

HOT ARGUMENT ROCKS SENATE

Solons Closely Divided Over Legal Right of Mellon to Retain Office

(Continued from Page 1.) He contended the law should be amended unless it is modified or repealed, in that connection he referred to the recent appeal of President Hoover for law enforcement and suggested that this "sentiment should be our guiding star."

Attorney General's Opinion Referred To
Other republican members of the committee contended with reference to the opinion given by Attorney General Mitchell to President Hoover, which held that there was no doubt of the legal qualification of Mr. Mellon to serve as secretary of the treasury—a post he has held for eight years.
The report was submitted by Senator Norris in response to the resolution of Senator McKellar, democrat, Tennessee, directing the judiciary committee to inquire into the right of Mr. Mellon to serve. Two other points raised by that resolution were dismissed unanimously by the committee.
Senator Norris intends to place his report before the senate as a minority report by the committee if a majority refuses to endorse it. This will put the issue up to the senate.

BUILDING PROGRAM OVER TWO MILLION

(Continued from Page 1.)

for the industries, which will aggregate a considerable sum.
The 100 blocks of paving and the additional alleys to be improved in the same way, with various repair projects throughout the city will take not far from \$200,000 during the current year.
Bridge Program Calls
The finishing of the new city bridges, together with several projects of this kind yet to be undertaken, will require the expenditure of over \$100,000 beyond what has already been paid out on this program.
The new grand stand and the exhibition quarters in connection therewith, together with minor improvements, all to be completed before the date of the opening of the fair this fall, will require the expenditure of over \$150,000. The work of tearing away the old wooden grand stand, to make room for a part of the new steel and concrete structure that will occupy that and a great deal more space, is already under way.
Telephone Expectations to Be Very Heavy
The telephone company will spend in construction work in Salem the present year something like \$500,000, including the \$300,000 office building the ground for which has already been cleared, the building of underground conduits for cable lines, the new office equipment, and various other changes that will become necessary in making Salem one of the telephone operation centers of the northwest.
Nearly \$100,000 is going into the new additions to the Salem plant of the Terminal Ice and Cold Storage company, giving that institution largely increased capacity for fruits and other products, and facilities for the icing of through fruit cars from California and other points to the south.
There is perhaps \$50,000 yet to be accounted for at the state hospital in the construction of a new industrial building, the completion of the dormitory building for employees, etc., etc.
The government is to put \$30,000 to \$35,000 in its addition to the Salem postoffice and fitting it up to provide proper facilities for the increased business.
Marion county is putting several thousand dollars into the new elevator for the court house, from basement to attic, and fitting the offices to take advantage of the increased space that will be thus provided.
Actual and On Taps Plans Are Numerous
There is a major project for the southern suburbs on the taps, including a tourist camp, super service station, a large roadside hotel and restaurant, including a great light for airplanes—

the whole to be sponsored by a Los Angeles subsidiary of one of the big oil concerns.
The new airport for Salem will take perhaps \$50,000 or more in new construction by the city itself for the facilities provided, and the airplane building and operating concerns, together with the provisions to be made by private concerns and individuals to accommodate the flying public.
There is an era of improvement opening in the way of down town store and manufacturing institution improvements; a major project in the shape of a new super-service station, and many others on the way, on the taps, and just around the corner.
Cannery Improvements Also Planned
There are some cannery improvements under way or scheduled, including the fine new office building at the big Hunt cannery, additions at the West Salem cannery, and others.
The erection of many fine homes, some of them running into many thousands of dollars each in cost, is proceeding.
Besides all these, the breaking of ground for small and modest new homes goes on steadily, and will not halt during the main summer building season, or at all.
Increased forces at both linen mills, and in the canning and packing plants, and in almost every other industrial activity, will speed up all these new construction programs.
The new building improvements, as in every other activity looking to a bigger an better Salem, the year 1929 gives promise of good things beyond any year in the history of this city and its surrounding country.

PAULUS OPTIMISTIC ABOUT FRUIT CROPS

(Continued from Page 1.) has been reduced 100,000,000 pounds by hard freezes in the Sacramento valley and this fact coupled with no carry-over from the 1928 crop could combine, Paulus believes, to bring a fair demand for prunes.
Loganberries may appear to be the hardest fruit to market in Paulus' opinion, the demand being light while production, fortunately, is not as heavy as in former years.
Slight rains which fell here Saturday have not done any damage whatever and with the wind in the north there is little need for fear that the disastrous blooming season of 1928 will be repeated. In the highland trees are not yet in bloom but on the bottom acreages and along the low-lying hills many orchards are heavy with blossoms.

Local Heating Plant Is Shown O. S. C. Officials

Demonstration of the central heating plant employed by the Valley Motor Co. to heat its buildings on its Center and Marion street buildings, was conducted Saturday by Otto Hillman to a group of O. S. C. representatives who are considering the installation of such a plant at the college campus.
The furnace used is the Riley Big Flame Burner, a heating plant which generates a blue flame arising from wet hog fuel which is used to feed the furnace. Carbon produced by the fuel is also consumed providing a heating device much more economical, Hillman claims, than the majority of burners on the market.

Another Valsetz Jaunt Is Planned

Following the success of last Sunday's fishing jaunt to Valsetz lake, the idea gained rapidly in popularity, and another special train will be run from Independence this morning, returning tonight. The crowd making the trip is expected to be considerably larger than that of last Sunday.

YANKS LOSE RYDER CUP GOLF TOURNEY

MOORTOWN, Eng., April 27.—(AP)—Great Britain's best professional golfers today decisively defeated the American Ryder cup team, sweeping through the singles with a rush that could hardly be checked and never was halted. Five victories in the singles ran up a British total for two days play of six matches won, against four triumphs for the visitors with two matches halved—one in the four-somes and one in the singles.
The near rout of the men from overseas came as a pleasant surprise to the home folk for few of the golf fans of the islands thought the golden trophy cup, symbol of international professional golfing supremacy, could be regained although that dour Scot, George Duncan, captain of the British team, had worked his men up to a fever heat of enthusiasm and prevailed upon them to practice long and faithfully for the tests.

7 Reasons Why

Every Forward-Looking, Progressive, Thoughtful Person In Salem Should Investigate

Belcrest Memorial Park

- Because this is a new age. We must keep up with its swift-moving pace. Motors, airplanes, radios have changed everything. Belcrest Memorial Park is a new idea.
- Because its development marks an epoch in Salem's progress, and distinguishes it among cities of the Pacific Coast.
- Because forward-looking persons should heed the wisdom of the Fathers who planned this beautiful city. Belcrest Park looks far into the future, just as the pioneers did a hundred years ago.
- Because a plan of Perpetual Care is offered. It makes possible, in a sure way, that no tangled weeds will mar the scene, that the park will be kept lovely and attractive forever.
- Because this is an Age of Specialization, and this park is organized specially to provide a place of Perpetual Care. Other organizations pass into obscurity but this plan provides for the future.
- Because an opportunity is offered now that may save anxious hours and worry later, when you have little time for careful choice.

The Sleep in Beauty

Because Belcrest Memorial Park is a sound investment. You can put money to work here and reap returns that will give you moral satisfaction and financial gain. Many men and women are profiting today, not only in beauty, created but in cash, because they sponsored similar undertakings. The West is growing; Salem is developing; the world is marching forward. Why not investigate this opportunity at your door? Without any obligation, call 2205 for an illustrated booklet explaining this new, modern way. Or come to the office at 715 First National Bank Building.

Do this before you forget.
