## Department of Health Issues Bulletin as Picnic Time is Drawing Near

With picnic time near at hand, the latest bulletin from the state department of health is devoted to a warning that water from every running stream is not necessarily pure, and that picknickers should be careful in their choice of water. The bulletin follows:

Water from springs, brooks and streams may be dangerous to health even though they are cold. With picnic time approaching, there is much to be said in favor of a meal prepared and eaten in the open air.

But there is nothing that can be said for the habit which some people have of trusting to luck to find drinking water wherever it happens to be convenient to stop.

Running Water Not Always Good

Many persons have the idea that water from any and every stream in the country is pure and fit to drink if clear and cold, because of the belief that running water purifies itself. There is a grain of truth in this old saying, but there is also much falsity. If running water crosses a farm yard or pasture or flows near a highway it is bound to pick up human and animal pollution, which, taken into the human system, may cause disease. Of course certain factors begin at once to render the water less dangerous but this process is slow and uncertain. First of all, solid material tends to settle out, the heavier particles first. The faster the stream the less the settling. In addition to this, disease bacteria are so light in weight that there is comparatively little chance of their settling so long as the water remains in motion, if other streams join the first stream, pollution may be greatly diluted and the stream thus rendered less dangerous.

Tributaries May Be Polluted Also

These tributaries, however, may also be highly polluted and increase the danger. Oxidation of impurities by air is rapid in fast-flowing streams if the water

**RUPTURE EXPERT AND AUTHORITY**

HERE WITH THE FAMOUS HUSTON TRUSS

Dr. Huston of the Huston Truss Co., New York City, will personally be at the Marion Hotel, Salem, Thursday and Friday only, May 9th and 10th, from 9 a. m. to 4 p. m. and offers to the people of this section the internationally known Huston Truss. This justly famous Truss is universally considered the one perfect and satisfactory instrument for the relief of all kinds of reducible rupture, producing remarkable results without the use of surgical operations or medical treatment of any kind. Instantaneous relief is apparent the moment it is placed in position—contraction of the opening is manifest in a few days and the rupture soon disappears permanently in the average case.

The pad on this Truss will hold any reducible rupture perfectly, and will not slip regardless of position or bodily strain of the subject.

SLEEP IN IT—BATHE IN IT

No under leg straps elastic webbing or bulky pads are used in its construction. Nothing to wear out, clean and sanitary. Moisture proof and will not chafe. Can be put on or off in five seconds. No other instrument has ever met these demands with each universal endorsement. Guaranteed not to break.

WARNING—You are cautioned against wearing elastic webbing, or the old style Leather Covered Truss, or under leg straps. Such Trusses press in the wrong place, often causing strangulation and death. OVER THIRTY-FIVE YEARS SCIENTIFIC STUDY OF RUPTURE WARRANTS THIS STATEMENT.

This Truss is not sold by mail as each part is selected, assembled and fitted by Dr. Huston especially for each individual case. No guess work, but a scientific fitting of a scientific Truss.

WEAR A HUSTON TRUSS AND FORGET YOUR RUPTURE

Business demands do not permit other stops in this section. No charge for advice or demonstration. Remember the date and Hotel—Ask for Dr. Huston. Permanent address: Huston Truss Co., 25 Cliff St., New York, N. Y.
