilized tribes in Oklahoma, to dispose of their property, and to administer law and order more accurately on Indian reservations.

Engage more and better equipped and paid educational leaders to supervise and conduct Indian schools.

Encourage Indians to have local organizations for self-improvement of old ones.

Establish community bath-houses and laundries in thickly populated Indian communities. Alter existing allotment laws and make no further allotments on reservations under the present law.

Enact legislation for relief of Indians who are wards of the government, but who do not reside on Indian reservations.

Merritt said that while his recommendations "indicate considerable need for additional funds," he believed that the "funds now appropriated by congress are economically, judiciously and efficiently administered and more has been accomplished for the Indians of this country during the last eight years than ever before in a similar period."

"With the help of your committee and congress," he said, "this progress can be intensified and made permanent and outstanding."

Enact legislation for relief of Indians who are wards of the government, but who do not reside on Indian reservations.

WINTER GIVES PARTING BLOW

74 Year Old Mining Prospector Rescued by Group of Young Boys

(Continued From Page 1.) A tale of heroism came from snowbound Mount Almagre, 15 miles from the famed Cripple Creek mining district of Colorado, where a group of high school boys banded together to rescue Frank Nelson, a 74 year old prospector, from the log cabin where he has been marooned without food.

Word of Nelson's plight reached here last night and the boys, who are experienced mountaineers, plodded through waist high drifts and blinding snow to reach him. One boy in the party was sent back at noon with word that Nelson had been found safe but in a dying condition. The boys devised a litter to carry him to a hospital in Colorado Springs and were making slow progress on the return journey late today.

Mountain passes in the tier of states in the range of the Rockies were checked with snow. Cripple Creek, Colo., was cut off by railroad from the Colorado Springs and making slow communication with the world by telephone.

Wyoming Hardest Hit In Years
The storm, accompanied by lower temperatures, was reported to be the worst in years in central Wyoming. From 18 to 24 inches of snow fell in the territory between Cheyenne and Laramie and 12 inches was reported in the vicinity of Casper, the rich oil capital of Wyoming. Yellowstone park was covered with a three inch blanket.

A group of 12 members of the Sigma Alpha Epsilon basketball team of the University of Wyoming encountered huge snow drifts in traveling by automobile from Cheyenne to their homes in Laramie. Highway department workers rescued the party today after the travelers had been reported hours overdue.

Tires for the new Ford are specially made to give long wear

WHEN the new Ford was designed, it was immediately apparent that a new tire would have to be made to match the car's performance. It was distinctly a new problem, for here was a car with quicker acceleration, greater speed and more braking efficiency than any car of similar size or weight.

So that every Ford owner might be assured of maximum tire mileage at the lowest cost, the Ford Motor Company devoted many months to research and experiment in conjunction with the leading tire manufacturers.

As a result, certain definite specifications were developed for tires for the new Ford. These specify cords of certain strength and texture, a large volume of tread and side-wall rubber, sturdy, non-skid design, and reinforced plies for protection against bruise breaks—all the strong features of construction formerly considered for only the largest tires.

Great care also was taken to secure the best riding qualities in connection with the transverse springs and Houdaille shock absorbers used on the new Ford.

Though the Ford tires are 30 x 4.50 in size, they have the resiliency and air space of much larger tires because of the drop center rim of the steel spoke wheels.

Another unusual feature of the new Ford tires is the provision for balancing the tire assembly. Every tire is marked on the sidewall with a red spot to show where the valve stem should be when the tube is inserted. This is just a little thing, but it assures a uniformly high standard of tire performance at all speeds.

For best results, the tires on the new Ford should be kept inflated to an air pressure of 35 pounds and checked regularly to insure this pressure all the time. This is important. Low inflation breaks down the side-walls of a tire. By causing overheating, it also destroys the rubber that acts as an insulation, with consequent separation of the cord.

At the end of each 5000 miles, when you have the front wheels packed with grease, it is a good plan to have the wheel alignment checked. This will prevent the possibility of premature wear of the tires.

When punctures come, as they will with any tire, you will find the Ford dealer particularly well equipped to make repairs quickly and at small cost. See him, too, for replacements. Then you will be sure of getting tires built specially for the Ford car according to definite Ford specifications.
