Don Moe Gets Just One Under Par to Enter Quarter Finals

Brown Dog Furnishes Mental Hazard Without Affecting Ability

MISSION HILLS, Country Club. Kansas City, July 10 .- (AP) -Dce Moe, handsome, meticulous 19-year-old University of Oregon student from the Alderwood Country club, Portland, plays par golf -no matter what the handicaps. He entered the quarter finals of 30th annual western amateur tournament under way on the Mission Hills course this afternoon after shooting one under par on the 28 holes he had to play in his first and second round matches, although obliged to battie rain, heavy fairways and treacherous greens.

As though this were not enough in the way of impediments he had to overcome the mental hazard of a brown dog that insisted upon standing in front of him when he drove. The dog was a faithful gallery member at the finish. Moe had conquered the course with two par 72 rounds for medalist honors in the qualifying rounds.

The major upset of the tournament came in a second , round metch today when Art Sweet, golf writer from Chicago, defeated a former champion, Keele Carter, Oklahoma City, 4 and 2 after Carter had eliminated Chester Jones, University of Kansas student, 4 and 3 in a morning round.

Middle western golfers predominate in the quarter final pairings tomorrow with Moe the only "outsider," and incidentally the favorite of the gallery. Mue is paired with another young man, Carey L. Balley, Jr., 20 year old Kansas City boy, for the gruelling 36 hole battle which will truly test the merits of a golfer.

Athletics Split Pair Yanks Lose

ONLY NINE MONTHS OLD

But Already the Favorite Gasoline

A STIRRING epic of business and public service has been recorded during the past nine months with VIOLET RAY auti-knock Gasoline. The story of it is quickly told; the reason for it is as easily found.

Last September VIOLET RAY anti-knock Gasoline was an unknown fuel, as far as the public was concerned -likewise untried.

But to General Petroleum its un-equalled virtues were well known, and not only tried but proven be-yond any slightest doubt.

When Violet Ray was released through the 3000 independent dealers who distribute General Pe-troleum products, its success was so sudden as to be almost startling.

Demand flooded in from every quarter. The motoring public has discovered in Violet Ray a new kind of fuel efficiency and economy—a finer kind of performance, a real anti-knock, 100 percent combustion which are inherent in the gasoline itself.

VIOLET BAY auti-knock Gasoline is pure gasoline, with nothing added but the violet color-for your protection. A true anti-knock fuel — the finest product of refining science, and it contains no poisonous compound.

Unless you already know Violet Ray by experience—be assured that when you put it in your tank, you are leaving fuel troubles behind.

Product of General Petroleum Corporation of California
