

# Salem Has 18 Members of Graduating Class; Students Active in O. S. C. Affairs

## 534 Young People Finishing at Corvallis; 489 To be Given Bachelor of Science Degree; Men Greatly Outnumber Women

OREGON STATE COLLEGE, May 21.—Salem is represented by 18 of the 538 graduates of the class of 1929 completing work for degrees at the 60th annual commencement June 3. Of the total number being graduated, 489 will receive the bachelor of science degree, 23 the master of science degree, and 22 the degree of pharmaceutical chemist.

Men outnumber women in the graduating class 336 to 198, though the latter are scattered among seven of the 10 degree granting schools of the college. To get the bachelor of science degree here, students must not only complete four years of studies but must maintain an average grade of 80 or above. The result is that those in the graduating class are only those who have survived a four-year "weeding out" process that has eliminated the less determined students.

**Miss Fitts Home Ec Major**  
Home economics is the one school in which no men major, hence the 96 graduates this year of which Edna May Fitts is one, are all co-eds. Two main curricula are open to students in this school, one leading to commercial pursuits or teaching, and the other to home making and general citizenship. Miss Fitts has had work in household administration, foods and nutrition, home economics education, clothing and textiles, and institutional economics in addition to the liberal studies afforded in other schools of the college. As 75 per cent of the young women of the United States are married before they are 30, considerable emphasis is placed on training for the homemaking career.

Forestry is a calling growing in popularity and that is the school from which Thomas Childs and George Pepono are obtaining their degree, being two of 25 to finish the four-year course this spring. Oregon has an area of close to 23,000,000 acres good for nothing but to grow trees. Lumbering is now the state's major resource and a real demand exists for trained leaders in the technical phases of forestry development in the future. These men have had training in forestry, logging, engineering, lumber manufacture, with opportunity to major in any one of the three. Through a co-operative arrangement with the federal government many students enter the forest service as undergraduates and later enter a regular position in the department.

**Active on Campus**  
Both Childs and Pepono have been active in campus affairs. Childs is a member of Xi Sigma Pi, national honorary society in forestry and Wastina, local forestry group. Pepono's activities were more in the field of sports, since he was athletic manager of the Forestry club and chairman of the sophomore olympics. He is also a member of Alpha Sigma Phi, national social fraternity.

Charles Nushbaum and George Binkhorn are two of the 44 graduates this year in agriculture, one of the 10 degree granting schools of the college. Many agricultural graduates continue in advanced work and later enter research work, become extension specialists, marketing specialists, enter 4-H club work or agricultural teaching. Reduction of agricultural registration all over the country following the farm depression of the last decade has left the supply of trained agricultural students below the demand in this broad field.

**Nushbaum Very Busy**  
In addition to the regular class work, Nushbaum has also been in campus affairs, having been a member of Alpha Zeta, national honorary society in agriculture, Alpha Delta Sigma, national advertising honorary society, the Oregon Countryman staff, student agricultural publication, and Sigma Gamma social fraternity. He has competed in the Withycombe club stock judging contests and has won the Alpha Zeta scholarship cup.

Binkhorn has also been active in campus affairs. He is a member of the Barometer staff, the rifle team, Y. M. C. A. cabinet, Oregon Countryman staff, besides going out for track and cross country. He is a captain of the reserve of officers training corps and a member of Sigma Phi Epsilon, national social fraternity.

Lola Schulz and Phillip Varley are receiving their degree of B. S. in pharmacy from one of the strongest schools in this field in the west. The school includes a model drug store, the first of its kind established in the United States, which serves as a laboratory for actual drug store problems. Every one of the 19 graduates this year had to take the state pharmacy examination as part of his final training, and success in it permits practice in any of 44 states without further tests. Many of the graduates of this school go into the medical profes-

ion, become commercial chemists or become drug inspectors or analysts or enter related fields.

**Miss Schulz Honored**  
Miss Schulz has also been active in campus affairs, being a member of Rho Chi, national honorary society in pharmacy, the Beaver staff, secretary of the Pharmaceutical association and Snell hall council, women's dormitory.

The school of commerce, in which Margaret Smith, Ruby Drager and Kermet Thompson have taken their work, is the largest in the college in point of numbers and is represented by 120 in the graduating class this year. Of these 82 are men and 38 are women. These students have had work in business administration, economics and sociology and political science, with opportunity to major in these or in secretarial training, commercial education or advertising and selling. Post graduates are now employed in a great variety of occupations ranging from specialty salesmen to managerial positions and commercial teaching.

**Miss Smith Leader**  
In addition to the regular class work, Miss Smith has been active in campus affairs. She has been on the circulation staff of the Oregon State Student Directory and is a member of the Temendis organization of Eastern Star women, and Kappa Delta, national sorority.

Miss Drager has also been active in campus affairs, serving on the Greater Oregon state committee and on the staff of the Beaver, annual publication, the Orange Owl, humor magazine, and the Oregon State Directory. She is a member of the Art club and Alpha Xi Delta, national social fraternity.

Thompson is another student who has been active in campus affairs. He is a member of Sigma Alpha Epsilon, national social fraternity, the co-op managers association and the Memorial Union drive. His sport interest is in baseball and basketball. He was also on the freshman-sophomore olympics committee.

