GRAF ZEPPELIN HEADING EAST

Dirigible Leaves Home Port On Second Lap of Trip Around World

(Continued from Page 1.)

the gangway, but was stopped by Captain von Schiller, who explained that when Mr. Morris bought his ticket at Lakehurst he had been told they were only valid if there was space available beyond Friedrichshafen.

Mr. Morris, who seemed disconcerted, turned back and walked off the gangway.

Dr. Hugo Eckener directed the ship's 20 passengers to go aboard at 4 o'clock Thursday morning to be ready for the ship's departure at 4:30 a. m. (10:30 p. m. Wednesday, E. S. T.)

As usual the Graf Zeppelin's commander requested the passengers and newspapermen to meet him at Kurgarten Hotel, where he made his last minute announcements. In a confident and happy mood, he stated that the weather conditions were such that he could fulfil various wishes as to the route which had been expressed, namely to fly over Berlin, Danzig, Koenigsberg and Moscow, "provided of course they do their part and see that they do not throw a blanket of rain over their respective cities."

Flight to Be Completed Within Five Days

He also expected to reach Tokyo in 120 hours, or five days and there was even the possibility, in view of reports of favorable winds, that he might complete the second lap of his round the world flight in from 4 to 4½ days of flying.

"We expect, so long as we have the wind in our backs, to run with only four motors, thereby giving one a rest," he said. "That means that we can, if necessary, travel 150 hours, whereas if we run all the motors all the time, we can keep running only from 115 to 120 hours."

Questioned what quantity of fuel and other supplies the Graf will carry on its journey of from 6,700 to 7,000 miles, Dr. Eckener replied that he was taking about 24,000 cubic meters of Blau gas, 10,000 kilograms of benzine and 1,500 kilograms of motor oil, which latter is about twice as much as he expects to use.

Sixty Miles Fixed As Conservative Speed

Dr. Eckener estimated the Graf's average speed was 60 miles an hour on a conservative basis.

Dr. Eckener warned the public not to be alarmed if for 12 hours at a time nothing was heard of the dirigible.

"Nobody should get uneasy," he said. "It simply means we can not be reached nor can we reach any station."

The veteran dirigible expert admitted that the Friedrichshafen-Tokyo lap of the journey was the most difficult he had ever undertaken, especially from the viewpoint of navigation, all the more so as map material over parts of Asia is scant and incomplete. The hop over the Pacific, he said, would be much easier.

Radio Operator Willy Speck, discussing the wave lengths to be used, said:

Day and Night Wave Lengths Will Differ

"During day for short waves we will use 34.4 meters, during the night, 33. As to the long waves it is difficult to foretell, as we must agree on them from station to station. But in general they will be around 2,100 to 2,200, sometimes possibly going down as far as 1,900 and up to 2,300."

Although no freight, in the ordinary sense, will be carried on this trip except for 20,000 postcards and letters already carried from Lakehurst and 20,000 received in Friedrichshafen, Dr. Eckener agreed to take two things for sentimental reasons. One was a wreath of laurels from the federation of former soldiers imprisoned in Russia which he agreed to drop in Siberia, if possible over the graveyard of German soldiers who perished there, and the other is a bust of Baron von Huenefeld addressed to the German embassy in Tokyo for the Japanese emperor. The baron, it will be recalled, flew to Tokyo after the trans-Atlantic flight of the Bremen in 1928.

Eckener May Stay In U. S. for While

Whether Dr. Eckener will return to Friedrichshafen in the Graf Zeppelin after reaching Lakehurst is somewhat doubtful as business may keep him in the United States at that time.

One of the problems among the ship's company to wrestle with is that of languages, for among the 20 passengers six languages are spoken, namely, English, German, Japanese, Spanish, French and Russian.

When the Graf reaches Japan, presumably five days hence, it will, by a strange irony of fate, be pulled into a hangar that was once German. On the military field at Kasumia Ura, there is a hangar which during the war housed dirigibles. Under the terms of the treaty of Versailles this was dismantled and delivered to the Japanese who re-erected it near Tokyo.

ARMY DESERTERS CONFESS ATTACK

(Continued from Page 1.)

back into the car and drove it back to Denver.

The car has been recovered and with it three suitcases said to belong to the women.

Frost and Aldrich were arrested here last night as deserters, and turned over to army authorities.

HUTCHINSON, Kans., Aug. 14.—(AP)—While Kansas peace officers moved to connect two youthful "hitch hikers" with a brutal attack on two women motorists near Hoxie, Kansas, Sunday night, federal authorities attempted to link them tonight with the recent slaying at Phoenix, Ariz., of Paul E. Reynolds, department of justice agent.

