

ZEPPELIN WILL RESUME FLIGHT

Giant Graf to Take Off for Tokyo Wednesday or Thursday

FRIEDRICHSHAFEN, Germany, August 12.—(AP)—The great dirigible Graf Zeppelin, veteran of four successful Atlantic crossings, was today ordered "cleared for sailing" early Wednesday or Thursday morning on the longest flight ever attempted by an airship.

Dr. Hugo Eckener, who has twice piloted the Graf successfully to New York and back again, set the start for 3:00 a. m., Wednesday (9:00 p. m., Tuesday, EST) on the Tokyo stage of her flight around the world. If the weather at that time is unfavorable, the departure of the air liner will be delayed until the same hour Thursday morning.

Distance Estimated Around 7000 Miles

Over steeples and mountains, many of which have never been mapped, Dr. Eckener faces a flight estimated by Zeppelin officials at between 6,250 and 7,500 miles. It was thought the Zeppelin would need five days to cover the distance. This totals 120 hours, which is longer even than on her first difficult passage from Friedrichshafen to New York in 1928.

With her new motors tuned up and broken in, an engineer from the Maybach works said they were good for 1,000 hours of flying. Dr. Eckener therefore should have a very comfortable margin for continuous flying.

Necessary Papers in Perfect Order

"Everything is in perfect order for the entire flight around the world so far as necessary permits, visas and other governmental requirements are concerned," Dr. Eckener said today.

Dr. Eckener said it was "absolutely impossible to forecast" his route across Russia and Siberia. He would choose a northern or a southern route on the basis of last minute weather reports.

The last word on the start will be announced at the traditional tea preceding departure of the airship Tuesday afternoon.

When the Graf takes off for Tokyo she will have aboard a greater aggregation than on any previous voyage. In addition to her own tried and trusted officers and crew there will be enough reserves among the passengers for almost any emergency.

Other Men Could Replace Captain

The positions of Dr. Eckener and Captain Lehmann could at any time be taken by the Americans, Commander Charles E. Rosendahl and Lieut. J. C. Richardson, U. S. N., or by Commander Nishiro Fujiyoshi, of the Japanese navy, who has often navigated the airship at Friedrichshafen.

Captain Flemming, the Graf's navigation expert will this time have the excellent voluntary assistance of the German weather bureau expert, Dr. Sietkopf and the Russian geographer, Prof.

Zena Man Overcome By Heat While He Works in Hay Field

ZENA, August 12.—A. Eberle was overcome by the extreme heat Saturday while working with the T. J. Merriam threshing machine. Mr. Eberle was blowing bundles of grain from a loaded wagon into the separator when Robert Crawford who was working on the opposite side happened to glance in his direction and discovered him lying face downward on his load.

A physician was called from Salem and it was some time before Mr. Eberle became conscious.

Kirklin, Captain Sir Hubert Wilkins could in a pinch qualify for almost anything, commander, executive, navigation officer or even chief engineer.

Famous Spanish Doctor on Hand

Should anyone fall sick Dr. Heronimo Meilas of Madrid, reputed to be one of the best physicians in Spain, is there to attend them, and should legal difficulties arise, Joachim Rickard of Boston and Madrid is a specialist on American, Roman and international law. Even financial difficulties are provided for by the presence of William B. Leeds of New York.

This enumeration does not take into account the other half of the passengers which is entirely composed of journalists. In all it is authoritatively stated that 19 men and one woman will go as passengers.

BIRTHDAY OF WOMAN AT VALSETZ FETED

VALSETZ, August 12.—A most enjoyable evening was had at the home of Mrs. Robert Masie Friday eve. A birthday party was held for Mrs. LaVern Ferguson, Charles Aldrich, Mrs. Bill Yedd, Mrs. John March, Mrs. Mrs. Sadie Morris, Mrs. Jim Dodson, Mrs. Wilbur Emmett, Mrs. W. Fisher, Mrs. Bill Stelzer, Mrs. Martin Toksted, Mrs. W. D. Barnett and Doris Masie. The evening was spent in playing games. There were several prizes awarded. LaVern Ferguson won the prize for the best left hand writer. Guessing groceries, first prize went to Mrs. March, the consolation to Mrs. Aldrich. High prize in nuts to crack was received by Mrs. Toksted while Mrs. Morris received low score. Contents guessing by Mrs. Emmaett, and Mrs. Barnett won the prize for the birthday cake were received by Mrs. Dodson, batchelor button, Mrs. Yedd, penny, Mrs. March, dime, Mrs. Barnett the engagement ring, and Dorris Masie the old maid tumbler.

Dainty refreshments were served, after which the honored guest was presented with a beautiful electric table lamp and electric toaster in remembrance of her birthday anniversary.