An engineering course was chosen by Ezra Diefenbach, Carl Walker, Kenneth Schellberg, Burrell Mitchell and William Rehfuuss in their class. This school trains men in civil, electrical, mechanical, engineering and industrial arts. Diefenbach and Walker choosing the mechanical department, Schellberg and Mitchell the electrical department and Rehfuuss the mining engineering department. Their training has led directly to the various fields of public work involved in the future development of the country, especially the Pacific northwest. The curricula they have followed was developed according to the standards of the national engineering societies, the first two years of which are devoted to basic courses and the last two to more specialized applications.

# Salem Grads at O. S. C.

From top to bottom, left to right. First row—Margaret Smith and Thomas Childs. Second row—William Rehfuuss, Clarence Adams, Alvin Burton and Charles Nushbaum. Third row—Kenneth Schellberg, Edna Fitts, Lola Schulz and George Pepono. Fourth row—Phillip Varley, Carl Walker, Ruby Drager and Howard Page. Bottom row—Ezra Diefenbach, Burrell Mitchell, Kermet Thompson and George Binkhorn.

Many graduates this year were selected for advanced work and training with some of the leading corporations of the east.

**Walker to be Engineer**  
In addition to the regular class work, Diefenbach has taken an active part in campus affairs, being editor of the Oregon State Technical Record, student engineering publication, a member of the American Society of Mechanical Engineers, and the executive board of the Associated Engineers, and a member of Beta Kappa, national social fraternity. He is a member of the American Legion, seeing foreign service in France and England.

Walker has also been busy in campus affairs. He is the treasurer of the American Society of Mechanical Engineers, the Associated Engineers, Scabbard and Blade, national military honorary society, Tau Kappa Epsilon, national social fraternity, and is a major in the reserve officers training corps.

**Chemical Work Attracts**  
The compelling appeal of chemical engineering attracted Howard Page, Clarence Adams and Alvin Burton, and in this they have obtained their degrees, being three of 80 to complete the course this year. A larger percentage of graduates from this school than any other on the campus go on in graduate study, many former graduates now being in Yale, Harvard, Illinois and other famous graduate schools. Chemistry is the source of some of the biggest industrial revolutions as well as industrial romances of the modern age and still hold untouched possibilities, according to scientists. Upwards of 75 billion dollars are invested in business undertakings more or less dependent upon chemical products, making opportunities large for service in this field.

work, Page has been active on the campus. He is a member of Theta Xi, national social fraternity, the Associated Engineers, and participated in freshman debate. He was a member of the Beaver Knights.

Both Burton and Adams have been leaders in campus affairs. Adams, who is a transfer from Willamette university, is a member of the Associated Engineers, the Chemical Engineering society and the Orion club, local social group. Burton is president of Burton club, local social organization.

## Unemployment Situation Is Noted In Salem

There is an unemployment situation here yet. It is what may

## Work to the tune of color—in SATIN EGGSHELL FINISH

Surround your working hours with gay colors and your tasks will seem lighter. You, yourself can paint your kitchen—in the modern colors of Satin Eggshell Finish. It's easy to put on and easy to clean. And the B-H Color Harmony Selector showing Satin Eggshell for walls and woodwork and B-H Brush Lacquer for furniture, will show you how to combine colors in lovely harmony.

"The way to beautiful homes"

Salem Y free employment office last week had 142 men and 34 women applying for work, and was able to send only 61 of the men and five of the women to jobs.

# A Graduation Gift —that will— Last a Lifetime

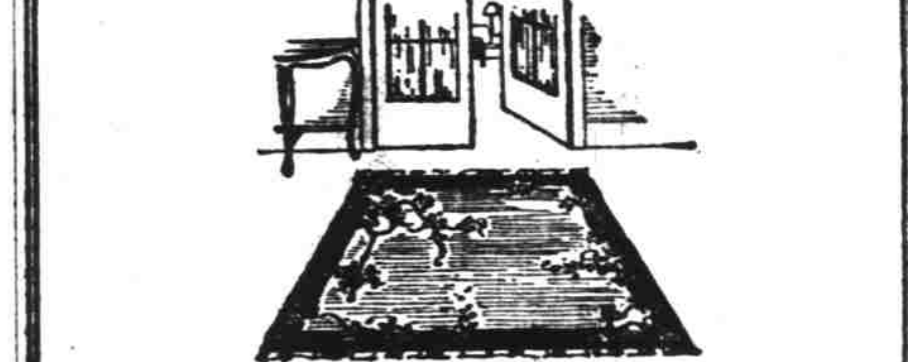

Nothing would be more appropriate for the girl graduate than a beautiful hope chest. A gift that will be useful, attractive and enduring.

We especially recommend the Dowling Dowry chest which is designed after the old English dowry chests used during the 17th century. Price \$35.00

We also have many other designs of different sizes. Prices \$15.00 to \$45.00

Do not fail to see them.

## The Gullistan De Luxe

All the silky beauty and pile-deep luster of the true Oriental yet at a price as more than you would pay for a good domestic rug.

The shen is the same as that of a thousand dollar Kashan rug, the wool is especially imported from the Near-East and China and the wearing power exceeds that of popular priced Oriental rugs. You will be surprised to find such value at so reasonable a price. See them at once.
