DOCTOR TELLS OF INDIAN CONDITIONS

WASHINGTON, Mar. 12.—(AP)—Calling attention to attacks made on the Indian bureau because of poor living conditions among the 350,000 Indians in the country, Dr. M. C. Guthrie, chief medical director of the bureau, today issued a statement covering the difficulties which beset the bureau in its relief work.

Dr. Guthrie said health problems of the Indians were common "to any people where ignorance, superstition and poverty prevail and makes difficult or prohibits the introduction of established measures because of lack of facilities to carry out such measures and a trained personnel who are content to live under conditions of isolation and at times actual hardship."

Tuberculosis was listed as the most important cause of death among the aborigines, with the death rate from this disease estimated at more than four times that among whites. This was said to be the result of poor economic status, unhygienic living conditions, and lack of an adequate diet or a poorly balanced diet.

The Indian bureau has been unable to make progress in relieving the situation, Dr. Guthrie said, adding that one of its needs was for a skilled personnel willing to remain in the service in spite of its hardships.

CONGRESSMAN HITS MOVIE CENSORSHIP

WASHINGTON, Mar. 12.—(AP)—Censorship of radio or motion pictures "Before Utterance," was declared here tonight by Representative Beck, republican, Pennsylvania, to be as damaging to the American form of democracy as would be censorship of the press.

Addressing the fortieth anniversary of the Washington chapter of the Sons of the Revolution, of which he is president, he cited as an example the action of the censor board of Memphis, Tenn., in refusing to pass the "King of Kings," a picture of the life of Christ made after consultation with the leading religious groups of the country. He pointed out that the supreme court of Tennessee ruled that the lower courts were in error in intervening in the reviewing of the picture.
