PRUNES BRING FANCY PRICES

Over Two Million Pounds of
Douglas Product Sold
at Eight Cents

A report from Roseburg says that 2,218,250 pounds of Douglas county prunes have been sold by the Prune Growers' association to Roseburg and company on the basis of eight cents for the 30-35 Italian and the same for petites, according to the current bulletin of the state market agent. That deal should be an opener for the market, and with a light crop, prune growers should receive a good price for this season, the bulletin continues.

Other late reports on crop conditions are made as follows:

The United States agricultural department issued the following July 15: "Supplies of hogs for slaughter during the next 12 months are expected to be somewhat less than during the past year. Current storage holdings are smaller than the unusually large stocks in July a year ago. No marked change in either domestic or foreign demand is likely during the next 15 months. If producers respond to the situation, as they have responded to similar situations in the past an increase in hog production probably will occur in 1930. A production in 1930 equal to that of 1928 would probably bring a price high enough to result in about an average corn-hog ratio."

In Calgary, Canada, a new system of co-operation has been inaugurated, in which the consumers and the producers will participate in the operations of the Calgary and District Milk Producers' association. An advisory committee of three producers and three consumers will have access to the plant and its books, the consumers having assisted in financing the plant, and after overheads costs and interest on capital have been met, the profits made by the pool will be divided between producer and consumer upon an agreed basis. This arrangement will tend to improve the quality of the product and vastly increase the sales, it is claimed.

The inland Empire situation is quite satisfactory, as reported by the Union Pacific crop and weather man. While in the ranges and in the wheat-growing sections

there was a lack of moisture, yet stock in good shape and grain is ripening nicely, with promise of a good yield in most places. At Hood River the report is "soil in splendid condition with plenty of water for irrigation; all fruit in excellent condition; business good; heavy crop of peaches indicated." In Umatilla, Union and Walla Walla county fruit belts cherries have yielded well and apples promise a big crop.

The latest news from Canada indicates a serious condition there. A dispatch from Edmonton says: "Not for 20 years have crop conditions in Canada been so serious and unpromising as they are today. The report of the Dominion statistician, published on Saturday, showed crops for all Canada to be but 57 per cent of normal. The price of wheat, of course, will be higher than in other years, but the farmer will have very little to sell. In consequence of the prolonged drought and hot winds in the west, great areas of the best wheat lands are parched and blackened. Hundreds of acres sown to wheat have been plowed in. Rain has come in time to save some of the fodder crop but the outlook for grain is decidedly serious."

PROFITS LARGE IN MANY YEARS

Our Increased Volume OF BUSINESS

we find comes mainly from the old reliable source—"by word of mouth advertising." By those who have purchased their foodstuffs from us for years, those who only a few months ago discovered the saving and those new in our city and nearby counties who by inquiry have been referred to us by customers who know the value of saving. As months and years pass plainly visible to the general public is the rapid, yet steady growth of the Busick stores. Keeping pace with this growth is our determination that our food values and service continue just a little better than can be had elsewhere—a determination that we intend to put into effect.
