TWO LOST FLYERS DISCOVERED DEAD

LONDON, April 23.—(AP)—The Express tomorrow will say that observers flying over the stranded airplane Kookaburra in the Tanimu desert of northern Australia observed details which led them to believe that one of

the missing aviators had buried his companion in a shallow grave before expiring himself. The observers flew as low as they dared over the tragedy and by use of field glasses definitely established that the body earlier observed under one of the wings of the Kookaburra was that of Lieutenant Keith Anderson. A low mound of earth suggested that it might cover Robert Hitchcock.

The men had been missing for a fortnight after starting out to search for the airplane Southern Cross, which in the meantime was located and rescued.
