Tornado Gets Aged Victim

This is one of the homes that came tumbling down at Metter, Ga., when a tornado swept through the state, causing enormous loss of life and property. Old Mrs. Trappnell, only person in Metter to be claimed by death as a result of the hurricane, formerly resided in this house. Her death may have been merciful as she will not have to face a life of poverty after the loss of her property.

SALESMAN BORES CITY

Scheme for Fire Engine Purchase Disliked

ROUTINE WORK DONE

WOODBURN, May 9.—A bolt, in the form of a fire engine salesman, dropped from a clear sky into the midst of a rather uninteresting meeting of the city council Tuesday evening. He failed to raise a scene as he probably would have six weeks ago, even his idea of selling the city a new fire engine on a "community basis" failing to appeal to the council members, who seemed to resent his interruption of their discussion on city property.

The principal topic of the last several meetings, discussion of properties, was again thoroughly chewed over, but as before, the final processes were left to a future meeting. When the fire engine salesman finished his talk the members settled down to a more varied form of business.

The city marshal was ordered to purchase a new supply of blankets for the city jail, the last prisoner there having burned his old ones.

The matters of the purchase of water mains and printing of forms for water bills were referred to the water board for consideration.

E. N. Soule, water superintendent, was granted a 30 days' leave of absence, his first in 10 years of service.

A petition signed by property owners on North Fifth street asking for improvement of that street from Harrison to the north boundary of the city was referred to the street committee for investigation and recommendation.

ETHYL HAS NO SUBSTITUTE

No other gasoline will give the performance of Ethyl!

Ethyl compound was perfected after seven years intensive research in the great laboratories of the General Motors Corporation—after the testing of more than 33,000 separate formulas. Prior to its discovery, high compression motors were commercially impractical while today, as the result of Ethyl, high compression performance is available in more than 68% of all automobiles manufactured. Fifty of the greatest oil companies in the world have endorsed Ethyl and add it to their finest gasoline.

Ethyl gasoline will improve the performance of any car. With Ethyl, carbon deposits actually increase the power and efficiency of old style motors, and to secure maximum efficiency from modern high compression motors, Ethyl is an absolute necessity. The many advantages of Ethyl are easily proved in your own car—greater speed, power and acceleration, easier driving with less gear shifting in traffic and on hills, and the elimination of the destructive, annoying vibration that hastens the depreciation of your motor.

Do not be misled by imitators who attempt to capitalize on the recognition given Ethyl. Your protection is the genuine Ethyl trade mark on every Ethyl pump. Try Ethyl today for a new thrill in motoring.