STOCK MARKET BUOYANT AGAIN

Bear Element is Given Hard Punishment as Prices Soar Skyward

NEW YORK, Aug. 12.—(AP)—Prices developed spectacular buoyance in today's session of the stock market, as the bear element, which had heavily committed itself in expectation of a secondary reaction, was submitted to ruthless punishment. Activity was almost wholly professional, only 3,619,090 shares changing hands, but a wide assortment of high priced issues were sent up 5 to 32 points.

Steels, chemicals, utilities, rail and railroad equipment issues led the advance. Also, bullish activity was resumed in the oils on a large scale for the first time in weeks. This was assented with reports that there would be no further cuts in mid-continent crude prices. Motors and coppers were fairly active, but were unable to make headway.

U. S. Steel Active Among Leaders

Bullish activity centered in such leaders as U. S. Steel, which rose more than 11 points to a record price above 225. American Telephone and General Electric were sent up 5 points, and American Can 5. Some profit taking cropped out late in the afternoon, but bulls quickly regained control of the price movement, and closing prices generally were close to the day's best levels.

Gains were characteristically wide in the chemicals, Allied Chemical and Commercial Solvents selling up about 13 and 14 points. Adams Express had one of its sharp upturns, gaining 32 points in a small turnover. Several of the utilities made marked progress, National Power and Light reaching new high ground, and Consolidated Gas, Standard Gas, Pacific Lighting and Stone and Webster making substantial headway.

In the rails, Atchison rose about 5 points to a new peak, then reacted. Rock Island and Norfolk and Western gained about 5 points. Baldwin Locomotive was in good demand on reports of valuable contracts, and Union Tank Car mounted nearly 8 points to a new peak. In the oils, Indian Refining and Houston made extreme gains of about 4 and 6 points, and Standard of New Jersey mounted more than 3 points.

International Nickel was well bought on announcement of an increase to \$1 from 80 cents in the annual dividend rate. International Silver mounted about 13 points, and American Tobacco shares, Curtiss Aero, General Refractories, Johns Manville, Western Union, Sears Roebuck and Westinghouse Electric made marked progress.

Peoples Gas was a weak feature, dropping about 21 points. American Type Foundry and National Biscuit, lost a few points. American Locomotive, Eastman Kodak, Union Pacific, and Stew-

HORSESHOE MEET KEEN

St. Luke's Parish Has Dandy Picnic WOODBURN PARK SITE

WOODBURN, Aug. 12.—Several hundred people attended the St. Luke Parish's picnic in the Woodburn city park Sunday. Sports of all kinds were found everywhere on the grounds at the picnic and everyone enjoyed the annual parish festivities. The St. Paul band was there and played several numbers during the day. One of the features of the afternoon was the horseshoe tournament. Skilled pitchers from all parts of the valley participated and the competition was keen, making the meet one of the most interesting sports on the ground.

The big game of the day was the baseball game between St. Paul and Woodburn, Woodburn winning, 7 to 6. It was rather a slow game until in the ninth when Faber of St. Paul knocked a homer, which placed that team ahead. Woodburn, however, at their last time up brought in a couple of runs and ended the game.

art Warner were among issues sagging a point or two.

LAD'S JAW BROKEN AS LADDER FALLS

SILVERTON, Aug. 12.—Ernest Harmon, small son of Mr. and Mrs. S. Harmon, is nursing a sore chin as a result of a fall. Ernest was climbing a ladder when it broke. Ernest split his chin to the bone and dislocated his jaw. He was taken at once to the doctor. He is getting along very well now.

Mrs. Herbert Thompson who came to Silvertown two weeks ago to have her tonsils removed has returned to her home at Vancouver, Wash. Mrs. Thompson stayed with Mrs. Hans Thompson, her husband's mother, while she was at Silvertown.

Mr. and Mrs. W. Jones, Mel Moser, and Mrs. Johanna Schaefer, are spending a week motoring in Washington. They intend to go as far as Vancouver, B. C., however, before they return to Silvertown.

Mrs. Archie Campbell, who has been employed at Dr. A. J. McCann's office, has gone to Westport to join her husband who is employed there. Her little daughter accompanied Mrs. Campbell.

Caterpillars Invade Trees In Amity Area

AMITY, August 12.—A few miles in an easterly direction from this city the oak timber is being completely denuded of leaves by an army of caterpillars. The caterpillars resemble the smooth, slender, light-green measuring worm and is one inch in length. A branch of the oak upon which the worms are feeding, when shaken, causes the caterpillars to drop from suspended webs. Looking at the sun through skeletonized leaves reveals millions of these shining webs everywhere anchored to a busily-eating caterpillar. Their depredations are confined exclusively to the oaks up to this time.
