## **Geometric Perfection Is** Requirement if Ornament Is to be Worthy Addition

Any garden pool must fit in with the general garden scheme. If the garden is formal, the pool must be formal; if the garden is informal, then a naturalistic pool is necessary.

The ormal pool should be placed in one of the most conspicuous places in the garden. It should be geometrically perfect and must contain a complete finish with no rough places Insurance for the Ben Lomend whatsoever. It should contain a balanced and symmetrical planting.

The informal pool is more enticing because of the naturalistic effects which may be incorporated in it. If it is prophas been active in Salem business erly built, the garden can be transformed into the wilds of affairs has developed a remark-nature. The location should be carefully selected and a strict informally and apparent carelessness employed in the building of this type of pool. The beauty of the natural pool is nancing in the Salem territory, Mr. strengthened by plantings which have been studied over and Bell is prepared to make loans, carefully planned.