Pictures of Russel Pegues, 20, Clarksville, Ark., and R. L. Bramlette, 18, Athens, Ga., arrested yesterday afternoon while walking on a road near here, were taken at the Kansas state reformatory late today and sent to Hoxie, Kansas to Sheriff Fred Morse, who will show them to Mrs. Beatrice Walsh, 34, and Miss Leda Beauregard, 21, of Concordia, Kas., who will attempt to identify them as the youths who attacked them.

The young women were left nude, bound and bleeding from razor cuts in a pasture near that city, after they had given two youths a ride at Limon, Colo., the women are in a Quinter, Kans. hospital recovering from their wounds.

An agent from the Kansas City office of the department of justice was at Hoxie today endeavoring to link the robbery of the women with the killing of Reynolds and also investigating the attack at Hoxie with a view to possible prosecution of the women's assailants on charges of transporting a stolen motor car from state to state.

CHURCH OFFICIAL TO FACE CHARGES

(Continued from Page 1.)

also by charges of women patients that they had submitted to Empringham's examinations in the belief he was a registered physician.

RENO, Nev., Aug. 14.—(AP)—James Empringham believed to be the national secretary of the church temperance society and former superintendent of the New York anti-saloon league, secured a divorce in Reno June 10 from Ethel M. Empringham on the ground of desertion. At the time of the trial, he denied that he was the Empringham, but names and facts of marriage were identical as given in the divorce complaint with those of Rev. Empringham. He made his home at a dude ranch on the Nevada desert some 40 miles from Reno. Whether or not he is still at the ranch has not been learned.

EUGENE MAN HEADS MOTOR ASSOCIATION

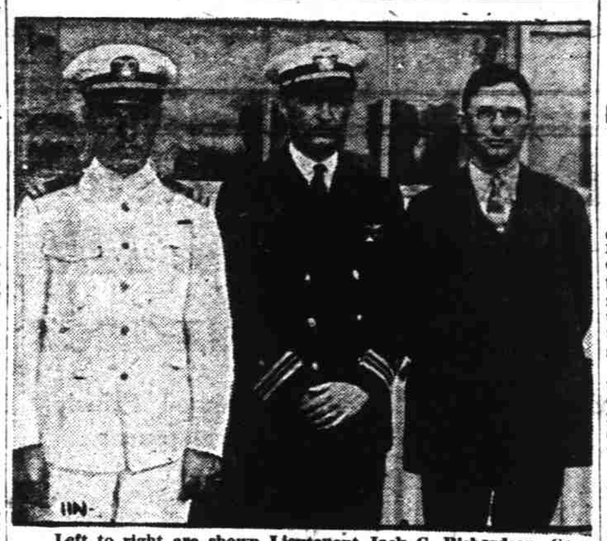
PORTLAND, Ore., Aug. 14.—(AP)—Joseph E. Shelton of Eugene was elected secretary and general manager of the Oregon State Motor association at a meeting of the board of directors here today. Mr. Shelton will make his headquarters in Portland. He succeeds George O. Brandenburg, who died July 3 at Eureka, Cal.

Mr. Shelton has been a director of the association for about six years, represeting Lane, Linn, Lincoln and Benton counties. For eight years until 1924 he was editor of the Eugene Guard and since then has been a member of a Eugene printing firm. He is past president of the Eugene chamber of commerce, the Lane county chamber of commerce and the Eugene Radiator. Lately he has been editing the "Oregon Motorist," official association publications. Officials announced that he will continue as editor of the publication.

Airplane Lacks 421 Hours of Making Record

CHICAGO, Aug. 14.—(AP)—Three hours and 35 minutes after they had taken off at 9:45 o'clock this afternoon in their monoplane "Chicago—We Will" to break the 424 hour world's endurance record recently set by the St. Louis Robin in St. Louis, three Chicago aviators were forced to land because of engine trouble. The fliers are Russell Mossan, Earl Steele, and Wilson Herren. They declared they would start the flight anew tomorrow.

Naval Officers on Tour



Left to right are shown Lieutenant Jack C. Richardson, Commander Charles E. Rosendahl, former commander of the "Los Angeles," and Captain C. P. Burgess, who are acting as official Navy observers during the world tour of the Graf Zeppelin. These officers hope to gain considerable knowledge during the trip that will aid the progress of airship construction and navigation in future naval operations.

