Thomas of Portland, state district manager, spoke on the "Value of Fraternal insurance" and Mrs. W. J. Hagadorn, president of the council, A. A. Englehart, financier, and Mrs. Irene Gregg, assistant district manager all gave brief talks.

A late supper followed the business and program hour and then dancing was enjoyed.

War Mother's Give Luncheon

The Salem War Mother's gave a luncheon at the Y. W. C. A. for the girl volunteers from the city schools who sold carnations

YOUNG Mothers of today live better than their Mothers were able to live. They can dress better, look better and have more hours of leisure or freedom for study, for play or for social activities—for developing higher and finer human nature.

Labor saving devices have contributed largely to this. The modern sanitary and scientific bakery also has made its contribution to the emancipation of women.

Nowadays it not only is unnecessary for the young Mother to bake bread, but it is illogical. Everybody recognizes that such a loaf as Butter-Nut—superior in every way—makes home baking just as useless as it is unnecessary.

In the making of Butter-Nut the mixing of the ingredients is done with scientific system. There is no guesswork. There is no variation. The kitchens in the best homes in America have no facilities for what is called "proofing" in the modern scientific bakery.

And when it comes to the oven, in the baking of the loaf, nice adjustments of temperature from perhaps 425 to 475 degrees, are under control in our plant in a way impossible in home baking.

No home has—no home can have—the facilities, the instruments, the equipment which to us are a necessity in insuring the same fine loaf of bread every day, superior in its nourishment, in its appetite appeal and in its toasting and keeping qualities.
