

# 58 FATALITIES IN CAR WRECKS

### Percentage of Accidents Is Down From Year Ago, Report Shows

A special report of the chief of the state traffic division covering the first five months of 1929 is quite encouraging when compared with the same period in 1928. During the five months' period of 1928 the traffic problem was intensified by 299,255 resident-owned cars and 29,334 out-of-state cars. Motor accidents totaled 11,024, personal injuries from such accidents 1,786, with 58 fatalities.

During the first five months of 1929 there were 220,981 resident-owned cars licensed and 21,693 visitor's permits issued to out-of-state cars. This data gives a problem increase of 5 1/2 per cent, yet in the face of this increase in the problem, accidents have been decreased by 528, personal injuries by 297 and fatalities by 4. While this may not be in percentages all that could be wished for it is nevertheless encouraging. Especially is this true for the reason that the report covers all cities of the state, as well as rural districts. For the first five months in 1929 state traffic officers covered 415,895 patrol miles, made 4,340 arrests for violations of the several provisions of the motor vehicle act and recovered stolen cars of a resale value of \$29,370.00. By arrangement and through the courtesy of the Pacific Telephone and Telegraph company, state traffic officers may be reached, in their respective districts by simply calling central and asking for a state traffic officer. This is an emergency service and will no doubt be of inestimable value to the motoring public.

### 1929 Session Laws

One of the duties of the secretary of state is the compiling of the session laws of the legislative assembly. The 1929 session laws contain 895 pages and include all the laws and resolutions enacted and adopted by the 35th legislative assembly. 2,494 copies of the session laws have been received from the state printed and distribution made as required by law. The county officers have been furnished 755 copies; the members and clerks of the 1929 legislative assembly 98; circuit judges 32; district attorneys 36; supreme court library for exchange purposes, 50; state library for distribution to public libraries 66; federal officers and departments 14; state officials, boards and departments, 142 copies. 776 copies have been sold, receipts therefrom amounting to \$1,552.00, not including forwarding charges. The price of the volume is \$2.00 upon personal application, \$2.20 within the state, and \$2.40 by mail to points outside the state of Oregon.

### Notaries Public

The records covering appointment of notaries public show that there are at this time approximately 5,643 notaries commissioned within the state of Oregon. Fees received by the state from this source amounted to \$28,215.00. Since January 1, 1929, 843 notarial commissions have been issued, the fees amounting to \$4,210.00. Under the law, applications for appointment are made to the governor and the commissions issued by that official, countersigned by the secretary of state, and record of the same kept in the office of the secretary of state. The fee for appointment as notary public is \$6.00, \$5.00 of which is retained by the state, and \$1.00 being forwarded to the county to cover recording of the commission.