MRS. HOOVER WAITS UPON HER SICK SON

WASHINGTON, Aug. 14—(AP)—In the coolness of the presidential Virginia mountain camp, Mrs. Herbert Hoover is playing the mother role, keeping a watchful eye over her son, Allan, who is convalescing from a recent minor illness.

Throughout torrid July Mrs. Hoover remained at the White House and carried on a number of informal social functions although many of her friends in the cabinet and congressional circles had deserted the capital because of the heat.

But when Allen became ill from a minor stomach disorder in the latter part of July, Mrs. Hoover immediately gave up her role of mistress of the White House and has been devoting herself during the past two weeks to caring for her 21 year old son. After a consultation with specialists Allan was confined in bed at the White House during the last two days of July. On August 2 he went on the regular presidential weekend trip to the Rapidan river camp and Mrs. Hoover has remained there with him since than time.

BIDDERS NUMEROUS ON BOULDER CANYON

DENVER, Colo., Aug. 14—(AP)—Boulder Canyon power will not lack for bidders when the time comes for letting contracts, Dr. Elwood Mead, United States commissioner of reclamation said here today incident to a conference with Los Angeles metropolitan water district and of private power companies.

Already, he said, the capacity of the projected dam for producing electricity is overtaxed by requests for power, and the mails bring in new applications for current from the $165,000,000 structure. The question of rates to be charged by the federal government is yet to be answered as the conference here was only for the purpose of gathering data, the reclamation commissioner added.

The dam's capacity is rated by engineers at 550,000 "firm" horsepower, or the amount of current which may be expected throughout the year, regardless of rainfall conditions.

Eckener Likely To Stay in U. S. For Some Time

WASHINGTON, Aug. 14.—(AP)—Dr. Hugo Eckener, commander of the Graf Zeppelin in which he is now attempting to circle the world on the longest trip ever made in an airship, has just been granted a patent on the dirigible in the United States after seven years of waiting.

The patent is for a rigid airship with separate gas cells and the petition was filed in the patent office November 27, 1922. Application was made in Germany two months prior to that time.

Billy Sunday to Deliver Speech For Movie Firm

PARIS, Ill., Aug. 14—(AP)—Returning here for a Chautauqua assembly after an absence of 34 years, Rev. Billy Sunday today announced he was considering an offer to make a "talkie" for Warner Brothers in New York.

He refused to comment on the terms of the offer, except to say "They will permit me to choose my own subject and talk for ten minutes."

Schmeling not To Fight Scott Manager States

DULUTH, Minn., Aug. 14.—(AP)—Joe Jacobs, manager for Max Schmeling, German heavyweight fighter said here today that Schmeling had not and would not agree to terms to fight Phil Scott of England as Humbert Fugazy, New York boxing promoter told the New York state athletic commission Tuesday.

MORE TROUBLE NOW FORESEEN

Financial Committee Takes New Recess Until Saturday

(Continued from Page 1.)

Greece, Rumania, Jugo Slavia and Portugal be induced to defer their claims and then to ask Germany to transfer about 30,000,000 marks a year from conditional to unconditional annuities to meet the British requests. This proposal has thus far hung fire.

It was said in British circles today that Philip Snowden British chancellor of the exchequer, had not modified a single one of his demands but that informal talks were still going on.

During today the U. S. was again mentioned in connection with world trade.

Last week Chancellor Snowden said that cancellation of all the debts and reparations was the only complete cure for the post war economic problem. Today Louis Loucheur, French delegate, said that unemployment in Great Britain and trade loss was not due to the problem of deliveries in kind on the reparations account but rather the development of the American export trade.

Third of South American Trade Taken Away

The United States, he said, had taken one third of South America's import trade away from Europe. He proposed the international control of production and the development of consumption as the only remedy. M. Loucheur ended the speechmaking which had been scheduled and from now on until Saturday the conversations will be informal.

The chief delegates of France, Italy, Belgium and Japan met this evening to make an inventory of the results of the private talk of the past few days, to judge the prospects and to see what further could be done towards an agreement with the British. The four powers declared they stood together on the questions raised by the British as their interests are identical.

They decided to have their experts make up a table of partition of the Young annuities showing just where the money will go if the Young plan is adopted. They will go over this table with the British experts on Friday.

GOVERNOR RITCHIE ATTACKS CONGRESS

UNIVERSITY, Va., Aug. 14.—(AP)—Congress and not the states is the nullifier of prohibition, Governor Albert C. Ritchie of Maryland, said here tonight at the institute of public affairs in progress at the University of Virginia.

