"Up Early and at the Job" April Slogan for Gardners

Without One: Little Care Needed

HEDGES ARE USEFUL AND BEAUTIFUL

Too often the hedge is thought of only as a barrier-a living substitute for a fence. But while a hedge serves for this purpose element in design and an ornamental addition in the planting scheme is not fully appreciated. Most every home grounds present planting which will increase the beauty and effectiveness of the planting scheme.

Ordinarily we think and speak at hedge, the plants are trained in geometric outline by periodic more or less naturally.

Formal Hedge Needed

In landscape design, the formal hedge is almost indispensible. Its uses are legion. That is why most every home grounds can use hedge treatments to advantage. The formal hedge can be used to bound and screen the architectformal garden one often finds and weedless. these low hedges bounding the and pattern of the design.

Where there is a formal terrace adjacent to the house, a Often, in the case of small houses, a terrace with hedge planting is all that is needed to tie the house to the grounds.

properly maintained. The beauty it presents is directly proportional to the care given it. The hedge tle attention at the proper time. Variations Many

The hedge which serves in place of a wall may be trained to a line similar to a wall. It may have buttresses, may vary in thickness and height, and take on all sorts of interesting forms if property growing season. The results are well worth the effort.

There are many plants available for hedge purposes, both deshould be chosen according to the with your hedge problems ..

Don Old Togs and Get Busy Owners Told

the call for sturdy gardeners one take the air, for there is soil to

know that now and then there that lime does not rid the lawn of comes a snow as late as April, but moss. In fact, it is said that in grass. If possible, enough good is the best known remedy. A who cares? Fortune smiles on him who dares. So cock a knowing weather eye, and when you see a sunny sky and feel a softness in the air, with mellow soil everywhere, then take your spade and plant some rows of every early thing that grows.

This month is not a bit too soon to plant some things and spray and prune, and if you've not your planning done-my goodness! -you had better run and get the job done right away before you've lost another day. There's no denying that you ought to have your garden seeds all bought and orders in for shrubs and trees. to do the season's work with ease.

This spring song is one of our own and not the work of Mendelssohn, but we just hope that it will do the main thing that we want It to-that is to give a warning clear that the too brief spring season's near, and you had better start to move if you have home the moss. grounds to improve.

HEDGE PLANNED How to Make Lawn Perfect Told in Succinct Article; War on Weeds is Outlined

Formal Garden Impossible Take Out Weeds With Long-Bladed Knife and Fill Hole in Lawn With Soft Dirt, Then Plant New Grass Seed

Editor's Note: Fred Blake who writes this and several other articles on today's garden page, is a Salem young man who is known throughout the city as an expert landscape artist. His advice on lawn improvement is timely and authentic.

There are several requirements necessary for producing a perfect lawn. How to keep it thrifty and free from weeds is the desire of all home lovers. Even the amateur is now out all unnecessary branches so if a few drops of oil is smeared so admirably, its usefulness as an able to have a weedless lawn simply by following a few rules that the tree will have sufficient over the surface every time they and by using a little elbow grease.

Some lawns have large patches of weeds, while others have only a scattering weed here and there. In the latter early. If there is moss in the opportunity for the use of hedge condition, the method used is the more simple. There are two lawn, now is the time to rake it ways in which a gardener may remove the weeds. He may out and apply the fertilizer. Also dig them out with a long-bladed knife, taking great care to weed the lawn while it is still soft remove the whole of the root. If a portion of the root is left, roll it with a heavy lawn roller, of a hedge as being a row of some weeds will send up new heads in greater numbers than and if there are bare spots, cover plants closely together to effect a the original. The small hole left in the lawn as a result of with rich soil and scatter a few solid mass of foliage. In the form- removing the weed will soon fill with soil from either rain or seeds of a good variety of grass. irrigating water. The gardener may use a standard weed trimming. The informal hedge is puller to advantage where the weed is large and deep roofed. article on, "The Makings of trimmed to gain compactness, but | The soil must be soft if one expects to pull out the whole root. | Perfect Lawn." the plant is allowed to develop The weed puller will leave a small hole which should be filled with rich soil and a few seeds of grass sown at a favorable

The kind of fertilizers vary with hedge planted along the edge of the type of grass seed. And the this terrace will greatly enhance amount to use and the methods the appearance of this terrace, of applying vary with the kind of fertilizer.

Some grasses thrive in an acid soil and therefore must have an acid-reacting fertilizer. In this Regardless of how the hedge class are the Bents and Fescues. is used it can fulfill its mission | Most popular is the Creeping Bent to the utmost only when it is which eventually produces a heavy thick carpet and is the easiest to keep weedless because of its nature. Bent grasses thrive best does not require great work to be in an acid soil while weeds become grown properly, but rather a lit- weakened. If a bent grass is fertilized with an acid-reacting fertilizer, the weeds will be crowded plantings. Various types of flagby a thick healthy, thriving mat of grass. There are a number of concerns who manufacture this type of fertilizer, the same rules for using applying to all makes. The feretilizer should be sown very evenly and thinly over the trained. All that is necessary to entire area to be fertilized and accomplish this is systematic then soaked in thoroughly. And pruning of the hedge during the don't forget-the soaking, as your

lawn will be burned up unless a large amount of water is used. Other grasses thrive best in a sweet soil. Blue grass and white ciduous and evergreen. The plants | clover are the most popular grasses that thrive in a sweet, or alkatype of hedge to be developed, its line soil. Where soils are naturuse and location. Let us help you ally acid or where a weak stand of these grasses occur, an application of garden lime should be sprinkled evenly over the lawn. It is a little more difficult to have a weedless lawn with these seeds but by persistently building up the lawn, weeds will be gradually

Lime Removal Schemed

In trying to rid a lawn of In trying to rid a lawn of moss, many people use methods that actually encourage its exist-Bring forth the tools and sound ence. A few years ago it was a common occurrence even for exand all to stretch their limbs and perienced gardeners to apply lime upon the moss to kill it. But today it has been proven by many Of course, from history we agricultural experiment stations the lime-stone quarries of the South, moss thrives. This alone to natural drainage, should be chased for a small sum of money indicates that moss thrives upon lime instead of being destroyed by

its application. The first step in ridding the lawn of moss is to rake it out thoroughly with an iron rake and haul it off. Then a good fertilizer, What to use instead of lime has been considered and many fertilizers tried to great satisfaction. Because moss thrives in a sweet soil, it is necessary to produce an acid condition of the soil. And

so an acid-reacting fertilizer should be evenly applied after the moss is raked out. Such a fertilizer will kill moss when applied dry before raking, but more satisfactory results are obtained by first raking out, then applying the fertilizer and soaking it in. In real damp lawns, moss sometimes forms each winter. Continued building up of a lawn by the use of fertilizers will in time eradicate