## MOUNTAIN RESORTS NOW OPEN, ADVICE

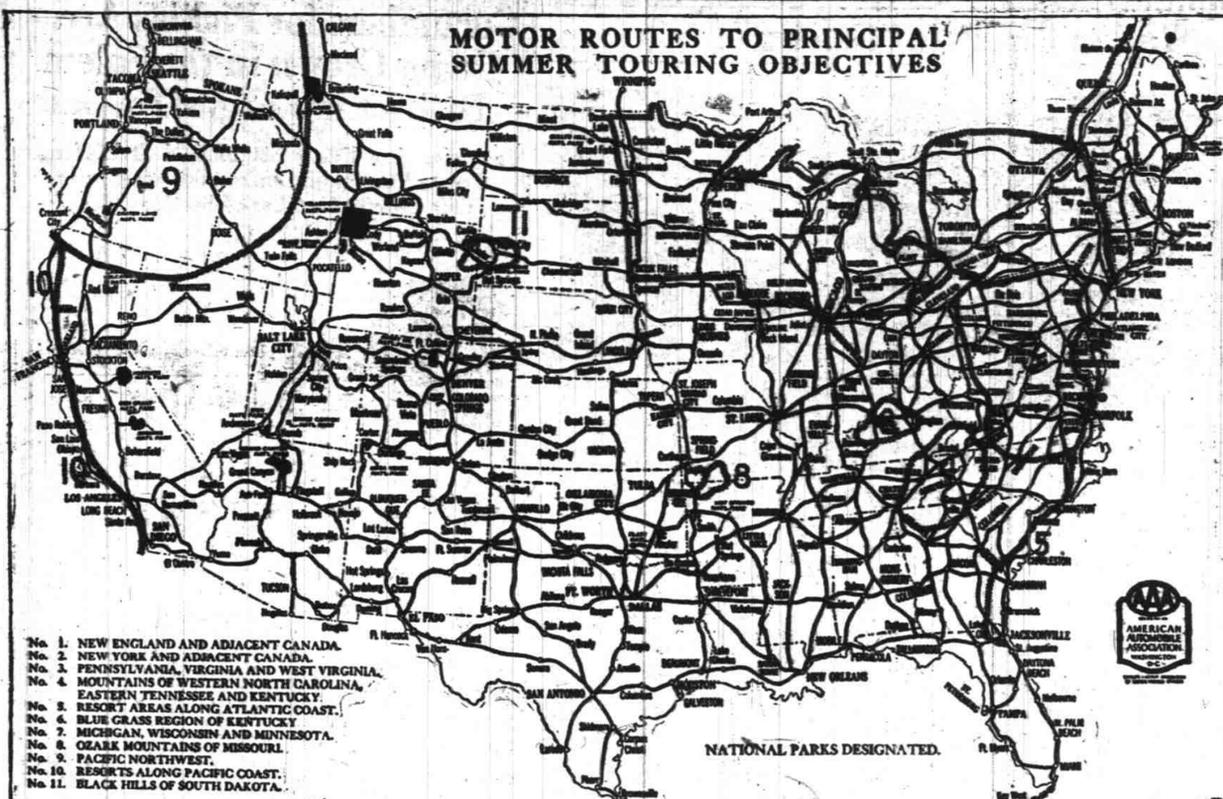

Oregon motorists who are planning their vacations for early in July are advised by the Oregon State motor association that all mountain resorts of the northwest are open and all facilities and conveniences are available. Paradise Valley of Mount Rainier is open and the hotels and camps are running full blast. Although there is six feet of snow on the ground, flowers will be at their best at Paradise Park between the middle of July and first of August.

Crater Lake opened to travel the last week in June and all facilities are available to visitors. Numerous early California tourists were disappointed in not being able to visit either of these resorts on account of the roads being blocked by snow.

## Overtime Car Parkers Being Rapidly Curbed

Parking one's car for more than the one or two hour limits prescribed in Salem ordinances is proving more dangerous daily with the police officers making a determined effort to stop overtime parking. The result is a round of fines of \$1, the sum generally assessed by Recorder Pulsen, to offenders who have not been in court before.

Among those paying penalties Friday were M. J. Mikes, \$1.00; F. W. Stock, \$2.50; improper muffler; James V. Schel, 235 Union, \$1.00; Dr. R. L. Wood, \$1.00; Floyd Holt, \$1.00; G. H. Body, \$1.00.

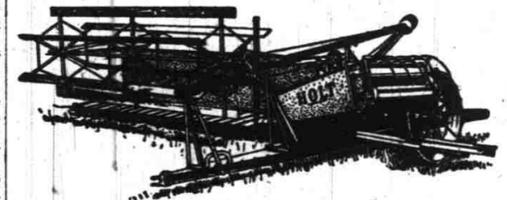

## NOISE IN FACTORY BAD But Workmen Fail to be Bothered By It LIP-READING IS USED

The ease with which workmen in some departments of the great automobile plants make themselves heard above the incessant and deafening noises of pounding presses and ponderous hammers is always a source of amazement to visitors. Few of them know it is all done by lip-reading and by becoming accustomed to the bedlam. Those not used to such concentration of sound find it virtually impossible to carry on conversations even by shouting. Yet the men at the machines give and take instructions about their work, apparently oblivious to the hammering, pounding and clashing of steel against steel that goes on all around them.

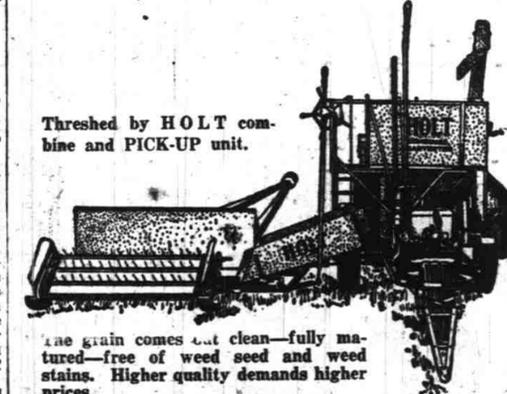

## Are You Acquainted WITH THE Holt Windrow System

We believe it will save more grain—of higher quality—operate cheaper than any other windrow method of harvesting.

MANY CROPS ARE HARVESTED BY THE WINDROW SYSTEM. CLOVER, VETCH, RYE GRASS, SMALL GRAIN, ALSIKE AND OTHERS.

The HOLT windrow HEADER cuts the crop—places it in windrows for the seed to ripen—stems to cure and weeds to dry.

Threshed by HOLT combine and PICK-UP unit. The grain comes out clean—fully matured—free of weed seed and weed stains. Higher quality demands higher prices.

The all steel HOLT is light of weight for light draft. Anti-friction bearings giving long life—smoothness of operation. Positive agitation saves extra bushels—that means extra dollars.

Combine direct whenever possible—with a HOLT combine. It is the cheapest known method of harvesting. Should your conditions warrant the windrowing system, the HOLT line offers the right equipment in the right size to harvest the crop, better, cheaper, quicker, easier.