"There are doubtless those who believe the eighteenth amendment can be enforced, but surely there is none who thinks it is being enforced," said Governor Ritchie.

"Of course, congress will never make an adequate effort ot enforce the law. I mean adequate in view of those who thing it possible to enforce it. Mr. Doran, the prohibition commissioner, told the committee of congress that this would cost the government at least $300,000,00 a year. Congress will never appropriate any such sum and it will never create the gigantic enforcement machinery which would be required.

"But if congress does not do these things, the responsibility rests directly on its own shoulders."

Governor Ritchie defended Maryland's stand in not passing a prohibition law on the ground of states' rights and declared in answer to Senator William E. Borah and other prohibitionists that Maryland's non-passage of an anti-liquor law is justified by supreme court approval.

He declared that Baltimore, his home city, has no crime wave as have many American cities and asserted that this is due to their freedom from prohibition statut..

FRISCO CHAMBER TO FAVOR NEW ROADS

SAN FRANCISCO, Aug. 14.—(AP)—By a majority of more than two to one, the San Francisco chamber of commerce today voted to intervene before the interstate commerce commission on behalf of the application of the Great Northern and Western Pacific railroads to connect their lines between Klamath Falls, Ore., and Paxton or Keddie, Cal.

Complete results of the vote, which was conducted by mail, were as follows:

For intervention 3,095.

For neutrality 1,162.

The membership had voted on two propositions — whether the chamber should go on record in favor of the Great Northern-Western Pacific application or whether it should take a neutral stand.

After filing applications with the Interstate Commerce commission, the two railroads sought the endorsement of the board of directors of the San Francisco chamber, its representatives appeared before the board as did those of the Southern Pacific railroad which is opposing the linking of the rival roads.

When the board was unable to reach a unanimous decision, the matter was referred to the general membership of the chamber and 7,700 ballots were sent out with a resulting vote in favor of the Western Pacific and Great Northern railroads today.

Williams Again Delayed in Test Flight by Wind

ANNAPOLIS, Aug. 14—(AP)—A stiff southwest wind which made the Severn river decidedly rough delayed again today the flight test of Lieut. Al Williams' Mercury seaplane racer.

The naval pilot waited all day in the hope that the wind would die down but it did not and the plane remained covered on the wharf of the naval academy. Bad weather also was predicted for tomorrow.

Everything now is in readiness and only favorable weather is awaited for the first test flight of the tiny plane with which Williams hopes to compete in the Schneider cup races in England Sept. 6 and 7.

2 OKLAHOMA BANK ROBBERIES OCCUR

OKLAHOMA CITY, Okla., Aug. 14.—(AP)—A plague of bank robberies which recently has afflicted Oklahoma broke out in two places today with the looting of the First State bank of Willow and the bank of Driftwood, widely distanced towns.

Two men locked J. H. Ford, cashier, and Gordon Key, clerk, in the vault of the Willow bank kidnaped George Richardson, a customer and fled with loot estimated between $3,00 and $4,000. The men were armed with pistols and rifles.

Richardson was carried away blindfolded five miles southward where he was dropped blindfolded.

Two men entered and robbed the Driftwood bank obtaining approximately $3,000. This bank is in the northwestern part of the state, while the Willow bank is in the southwestern corner. They left R. F. Sears, president of the bank in the vault. An hour passed before he was able to attract attention and gain his release.

NOAH'S ARK STORIES 17000 YEARS APART

Absorbing romance spanning 170 centuries is unfolded in "Noah's Ark," Warner Bros.' two million dollar Vitaphone super-production, now drawing crowds to Bligh's Capitol Theater.

The picture, in its ancient sequences, goes back to the time of Noah. In its modern scenes it includes the recent thrilling events of the World War, with its action laid in Europe, accomplishing a transitition representing thousands of years from its earliest to its latest locales.

In a unique manner a thrilling love story, portrayed by Dolores Costello and George O'Brien, is interwoven throughout the unfoldment of the massive spectacles uniting the two great cataclysms.

Hundreds of texts, including 30 versions of the Bible, were investigated in the more than two years spent in the research to provide authentic background for the romance under the personal supervision of Darryl Francis Zanuck, the author. The 38-acre auxiliary studio of Warner Bros. was turned over to Michael Curtiz, the director, for filming the super-production. Credit for the amazing photographic effects of the Flood sequences is given to Fred Jackman. The story is by Darryl Francis Zanuck.

At the head of the all-star cast with Miss Costello and George O'Brien are Noah Beery and Louise Fazenda. More than 10,000 extras were used in presenting the revels of the ancients and the Deluge itself.

