# REO SPEED WAGONS

## —Undoubtedly the World's Longest-Lived Commercial Vehicles!

### According to Accepted Authority

**AND**

they offer double the mileage life of ordinary trucks—making it unwise and costly to pay less, unnecessary to pay more than Reo's price

—On July 1st, 1928, there were 96,481 Reo Speed Wagons registered in the United States.

—This was 4,756 more than had been sold in the U. S. during the entire 6 1/2 years from January 1, 1922, to July 1, 1928.

—93.2% of all the Reo Speed Wagons sold in the U. S. the previous 7 1/2 years were still registered July 1st, 1928.

—80.3% of all the Reo Speed Wagons sold in the U. S. the previous 8 1/2 years were still registered on July 1st, 1928.

—And 50.8% of all Reo trucks sold since 1913 were still registered on July 1st, 1928.

Equally important is the fact that this record is based on all Reo Speed Wagons in use in all lines of hauling. Not just one truck, ten trucks, or one hundred unusually well cared for, little used trucks.

This utterly amazing record in stamina is a part of every Reo Speed Wagon you buy today—in any of the wide variety of models from 1/2 to 3-ton capacity. Reo engineering and manufacturing methods make doubly sure of this.

There is just one reason for this almost unbelievable record in continuous service: Reo early recognized the need for a tremendous stamina combined with balanced light weight in commercial vehicles—the need for sizing and powering trucks to do their job economically, efficiently and over a long mileage life. For example, Reo engines are amply powered for their job—instead of using larger gear ratios which force the engine up to racing, wearing speed in order to deliver the same power. Naturally, this high speed engine wears out more quickly. While outstanding stamina has been a recognized feature of Reo trucks since the first one was built.

Today, Reo engineers in their defeat of friction and vibration, have designed and built an even greater measure of efficiency, economy and long trouble-free life, into Speed Wagons of 1/2 to 3-ton capacity.

They have put the finest of long-lived materials—

some of them resulting from exclusive Reo formulas—into Speed Wagons.

They have added features in design and manufacture that establish an entirely new conception of commercial transportation. Passenger car speed, flexibility and economy of operation have been blended with brute strength to offer industry 1/2 to 3-ton hauling like men have never known before. And above all, Reo engineers have made these qualities lasting.

Buying any truck without first investigating these Speed Wagons, is a mistake no thinking buyer will make.

Reo Speed Wagons are offered in 14 wheelbase sizes—from 115" to 179". Chassis priced from \$895 to \$2,200. F. O. B. Lansing. They incorporate such modern-day advantages as 4-forward speed transmission, 4-wheel, 2-shoe internal hydraulic brakes, 6-cylinder engine, 7-bearing crankshaft, Myers built-in chassis lubrication and other refinements.

Call your Reo dealer. One of the Reo Transportation Specialists who have studied and solved transportation problems for hundreds of truck owners will call and discuss your transportation needs, without obligation. Reo Motor Car Company, Lansing, Michigan.