Inspect These Machines at PORTLAND AND SALEM, SALESROOMS also at McMinnville, Oregon, and Albany, Oregon. Or write for special literature. Loggers & Contractors Machinery Co. 345 E. Madison PORTLAND 345 Center SALEM

## CARS FOR SHIPMENT CAREFULLY PACKED

When the greatest of all transportation mediums—the automobile—itself requires transportation, the process used in protecting cars for shipment is one of the most interesting and elaborate systems developed by the motor industry. More than one and one-half million feet of lumber are used each month in the huge overseas shipping building in Kenosha where the Nash Motors company has evolved one of the most efficient and painstaking systems of protecting cars for export known in modern shipping. Some 60 trained men send the cars along the progressive assembly which boxes them so perfectly that neither rough handling at seaboard, open roadstead unloading, nor extraordinary conditions sometimes encountered overseas can injure them in any way.

"Service That Satisfies"

## In Trouble? PHONE 198 or 1214 for Battery or Electrical Service. "Service That Satisfies" JOE WILLIAMS THE WILLARD BATTERY MAN Center & High Sts. and 275 S. Commercial

The export cars, bound for points on all the seven seas, are so well housed that their packing cases are often used for garages and houses in lands where good lumber is scarce, and travelers in far countries are apt to see the famous Nash nameplate emblazoned on desert huts and seaside cabins in some of the world's most out-of-the-way places.

## Another name for dependability is Dodge

Mileage figures may change on the speedometer of a Dodge Brothers car—but there's one thing that never changes—no matter what the mileage—and that's Dodge dependability. So—in new cars as well as used cars—you are always on the safe and sure side if you choose a Dodge. It's the one car that for fifteen years has been known for its enduring ruggedness, stamina and performance—so that today the name Dodge means dependability in every language. EIGHT BODY STYLES: \$945 to \$1065 F. O. E. Detroit—Convenient Terms

## COLORS SMART IN NEW AUTOS

### Wide Variety of Shades in Season's Designs and in Factory Output

The well dressed automobile this summer has smart exterior color combinations that harmonize with luxuriously fitted interiors. So color conscious has America become that only artistic tints of body and fender lacquers, blending perfectly with the proper shade of upholstery will satisfy the demand for dash and brightness in the new car. Color charts for Dodge Brothers are typical of the wide choice available in colors, striping and upholstery. On the new six model, now being received by dealers, a range of color and upholstery shades insures prompt delivery of practically any combination desired, according to the Bonesteel Motor company, local Dodge Brothers dealer.

Scale of Color Run Bolling green—Moss sage green—Riviera green—Am bato green—Lorenda green and Ladoga green run the scales of shades of that color on certain of the eight body styles available in the new six line. In the blues, Marquis blue, twilight blue, Japanese blue and Moonstone blue are found. Maroon shades include Toga maroon, Thorn maroon and light fast maroon. Grays are featured by Thorn gray, gopher gray, Fleetwood gray and gray Feldspar. Browns include Brazil Nut brown, Crockett brown, Thorn brown and Varguene brown. Pastel cream is also available.

Good health is absolutely essential to the motor vacationist and he should take every precaution to surround the trip with wholesome safeguards, according to the Oregon State Motor association. Nothing so enhances the zest of the motor tour as vigorous good health. Physical well-being, primarily, is the product of that well-known trilogy—pure air, pure water and pure food. The traveler must ever keep this fact in mind. Fortunately, the average man can equip himself to identify every one of this trinity in its perfect state. Purity of air, water and food have their definite, absolute earmarks. The motorist's duty to his health requires that he learn what these are. It demands further, constant vigilance to determine their presence—or their absence—in the environment of his travels.

## DE SOTO MAKES RECORD

The Chrysler Export corporation has been advised by its representative at Verneuk Pan South Africa, that a stock De Soto roadster, under official observation of the Royal Automobile club, covered 1505 miles in 24 hours on the speedway being prepared for Capt. Malcolm Campbell's attempt to break all records.

## The new Ford Tudor Sedan is a great family car

\$525 (F. O. E. Detroit, plus charge for freight and delivery. Bumpers and spare tire extra.)

You save many dollars in repair bills when you drive the new Ford

THE quality that has been built into the new Ford is reflected in its low up-keep cost. You'll save many dollars in repair bills because this new car has been built to endure—to stand up under thousands of miles of steady running. Come in and let us tell you of the manufacturing methods that enable the Ford Motor Company to sell such a really fine car at such a low price.

Roadster, \$450  
Phaeton, \$460 Tudor Sedan, \$525  
Business Coupe, \$525 Coupe, \$550  
Sport Coupe, with rumble seat, \$550  
Fordor Sedan, \$625

(All prices f. o. b. Detroit, plus charge for freight and delivery. Bumpers and spare tire extra.)