Civil War Vet Likely to Die From Gunshot

ST. HELENS, Aug. 14.—(AP)—George D. Maranville, 90, Civil war veteran who was shot in the elbow during an attempted holdup here last night, was said to be in a cruicial condition today. Physicians expressed doubt that he would live through the night. The shattered arm was amputated above the elbow.

SNOOK GUILTY JURY STATES

28 Minutes Required to Arrive at Decision After Extended Trial

(Continued from Page 1.)

They were not present when the verdict was returned. The news was carried to them in another room of the court house where they had gone to await the jury's decision. An hour later they left the building in tears and were whisked away in a deputy's car.

Motion For New Trial Promised In Three Days

Astounded by the suddenness of the verdict and displeased that the jury had not taken longer to consider the case, E. O. Ricketts, of defense counsel announced immediately that a motion for a new trial would be filed within the required three days.

Trial Judge Henry L. Scarlett tentatively fixed Monday morning at 9 o'clock as the date and the hour for a hearing of the motion.

If it is overruled Judge Scarlett said he would impose the death sentence at once and Snook's attorneys will proceed with the preparation of an appeal to a higher court.

The jurors indicated by their verdict that they had accepted as the entire truth the confession which Dr. Snook repudiated on the witness stand when he denied having told anyone that he severed the young co-ed's jugular vein with his pocket knife to end her suffering from hammer blows inflicted during a quarrel at the New York Central rifle range on the night of June 13.

ELSINORE PUTS ON HIGH CLASS SHOW

The Elsinore theatre announces as its opening big production in Greater Movie Season The Four Marx Brothers in their famous all-talking, singing and dancing sensation, "The Cocoanuts."

"The Cocoanuts" is slated to open its local engagement for a five-day run Saturday.

The Four Marx Brothers are known as the most popular comedy team in musical comedy, they having appeared with innumerable successes in many musical shows on Broadway. "The Cocoanuts" played for a very successful run in New York as a stage play, and only through the able resources of Paramount was "The Cocoanuts" able to be presented as a talking production.

During the filming of "The Cocoanuts" which was done in the East, Paramount employed only the most versatile of chorus girls to take part in the scenes which are called for.

Oscar Shaw and Mary Eaton, two well-known Broadway favorites, also take a very important role in this picture.

Other important coming bookings announced by the Elsinore management is Ruth Chatterton in an all-talking dramatic hit, "Charming Sinners," while another big picture to reach the Elsinore screen will be Conrad Nagel in "The Idle Rich." This picture was adapted from the famous stage play "White Collars." It is an all-talkie.

SUSPECTED YOUTHS ORDERED RELEASED

HUTCHINSON, Kas., Aug. 14.—(AP)—Two youths who had been held here for investigation in connection with the robbery and attack on two Concordia women tourists last Sunday will be released in the morning, Sheriff Fay Brown of Hutchinson said tonight upon being advised that two young men arrested by Denver authorities had confessed to the crime.

The youths held here are R. L. Bramlett, 18, Athens, Ga., and Russell Pegues, 20, Clarksville, Ark. They had been questioned also in connection with the recent slaying at Phoenix, Ariz., of Paul E. Reynolds, department of justice agent, but officers said tonight they had been unable to link the young men with this crime.

FOREST BLAZE NOW SUBSIDING

Fire Brought Under Control After 125 Men Fight For Four Days

(Continued from Page 1.)

ber were reported under control today. A blaze on the Pacific Spruce company holdings near Toledo was subdued last night, but not before it had burned out 600 acres and damaged two donkey engines and cut logs on a sixty acre tract.

The Daley road fire near La Grande was controlled after burning out 200 acres of dense lodgepole pine.

The federal forestry department today issued an order, effective immediately, closing all stop and branch roads in Chelan county. This measure, Major D. Guthrie, assistant district forester said, was taken to insure against other fires springing up in the Chelan forest.

The forest office said the Chelan fire had covered about fifteen thousand acres and was spreading into the Methol drainage district. A crew of 250 men were fighting it.

T. P. Flynn, Portland road engineer, was overcome by smoke while fighting a fire in Watcom county, Washington, but was not in a serious condition, the local office said.

Coquille and Eugene Slated To Play Series

EUGENE, Aug. 14.—(AP)—Eugene and Coquille will meet Sunday in the second of a series of three games for the championship of the Bay Valley baseball league. Coquille won the first encounter last Sunday, 2 to 0.
